**Multilingual Information Access Evaluation I - Text Retrieval Experiments** Carol Peters, Giorgio Maria Di Nunzio, Mikko Kurimo, Thomas Mandl, Djamel Mostefa, Anselmo Penas, Giovanna Roda, 2010-09-03 The tenth campaign of the Cross Language Evaluation Forum (CLEF) for European languages was held from January to September 2009. There were eight main evaluation tracks in CLEF 2009 plus a pilot task. The aim, as usual, was to test the performance of a wide range of multilingual information access (MLIA) systems or system components. This year, about 150 groups, mainly but not only from academia, registered to participate in the campaign. Most of the groups were from Europe but there was also a good contingent from North America and Asia. The results were presented at a two-and-a-half day workshop held in Corfu, Greece, September 30 to October 2, 2009, in conjunction with the European Conference on Digital Libraries. The workshop, attended by 160 researchers and system developers, provided the opportunity for all the groups that had participated in the evaluation campaign to get together, compare approaches and exchange ideas.

**Pragmatics in English as a Lingua Franca** Ian Walkinshaw, 2022-01-19 This volume addresses two current gaps in pragmatics research in English as a lingua franca (ELF): Firstly, the contexts, approaches and theories of pragmatics generally that remain under-explored in studies of ELF speakers; secondly, the paucity of ELF pragmatics studies investigating Asia, despite its economic and geo-political importance and the role of English as a region-wide lingua franca. The volume draws together a range of pragmatics-related chapters contributed by leading experts in pragmatics, both in English as a lingua franca and more broadly. These either present new research that extends the current state of the field, or introduce approaches and theories from other areas of pragmatics that translate readily to analysis of ELF interaction. Five of the chapters are Asia-focused, examining pragmatic aspects of communication among Asian ELF users. The volume therefore offers scope for ELF pragmatics researchers to further broaden the field's theoretical and analytical horizons, and adds to the quantity of knowledge about pragmatics in ELF communication in Asia. Its publication raises the visibility of this research area within the broader field of pragmatics.

*Robust Environmental Perception and Reliability Control for Intelligent Vehicles* Huihui Pan, Jue Wang, Xinghu Yu, Weichao Sun, Huijun

Gao,2023-11-25 This book presents the most recent state-of-the-art algorithms on robust environmental perception and reliability control for intelligent vehicle systems. By integrating object detection, semantic segmentation, trajectory prediction, multi-object tracking, multi-sensor fusion, and reliability control in a systematic way, this book is aimed at guaranteeing that intelligent vehicles can run safely in complex road traffic scenes. Adopts the multi-sensor data fusion-based neural networks to environmental perception fault tolerance algorithms, solving the problem of perception reliability when some sensors fail by using data redundancy. Presents the camera-based monocular approach to implement the robust perception tasks, which introduces sequential feature association and depth hint augmentation, and introduces seven adaptive methods. Proposes efficient and robust semantic segmentation of traffic scenes through real-time deep dual-resolution networks and representation separation of vision transformers. Focuses on trajectory prediction and proposes phased and progressive trajectory prediction methods that is more consistent with human psychological characteristics, which is able to take both social interactions and personal intentions into account. Puts forward methods based on conditional random field and multi-task segmentation learning to solve the robust multi-object tracking problem for environment perception in autonomous vehicle scenarios. Presents the novel reliability control strategies of intelligent vehicles to optimize the dynamic tracking performance and investigates the completely unknown autonomous vehicle tracking issues with actuator faults.

Machine Understanding Zbigniew Les, Magdalena Les, 2019-08-01 This unique book discusses machine understanding (MU). This new branch of classic machine perception research focuses on perception that leads to understanding and is based on the categories of sensory objects. In this approach the visual and non-visual knowledge, in the form of visual and non-visual concepts, is used in the complex reasoning process that leads to understanding. The book presents selected new concepts, such as perceptual transformations, within the machine understanding framework, and uses perceptual transformations to solve perceptual problems (visual intelligence tests) during understanding, where understanding is regarded as an ability to solve complex visual problems described in the authors' previous books. Thanks to the uniqueness of the research topics covered, the book appeals to researchers from a wide range of disciplines, especially computer science, cognitive science and philosophy.
