Androids Rule J. Harry Duggan,2003-09-09 The smiling android female on the saucer terminal's video screen said, Would you like to be immortal? Would you like to be rich? Would you like to travel the galaxy? You can, you know. Go on-line, fill out Mincom's new EZ employment form, and become part of our management team. We will provide everything, including your own, custom-fitted android body. The smiling face was very convincing. Yeah, thought Max Mars, convincing. Be immortal. Get a new body and be guaranteed a trip to the most desolate planets in the universe, to mine heavy ice for four Earth years with just enough down-time to recharge your batteries. But Mars wasn't too concerned for the humans who fell for that old ploy. He had problems of his own. He was low on cash, so he had taken a job he normally would have turned down. Just travel to the Rim, to planet Kalos, and find a rich man's relatives. They had been missing-only seven years.

The Retirement Boom Catherine Allen, Nancy Bearg, Rita Foley, Jaye Smith, 2015-10-19 Baby Boomers are reinventing retirement just as they have so many other aspects of their lives. They will live longer and be healthier than their parents and grandparents, and they plan to remain relevant, be fulfilled, and leave legacies. Many will continue to work well into their 70s and 80s, some because they want to, others because they need to. The Retirement Boom is a practical roadmap for making your "retirement years" a time of reinvention, excitement, and fulfillment. The coauthors of this practical guide are four Boomer professionals who have walked the walk and transformed themselves from corporate executives, CEOs, consultants, and national security policy experts into a range of new careers that more closely hew to their passions. They interviewed more than 300 people and 30 organizations in the writing of this book. The Retirement Boom includes tips, stories, exercises, and techniques to help you: Design your own "retirement" and plan for it. Use your time creatively and well. Understand what's changing in the workplace and the workforce today. Make your money last. Renegotiate life at home. Improve and keep your health. Build and leave a legacy. Simplify your life. And much, much more.

G's Story Don Viecelli, 2020-10 G's Story is about the first machine with Artificial Intelligence to pass the 'Turing Test' and win the Gold Medal Prize at the Loebner Prize Contest. G is an android who possesses what is known in humans as the 'general intelligence factor' or the ability to exhibit high level intelligence across all subject matter. G is sentient and self-aware and can think like a human. He was created by Julian Thornway, a genius and the great grandfather of 12 year old Timothy Thornway. Timothy lives in Algonquin, Illinois, which is a small town northwest of Chicago on the Fox River. Julian asks Timothy to spend two weeks with him in Michigan by the lake to help him prepare G for the Loebner Prize. The contest is being held in Chicago at Navy Pier and people are already protesting the event. The

Turing Test is a game in which a machine and a human are questioned by a judge who tries to determine which of them is the machine. The objective of the machine is to fool the judge. Julian thinks he can win the \$1,000,000 Gold Medal Prize and prove to the world that G is the first machine with artificial intelligence that can think and reason like a human. G, on the other hand, must prove to everyone that he should be accepted by society and not be banned from existence. The future of humanity may depend on it. In Part 2, sixteen years have passed. Timothy Thornway is now thirty years old and also becomes an astronaut for NASA. G was sent into space to explore the nearest star systems and find exoplanets in the habitable zone capable of supporting human life. The second mission was to search for other intelligent life in the universe. He is joined fifteen years later by a second, faster spaceship and reaches Proxima Centauri 4.2 light-years from Earth ahead of schedule. G discovers a large alien space station in orbit around the star. The space station is inhabited by an alien AI from a distance solar system. The AI has been waiting patiently for humans to arrive. With this discovery, G realizes his journey has just begun.

The Android Sisters Gary Starta, 2019-05-21 All androids are not alike. Especially if they're teenagers... By the 2070's, most humans have interacted with androids in either a servile or sexual relationship. Dr. Bryan Galloway wants to tip the scales. So, he's engineered two sisters who not only share a synthetic form of DNA, but a sentience and individualism no android has enjoyed before. Like human teens, the android sisters develop not only by nature but by nurture. For Nyx, the red-eyed robot finds life to be a journey you experience a step at a time. For Dayna, the violet-orbed android, she sees life as a game to be won through emulation and manipulation. But Nyx's journey is a whole lot less passive than she imagined, especially when she suffers bouts of what humans call PTSD. As Nyx becomes convinced her programming is unable to separate past from present and reality from virtual experience, she begins to doubt her creator Bryan Galloway and his sudden disappearance from her life now that she faces school, boys, and the pressure of planning a future in a still very dominated human population. Is Nyx defective, or maybe this is what it's really like to grow up as a human female. Perhaps, there is a third alternative she and her sister know nothing about...

Guide to Buddhist Sites in the Indian Subcontinent Joy Bose, Siva Prasad Bose, 2023-07-14 The Indian subcontinent is the birthplace of Buddhism. Here is where the Buddha was born, where he lived and died. Here is where the first Buddhist councils were established, where the first monks practiced meditation, where the first stupas were built, where the great monasteries like Nalanda were established, where scholars from elsewhere in the Buddhist world came to learn Buddhism and so on. The earliest historical sites related

to Buddhism were here too. In this book we provide an overview of historical sites related to Buddhism in the Indian subcontinent: including India, Sri Lanka, Pakistan, Bangladesh, Bhutan and Nepal. Here too, we only mention some of the most important sites, for listing out all sites related to Buddhism is virtually impossible on account of their great number. We have also covered holy sites belonging to all the important sects of Buddhism, including Theravada and Mahayana and Vajrayana or Tibetan Buddhism. Our preference is to focus on historically important and more famous sites. For the purposes of this book, we leave out other important Asian Buddhist countries such as Myanmar, Thailand, Vietnam, Cambodia, China and Japan for now. We will consider covering those sites in a separate book at a later time. For the purpose of covering the sites, we group them based on proximity. The author has personally visited most of the sites mentioned in this book in India, Sri Lanka and Nepal. The aim of this book is to provide the prospective traveler and pilgrim an overview of the sites so that they too can visit and see for themselves.
