Inquiry-Based Practice in Social Studies Education S.G. Grant,Kathy Swan,John Lee,2022-09-15 Now in its second edition, Inquiry-Based Practice in Social Studies Education: Understanding the Inquiry Design Model presents a conceptual base for shaping the classroom experience through inquiry-based teaching and learning. Using their Inquiry Design Model (IDM), the authors present a field-tested approach for ambitious social studies teaching. They do so by providing a detailed account of inquiry's scholarly roots, as well as the rationale for viewing questions, tasks, and sources as inquiry's foundational elements. Based on work done with classroom teachers, university faculty, and state education department personnel, this book encourages readers to transform classrooms into places where inquiry thrives as everyday practice. The second edition includes a new chapter highlighting three ways that the blueprint acts as an assessment and curriculum system, and includes updated and enhanced references throughout the book. Both pre-service and in-service teachers are sure to learn strategies for developing the reinforcing elements of IDM, from planning inquiries to communicating conclusions and taking informed action. The updated curricular and pedagogical examples included make this practical book essential reading for researchers, students of pre-service and in-service methods courses, and professional development programs.

Pharmaceutical Formulations for Older Patients Mine Orlu,Fang Liu,2023-12-12 Pharmaceutical formulation design affects patient acceptability/adherence and pharmacokinetics of the drug. This is particularly important for older patients because of the physiological changes due to ageing and clinical/social circumstances related to medicine taking. This book provides a comprehensive review in the design of formulations to meet the needs of older patients. An overview of the key clinical, social and pharmaceutical factors affecting medication optimization, safety and acceptability in older adults is included, followed by patient-centric considerations including regulatory requirements, dosage form design and human factor studies. Advanced pharmaceutical technologies are discussed for their potential use in older adults such as 3D printing, long-acting oral formulations and novel vaccine technologies. The unique focus of the book will be of interest to pharmaceutical scientists in both industry and academia in searching for better formulations for older patients.

Advances in Integrated Design and Manufacturing in Mechanical Engineering II Serge Tichkiewitch,M. Tollenaere,Pascal Ray,2010-04-02 The 33 papers presented in this book were selected from amongst the 97 papers presented during the sixth edition of the International Conference on Integrated Design and Manufacturing in Mechanical Engineering during 28 sessions. Nursing Diagnosis Handbook, 12th Edition Revised Reprint with 2021-2023 NANDA-I® Updates - E-Book Betty J. Ackley,Gail B. Ladwig,Mary Beth Flynn Makic,Marina Martinez-Kratz,Melody Zanotti,2021-08-26 Step-by-step instructions show how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. UNIQUE! Care plans are provided for NANDA-I© approved nursing diagnoses. Evidence-based interventions and rationales include recent or classic research and references supporting the use of each intervention. Examples of and suggested NIC interventions and NOC outcomes are presented in each care plan. 150 NCLEX® exam-style review questions are available on the Evolve website. Easy-to-follow Sections I and II guide you through the nursing process and selection of appropriate nursing diagnoses. Clear, concise interventions are usually only a sentence or two long and use no more than two references. Safety content emphasizes what must be considered to provide safe patient care. List of NANDA-I© Diagnoses on the inside front cover of the book provides quick reference to page numbers. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. Appendixes provide valuable information in an easy-to-access location.

Literature and Society Chih-p'ing Chou,Ying Wang,Xuedong Wang,2016-07-26 A revised one-volume edition of the popular upper-level Chinese language textbook Since its first publication in 1999, Literature and Society has been widely used in Chinese-language classes at major universities

and language institutions. In this completely revised edition, designed for upper-level students, this classic textbook continues to explore a variety of contemporary Chinese social issues through the study of Chinese literary works and essays. This new edition condenses and consolidates the original two-volume set into one convenient volume. The first section, Literature, includes essays, short stories, and a play, and features a range of writers: Lu Xun, Lin Yutang, Liang Shiqiu, Wang Li, Xie Bingying, and Wang Meng. The second section, "Society," includes essays by Fei Xiaotong, Ma Yinchu, Wu Han, Liang Sicheng, and Chen Hengzhe. The selections delve into such subjects as population issues, ethics, marriage, the lives of intellectuals, and challenges faced by minorities in China. Each selection begins with a brief introduction about the author and concludes with discussion questions. The simplified character text and corresponding vocabulary words face each other on adjacent pages, and the traditional character text follows at the end of each lesson. Literature and Society remains an innovative way for students to sharpen their Chinese language abilities while learning more about important areas of Chinese culture. Completely revised edition Original two-volume set now consolidated into one convenient volume Selections of literary works and essays explore contemporary Chinese social issues Each selection begins with an introduction to the author and concludes with discussion questions Simplified character text and corresponding vocabulary sit on facing pages Traditional character text appears at the end of each lesson

Advances in Software Engineering Changhoon Lee,2009-11-02 As software engineering (SE) becomes specialized and fragmented, it is easy to lose sight that many topics in SE have common threads and because of this, advances in one sub-discipline may transmit to another. The presentation of results between diff- ent sub-disciplines of SE encourages this interchange for the advancement of SE as a whole. Of particular interest is the hybrid approach of combining ideas from one d- cipline with those of another to achieve a result that is more significant than the sum of the individual parts. Through this hybrid philosophy, a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline. This volume comprises the selection of extended versions of papers that were p- sented in their shortened form at the 2008 International Conference on Advanced Software Engineering and Its Applications (http://www.sersc.org/ASEA2008/) and 2009 Advanced Science and Technology (http://www.sersc.org/AST2009/). We would like to acknowledge the great effort of all in the ASEA 2008 and AST 2009 International Advisory Board and members of the International Program Committee, as well as all the organizations and individuals who supported the idea of publishing these advances in software engineering, including SERSC (http://www.sersc.org/) and Springer. We would like to give special thanks to Rosslin John Robles, Maricel O. Balitanas, Farkhod Alisherov Alisherovish, Feruza Sattarova Yusfovna. These graduate school students of Hannam University attended to the editing process of this volume with great passion.

Kamenev,2013-11-27 Since the volume may be of interest to a broad variety of people, it is arranged in parts that require different levels of mathematical background. Part I can be assessed by those interested in the application of visualization methods in decision making. In Part II computational methods are introduced in a relatively simple form. Part III is written for readers in applied mathematics interested in the theoretical basis of modern optimization.

Varieties of Early Experience: Implications for the Development of Declarative Memory in Infancy Patricia J. Bauer,2010-11-25 Volume 38 of the Advances in Child Development and Behavior series is concerned with the development of memory in the first years of life. It covers an introduction to normative development of memory during this period and an introduction of a means of assessing memory in preverbal infants--namely, elicited imitation. Three chapters each concern a special population in which we have reason to believe the development of memory will be affected due to compromised hippocampal development as a result of maternal gestational diabetes, preterm birth, early deprivation resulting from institutional (orphanage) care, and abuse and/or neglect by the caregiver. Goes in depth to address the varieties of Early Experience: Influences on Declarative Memory Development A necessary resource for both psychology researchers and students

Comparative Views on Origins Brock Lee,2009-12 Brock Lee's debut book stands alone in the creation vs. evolution debate. He documents and compares 23 views on the origins of man, applying the microscope of true science to each view. Systematically, Lee demonstrates how each view stacks up to proven science. The book will either strengthen readers' views or force them to choose between what is true and what is proven to be fraud. His extensive footnotes are as fascinating as the main text.

Jane's International Defense Review ,2006-07

Conceptual Modeling for New Information Systems Technologies Hiroshi Arisawa,Yahiko Kambayashi,2003-08-06 The objective of the workshops associated with ER 2001, the 20th International Con- rence on Conceptual Modeling, was to give participants the opportunity to present and discuss emerging hot topics, thus adding new perspectives to conceptual modeling. This, the 20th ER conference, the ?rst of the 21st century, was also the ?rst one in Japan. The conference was held on November 27-30, 2001 at Yokohama National University with 192 participants from 31 countries. ER 2001 encompasses the entire spectrum of c- ceptual modeling, from theoretical aspects to implementations, including fundamentals, applications, and software engineering. In particular, ER 2001 emphasized e-business and reengineering. To meet this objective, we selected the following four topics and planned four international workshops: – International Workshop on Conceptual Modeling of Human/Organizational/Social Aspects of Manufacturing Activities (HUMACS 2001) Manufacturing enterprises have to confront a host of demands. The competitive climate, enhanced by communication and knowledge sharing, will require incr- singly rapid responses to market forces. Customer demands for higher quality, better services, and lower cost will force manufacturers to reach new levels of ?exibility and adaptability. Sophisticated customers will demand products customized to meet their needs. Industries have so far sought to cope with these challenges primarily through advances in traditional capital by installing more powerful hardware and software technology. Attention to the role of humans combined with organizational and social schemes in manufacturing has only been marginal. The workshop HUMACS 2001 aimed to challenge the relevance of this last point.

New Technologies, Mobility and Security Houda Labiod,Mohamad Badra,2007-11-13 NTMS'2007 was the first IFIP International Conference on New Technologies, Mobility and Security that was held from May 2 to May 4, 2007 in Paris, France. It was aimed at fostering advances in the areas such as New Technologies, Wireless Networks, Mobile Computing, Ad hoc and Ambient Networks, QoS, Network Security and E-commerce. It provided a dynamic forum for researchers, students and professionals to present their research and development in these areas.

Information and Communication Technology for Sustainable Development Milan Tuba,Shyam Akashe,Amit Joshi,2019-06-26 The book proposes new technologies and discusses future solutions for ICT design infrastructures, and includes high-quality submissions presented at the Third International Conference on ICT for Sustainable Development (ICT4SD 2018), held in Goa, India on 30–31 August 2018. The conference stimulated cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book focuses on innovative issues at an international level.

The Perfect Learners' Dictionary (?) Thomas Herbst,Kerstin Popp,2011-08-25 This volume undertakes a detailed analysis of the latest generation of learners' dictionaries of English. It assembles the papers delivered at the eponymous symposium held at the University of Erlangen-Nürnberg in April 1997. There are a number of reasons why these dictionaries are of special lexicographic interest: 1. the type of learners' dictionary associated notably with the name of Hornby can look back on a long tradition in British lexicography; 2. competition between various publishers since the late 70s has given crucial impetus to the development of these dictionaries; 3. these new dictionaries are decisively marked by the evaluation of large-scale computer corpora. Central to the volume is the in-depth comparison of four dictionaries published in 1995: OALD5, LDOCE3, COBUILD2, CIDE. The aim is to exemplify specific differences of approach in the four dictionaries from a wide range of viewpoints (definitions, information on valency and collocations, policy on usage examples, political correctness, etc.). A number of articles also enlarge on the history of learners' dictionaries of English, the significance of corpus linguistics for lexicography, and perspectives for the future, notably in connection with the electronic media.
