Lincoln Bowe, a Republican, has been missing for several days, setting off alarms on both sides of the political aisle. Finally, he is discovered in the remote Virginia woods, barb-wired to a tree, burned almost beyond recognition and missing his head. Democratic ‘research assistant’ (read: fixer) Jacob Winter, ex-Army Intelligence, wounded in Afghanistan, is called in by the Democratic president to unravel an extremely messy situation and shield his office from any hint of scandal. Flashman and the Angel of the Lord George MacDonald Fraser, 2013-07-02 “A jolly read.”—The Wall Street Journal The tenth installment in The Flashman Papers finds Captain Harry Flashman of Her Majesty's Secret Service in the antebellum South, where the irrepressible, globe-trotting Victorian becomes the target of blackmailing beauties. Evading danger, bedding women, and profiting from every opportunity, Flashman once again weasels his way into history, this time in John Brown's raid of Harper's Ferry, just before the Civil War. As a result of Flashy's leaching, lying, cheating, and stealing on

land, on sea, and on the rails, not only did John Brown become a martyr, Lincoln became president, and the nation plunged into a bloodbath.

Organic Waste Composting through Nexus Thinking Hiroshan Hettiarachchi, Serena Caucci, Kai Schwärzel, 2020-11-23 Organic waste composting is another excellent example to demonstrate the power and the benefits of nexus thinking. Even though organic waste composting itself is not a new topic, those who want to start a new project or align an ongoing project with nexus thinking, find it difficult to gather the necessary information. With nine case studies from four continents, this book aims to fill above gap in literature. While current literature on composting is often found to be limited to either soil/agriculture sector or waste management sector, this book presents a combined point of view. This open access book starts with an introductory chapter that describes the need to bring the waste management aspects and soil nutrient management aspects of compost production into one integrated theme. The relevance of nexus thinking and the Sustainable Development Goals (SDGs) are also presented in this introduction. The first three chapters after the introduction covers composting from the solid waste management and its policy aspects, taking examples from three developing

countries. The next three examples are mostly about the benefits composting can provide to the soil and agriculture. These examples are also from three developing countries, but with a mixture of urban as well as rural settings. Last three chapters present more insight into the latest developments taking examples from Europe, as well as new methods adapted from the traditional styles from Africa.

The State of the World's Biodiversity for Food and Agriculture Food and Agriculture Organization of the United Nations, 2019-03-12 The State of the World's Biodiversity for Food and Agriculture presents the first global assessment of biodiversity for food and agriculture worldwide. Biodiversity for food and agriculture is the diversity of plants, animals and micro-organisms at genetic, species and ecosystem levels, present in and around crop, livestock, forest and aquatic production systems. It is essential to the structure, functions and processes of these systems, to livelihoods and food security, and to the supply of a wide range of ecosystem services. It

has been managed or influenced by farmers, livestock keepers, forest dwellers, fish farmers and fisherfolk for hundreds of generations. Prepared through a participatory, country-driven process, the report draws on information from 91 country reports to provide a description of the roles and importance of biodiversity for food and agriculture, the drivers of change affecting it and its current status and trends. It describes the state of efforts to promote the sustainable use and conservation of biodiversity for food and agriculture, including through the development of supporting policies, legal frameworks, institutions and capacities. It concludes with a discussion of needs and challenges in the future management of biodiversity for food and agriculture. The report complements other global assessments prepared under the auspices of the Commission on Genetic Resources for Food and Agriculture, which have focused on the state of genetic resources within particular sectors of food and agriculture.

Night Moves Jonathan Kellerman, 2018-02-13 NEW YORK TIMES BESTSELLER • The master of the psychological thriller makes all the right moves in this new novel of spellbinding suspense. Even with all his years of experience, LAPD homicide detective Milo Sturgis knows there are crimes his skill and savvy cannot solve alone. That's when he calls on brilliant psychologist Alex Delaware to read between the lines, where the darkest motives lurk. And if ever the good doctor's insight is needed, it's at the scene of a murder as baffling as it is brutal. There's no spilled blood, no evidence of a struggle, and, thanks to the victim's missing face and hands, no immediate means of identification. And no telling why the disfigured corpse of a stranger has appeared in an upscale L.A. family's home. Chet Corvin, his wife, and their two teenage children are certain the John Doe is unknown to

them. Despite that, their cooperation seems guarded. And that's more than Milo and Alex can elicit from the Corvins' creepy next-door neighbor—a notorious cartoonist with a warped sense of humor and a seriously antisocial attitude. As the investigation ensues, it becomes clear that this well-to-do suburban enclave has its share of curious eyes, suspicious minds, and loose lips. And as Milo tightens the screws on potential persons of interest—and Alex tries to breach the barriers that guard their deepest secrets—a strangling web of corrupted love, cold-blooded greed, and shattered trust is exposed. Though the grass may be greener on these privileged streets, there's enough dirt below the surface to bury a multitude of sins. Including the deadliest. Praise for Night Moves “Exceptionally well-plotted . . . Newcomers will find this an easy entry point into this long-running series.”—Publishers Weekly (starred review) “A taut, procedural thriller . . . One of the most tightly plotted, tightly written of the Alex Delaware series . . . a real puzzler . . . Fans of the long-running Delaware series will be thrilled with this one, and because each book functions just fine as a stand-alone, there's nothing keeping new readers from diving in.”—Booklist “Jonathan Kellerman continues to amaze, dazzle, delight and entertain. . . . Night Moves is simply the best.”—Bookreporter

Deep Freeze John Sandford, 2018-09-25 Class reunions: a time for memories—good, bad, and, as Virgil Flowers is about to find out, deadly—in

this New York Times bestselling thriller from John Sandford. Virgil knows the town of Trippton, Minnesota, a little too well. A few years back, he investigated the corrupt—and as it turned out, homicidal—local school board, and now the town's back in view with more alarming news: A woman's been found dead, frozen in a block of ice. There's a possibility that it might be connected to a high school class of twenty years ago that has a mid-winter reunion coming up, and so, wrapping his coat a little tighter, Virgil begins to dig into twenty years' worth of traumas, feuds, and bad blood. In the process, one thing becomes increasingly clear to him. It's true what they say: High school is murder.

The Run Stuart Woods, 2009-10-13 A respected senator from Georgia, Will Lee has aspirations of more. But a cruel stroke of fate thrusts him onto the national stage well before he expects, and long before he's ready, for a national campaign. The road to the White House, however, will be more treacherous -- and deadly -- than Will and his intelligent, strikingly beautiful wife, Kate, an associate director in the Central Intelligence Agency, can imagine. A courageous and principled man, Will soon learns he has more than one opponent who wants him out of the race. Thrust into the spotlight as never before, he's become the target of clandestine enemies from the past who will use all their money and influence to stop him -- dead. Now Will isn't just running for president -- he's running for his life.

The International status of education about the Holocaust Carrier, Peter, Fuchs, Eckhardt, Messinger, Torben, Georg Eckert Institute for International Textbook Research (Germany), 2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.
