Video Surveillance C. William R. Webster, Eric Töpfer, Francisco Reto Klauser, Charles D. Raab, 2012 This book brings into focus the ways in which the implementation of cameras and systems, and their operation and technical features, are the product of decisions and policies made in a variety of contexts and by a variety of authorities and interested parties. It examines the cultural context in which cameras are deployed and explores how this context can shape their diffusion and use. The book places particular emphasis on studies of video surveillance in different national, institutional, cultural and linguistic settings. pIOS Press is an international science, technical and medical publisher of high-quality books for academics

Cameras in the Courtroom Marjorie Cohn, David Dow, 2002 Looking at the effects of both allowing and barring television coverage of legal proceedings, Cohn (the Thomas Jefferson School of Law) and Dow, a retired CBS News correspondent, examine landmark televised trials, including those of O. J. Simpson and William Kennedy Smith, and analyze the impact of CourtTV and the history of cameras in American courtrooms. Interviews with judges, attorneys, jurors, and legal scholars shed light on the subject. This paperback reprint features a new preface by the authors, on the effect of excluding television cameras from the trial of a September 11th terrorist. Camera Trapping Peter Fleming, Paul Meek, Guy Ballard, Peter Banks, Andrew Claridge, Jim Sanderson, Don Swann, 2014-11-20 Camera trapping in wildlife management and research is a growing global phenomenon. The technology is advancing very quickly, providing unique opportunities for collecting new biological knowledge. In order for fellow camera trap researchers and managers to share their knowledge and experience, the First International Camera Trapping Colloquium in Wildlife Management and Research was held in Sydney, Australia. Camera Trapping brings together papers from a selection of the presentations at the colloquium and provides a benchmark of the international developments and uses of camera traps for monitoring wildlife for research and management. Four major themes are presented: case studies demonstrating camera trapping for monitoring; the constraints and pitfalls of camera technologies; design standards and protocols for camera trapping surveys; and the identification, management and analyses of the myriad images that derive from camera trapping studies. The final chapter provides future directions for research using camera traps. Remarkable photographs are included, showing interesting, enlightening and entertaining images of animals 'doing their thing'.

Crime Scene Photography Edward M. Robinson, 2009-12-08 Crime Scene Photography, Second Edition, offers an introduction to the basic concepts of forensic picture-taking. The forensic photographer, or more specifically the crime scene photographer, must know how to create an acceptable image that is capable of withstanding challenges in court. The photographic theory and principles have to be well grounded in the physics of optics, the how-to recommendations have to work, and the end result must be admissible in court. Based on the author's years of experience in the field at both the Arlington County and Baltimore County Police Departments, this book blends the practical functions of crime scene processing with theories of photography to guide the student in acquiring the skills, knowledge, and ability to render reliable evidence. This text has been carefully constructed for ease of use and effectiveness in training and was class-tested by the author at George Washington University. Beginning August 2008, this book will be required reading by the IAI Crime Scene Certification Board for all levels of certification (through August 2011). Over 600 full color photographs Two new chapters on 'The History of Forensic Photography,' and 'Digital Image Processing of Evidentiary Photography' An essential reference for crime scene photography, including topics such as Composition, the Inverse Square Law, Court Cases affecting photography, Digital Image Processing, and Photogrammetry Required reading by the Crime Scene Certification Board of the International Association for Identification (IAI) for all levels of certification

A Very Silly Coffee Table Book Barry Pitt,2010-02

The Weaponized Camera in the Middle East Liat Berdugo,2021-01-14 Drawing on unprecedented access to the video archives of B'Tselem, an Israeli NGO that distributes cameras to Palestinians living in the West Bank, East Jerusalem, and the Gaza Strip, Liat Berdugo lays out an argument for a visual studies approach to videographic evidence in Israel/Palestine. Using video stills as core material, it discusses the politics of videographic evidence in Israel/Palestine by demonstrating that the conflict is one that has produced an inequality of visual rights. The book highlights visual surveillance and counter surveillance at the citizen level, how Palestinians originally filmed to "shoot back" at Israelis, who were armed with shooting power via weapons as the occupying force. It also traces how Israeli private citizens began filming back at Palestinians with their own cameras, including personal cell phone cameras, thus creating a simultaneous, echoing counter surveillance. Complicating the notion that visual evidence alone can secure justice, the *Weaponized Camera in The Middle East* asks how what is seen, but also who is seeing, affects how conflicts are visually recorded. Drawing on over 5,000 hours of footage, only a fraction of which is easily accessible to the public domain, this book offers a unique perspective on the strategies and battlegrounds of the Israel/Palestine conflict.

Video Ethnography David Redmon,2019-05-02 Video Ethnography provides a thought-provoking, guided framework to ethnographic filmmaking. It examines how this kind of filmmaking can be a means of approximating, mediating and evoking lived experience. Functioning as a kind of sensory extension of the

videographer, video ethnography arises directly out of lived experience as a process of dynamic encounters, mobile situations, and embodied approaches that include senses and choices of the videographer, and the participants of the ethnography. The book will help describe and develop students' sensibility and awareness of this crucial aspect of video ethnography, so they can craft their own video ethnographies with a fully conscious awareness of how certain skilled and attuned approaches to audiovisual techniques can help facilitate the fullest and most dynamic encounters possible. This book is suitable for classes in ethnographic filmmaking, video ethnography and visual anthropology / sociology.
