Camera Indica Christopher Pinney,2013-06-01 A wedding couple gazes resolutely at viewers from the wings of a butterfly; a portrait surrounded by rose petals commemorates a recently deceased boy. These quiet but moving images represent the changing role of photographic portraiture in India, a topic anthropologist Christopher Pinney explores in *Camera Indica*. Studying photographic practice in India, Pinney traces photography's various purposes and goals from colonial through postcolonial times. He identifies three key periods in Indian portraiture: the use of photography under British rule as a quantifiable instrument of measurement, the later role of portraiture in moral instruction, and the current visual popular culture and its effects on modes of picturing. Photographic culture thus becomes a mutable realm in which capturing likeness is only

part of the project. Lavishly illustrated, Pinney's account of the change from depiction to invention uncovers fascinating links between these evocative images and the society and history from which they emerge.

API Architecture Matthias Biehl, 2015-05-22 Looking for the big picture of building APIs? This book is for you! Building APIs that consumers love should certainly be the goal of any API initiative. However, it is easier said than done. It requires getting the architecture for your APIs right. This book equips you with both foundations and best practices for API architecture. This book is for you if you want to understand the big picture of API design and development, you want to define an API architecture, establish a platform for APIs or simply want to build APIs your consumers love. This book is NOT for you, if you are looking for a step-by step guide for building APIs, focusing on every detail of the correct application of REST principles. In this case I recommend the book API Design of the API-University Series. What is API architecture? Architecture spans the bigger picture of APIs and can be seen from several perspectives: API architecture may refer to the architecture of the complete solution consisting not only of the API itself, but also of an API client such as a mobile app and several other components. API solution architecture explains the components and their relations within the software solution. API architecture may refer to the technical architecture of the API platform. When building, running and exposing not only one, but several APIs, it becomes clear that certain building blocks of the API, runtime functionality and management functionality for the API need to be used over and over again. An API platform provides an infrastructure for developing, running and managing APIs. API architecture may refer to the architecture of the API portfolio. The API portfolio contains all APIs of the enterprise and needs to be managed like a product. API portfolio architecture analyzes the

functionality of the API and organizes, manages and reuses the APIs. API architecture may refer to the design decisions for a particular API proxy. To document the design decisions, API description languages are used. We explain the use of API description languages (RAML and Swagger) on many examples. This book covers all of the above perspectives on API architecture. However, to become useful, the architecture needs to be put into practice. This is why this book covers an API methodology for design and development. An API methodology provides practical guidelines for putting API architecture into practice. It explains how to develop an API architecture into an API that consumers love. A lot of the information on APIs is available on the web. Most of it is published by vendors of API products. I am always a bit suspicious of technical information pushed by product vendors. This book is different. In this book, a product-independent view on API architecture is presented. The API-University Series is a modular series of books on API-related topics. Each book focuses on a particular API topic, so you can select the topics within APIs, which are relevant for you.

'Photos of the Gods' Christopher Pinney, 2004 Chris Pinney demonstrates how printed images were pivotal to India's struggle for national and religious independence. He also provides a history of printing in India.

Shimmering Screens Jennifer Deger, 2006

The Soundscapes of Australia Fiona Richards, 2018-01-17

Australia offers tremendous scope for understanding the relationship between music, spirituality and landscape. This major, generously-illustrated new volume examines, in fifteen chapters, some of the ways in which composers and performers have attempted to convey a sense of the Australian landscape through musical means. The book embraces the different approaches of ethnomusicology, gender studies, musical analysis, performance studies and cultural history. Ranging across the country, from remote parts of the Northern Territory to the bustling east coast cities, from Tasmanian wilderness to tropical Queensland, the book includes references to art and literature as well as music. Issues of national identity, belonging and aboriginalization are an integral part of the book, with indigenous responses to place examined alongside music from the western orchestral, chamber and choral repertoires. The book provides valuable insight into a wide range of music inspired by Australia, from the Yanyuwa people to Jewish communities in Victoria; from Peter Sculthorpe's opera *Quiros* to the work of European expats living in Australia before the Second World War; from historic Ealing film scores to contemporary sound installations. The work of many significant composers is discussed in detail, among them Ross Edwards, Barry Conyngham, David Lumsdaine, Anne Boyd and Fritz Hart. Throughout the book there is a sense of the vibrancy and diversity of the music inspired by the sights and sounds of the Australian landscape.

Surface Giuliana Bruno, 2014-06-09 What is the place of

materiality—the expression or condition of physical substance—in our visual age of rapidly changing materials and media? How is it fashioned in the arts or manifested in virtual forms? In *Surface*, cultural critic and theorist Giuliana Bruno deftly explores these questions, seeking to understand materiality in the contemporary world. Arguing that materiality is not a question of the materials themselves but rather the substance of material relations, Bruno investigates the space of those relations, examining how they appear on the surface of different media—on film and video screens, in gallery installations, or on the skins of buildings and people. The object of visual studies, she contends, goes well beyond the image and engages the surface as a place of contact between people and art objects. As Bruno threads through these surface encounters, she unveils the fabrics of the visual—the textural qualities of works of art, whether manifested on canvas, wall, or screen. Illuminating the modern surface condition, she notes how façades are becoming virtual screens and the art of projection is reinvented on gallery walls. She traverses the light spaces of artists Robert Irwin, James Turrell, Tacita Dean, and Anthony McCall; touches on the textured surfaces of Isaac Julien’s and Wong Kar-wai’s filmic screens; and travels across the surface materiality in the architectural practices of Diller Scofidio + Renfro and Herzog & de Meuron to the art of Doris Salcedo and Rachel Whiteread, where the surface tension of media becomes concrete. In performing these critical operations on the surface, she articulates it as a site in which different forms of mediation, memory, and transformation can take place. Surveying object relations across art, architecture, fashion, design, film, and new media, *Surface* is a magisterial account of contemporary visual culture.

100 Days Drive Aaron Lauritsen, 2016-01-24 In the fall of 2013, while at a crossroads in life after a divorce, Aaron Lauritsen, did what many of us dream of doing but few ever will, he put his problems in the rearview mirror and headed out the door. After selling his business and all his possessions, he and his trusty K9 companion, Athena-bear, jumped in his Toyota pick-up truck, then ventured into the heart of North America for a road trip to end all road trips. Because he hoped that by getting lost out there he would somehow find himself again, he left without a plan or even a map, then for one hundred glorious days journeyed the continent carefree, via secondaries that were not only off the beaten track, but that were often all but forgot. On them he traversed some 30,000 zig-zagging miles through thirty eight of the lower forty eight states and seven of the ten Canadian provinces. And yielded

in the process an untold number of encounters weaved by confronting personal fears, history, worldly cities, eccentric people and adventurous activities. The real prize afforded by the time, distance and space however, was his spiritual awakening. Follow along as he paints that epic voyage of discovery and experience the same unexpected serendipity that awaited them around each bend of the open road.

The Persian Presence in the Islamic World Richard G. Hovannisian, Georges Sabagh, 1998-11-19 The thirteenth volume based on the Giorgio Levi Della Vida conference reassesses the role of the Iranian peoples in the development and consolidation of Islamic civilization. In his key essay, Ehsan Yarshater casts fresh light on that role challenging the view that, after reaching a climax in Baghdad in the ninth century, Islamic culture entered a period of decline. In fact, he maintains, a new and remarkably creative phase began in Khurasan and Transoxania, symbolized by the adoption of Persian as a medium of literary expression. By the mid-sixteenth century, Persian literary and intellectual paradigms had spread from Anatolia to India, encompassing the greater part of the Islamic world. Yarshater also challenges traditional assumptions about the 'Islamization of Persia'. In the essays which follow, six distinguished scholars consider the historical, cultural, and religious aspects of the Persian presence in the Islamic world.
