Song of Increase Jacqueline Freeman, 2016-09-01 The most joyful emanation produced by a colony of bees is known as the song of increase—declaring that the hive is flourishing and the bees are happy in its abundance. *Song of Increase* takes us inside the world of the honeybee to glean the wisdom of these fascinating creatures with whom humanity has shared a sacred bond for millennia. Within these pages is a bee-centric approach to living with honeybees, rather than advice for simply maximizing the products they provide. Jacqueline Freeman takes us beyond traditional beekeeping and offers a way to work in harmony with honeybees for both their good and ours. Our way is one of kind observation, she explains, where we create supportive homes and fields for bees to live in, as well as tend the heartfelt

relationships we form by being together. Song of Increase focuses on hidden aspects of apiculture that lead us naturally to more sustainable practices. Freeman illuminates the unity consciousness that guides every action in the colony and how this profound awareness can influence the way we see both the natural world and ourselves. Each chapter presents a wealth of information about the life of bees, including Freeman's personal insights and direct teachings received from the bees themselves. Contents Include: I. The Song of Unity: How Bees See Themselves, Their Colony, and the World II. The Song of Belonging: The Sacred Work of the Queen, Drones, Maidens, and Pips III. The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better.

Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.
