The text is on pages facing the plates for easy reference, and there are distribution maps for every species.

India-China Dialogues Beyond Borders Swati Mishra, Ranjana Sheel, 2024-01-26 This book is a collection of contributions related to India-China relationship beyond the issue of borders. It focuses on those elements that play important role in defining, continuing, and strengthening the interaction between the two countries. In doing so, it explores roles of language and linguistics, history and culture, politics and economy, and philosophy and sociology that mediated ancient and modern interfaces. The book observes the role of silk route in the economic, political, and scholarly exchanges between ancient civilizations and in the movement of Buddhism to China and other Asian nations. The contributors highlight how the two countries have co-existed in various eras and tackled issues of conflict and cooperation during lows and highs in the past and present. It pays special attention to the role of language and linguistic competence as an important component of socio-cultural comprehension of a society and introduces major innovations and challenges in teaching and learning the Chinese language. The wide-ranging contributions make the book an attractive resource for academics, think-tanks, diplomats, and researchers working on Asian/India-China studies across the globe.

*The Digitalization Conundrum in India* Keshab Das, Bhabani Shankar Prasad

Mishra, Madhabananda Das, 2021-03-01 This book examines the nature, extent and implications of rapid strides digitalization has made in India since the turn of the millennium. These have been examined not merely in the sphere of information and communication technology (ICT) but its multifarious applications spreading across almost all aspects of production, services and institutions which have profound repercussions for the transformation of the society and economy at the micro, meso and macro levels. With contributions from both ICT scholars and social scientists, this book presents diverse scenarios and unravels challenges faced in the process of technical applications, access by the users of these disruptive technologies (automation, e-commerce, big data analytics & algorithms, artificial intelligence, cloud computing, etc.) which, unlike heavy machines (embodied technology), mostly defy physical space, pace of mobility and inoperability between technologies. Chapters in this volume address challenges and possibilities in establishing and operating intricate engineering infrastructure, technical and societal constraints encountered in broad-basing digitalization across layers of educational and social skills conducive to difficult geographies. Issues dealt within this book include farming, healthcare, education, food processing, e-commerce, labour, rural community development, open source data and information democracy. The chapters also reflect upon implications on local economy and society, of the very global nature of these seamless technologies where inter-operability remains the quintessential advantage of digitalization whether promoted or spearheaded through the state, private sector or global capital. The book critiques policy inadequacies and suggests plausible policy approaches to reduce the adverse impacts of fast digitalization and broad-base potential benefits across space and levels of socio-economic development of regions and society. This book would be of interest to scholars, practitioners, technocrats, industry analysts, policy makers and civil society agencies.

**India Connected** Ravi Agrawal, 2018-10-01 Former chief CNN India correspondent and award-winning journalist Ravi Agrawal takes readers on a journey across the Subcontinent, through its remote rural villages and its massive metropolises, seeking out the nexuses of change created by smartphones, and with them connection to the internet. As always with India, the numbers are staggering: in 2000, 20 million Indians had access to the internet; by 2017, 465 million were online, with three Indians discovering the internet every second. By 2020, India's online community is projected to exceed 700 million, and more than a billion Indians are expected to be online by 2025. In the course of a single generation, access to the internet has progressed from dial-up connections on PCs, to broadband access, wireless, and now 4G data on phones. The rise of low-cost smartphones and cheap data plans has meant the country leapfrogged the baby steps their Western counterparts took toward digital fluency. The results can be felt in every sphere of life, upending traditions and customs and challenging conventions. Nothing is untouched, from arranged marriages to social status to business start-ups, as smartphones move the entire economy from cash-based to credit-based. Access to the internet is affecting the progress of progress itself. As Agrawal shows, while they offer immediate and sometimes mind-altering access to so much for so many, smartphones create no immediate utopia in a culture still driven by poverty, a caste system, gender inequality, illiteracy, and income disparity. Internet access has provided greater opportunities to women and changed the way in which India's many illiterate poor can interact with the world, but it has also meant that pornography has become more readily available. Under a government keen to control content, it has created tensions. And in a climate of hypernationalism, it has fomented violence and even terrorism. The influence of smartphones on the world's largest democracy is nonetheless pervasive and irreversible, and *India Connected* reveals both its dimensions and its

implications.

*Indian Journalism in a New Era* Shakuntala Rao, 2018-12-24 In the ever-changing information environment of the early twenty-first century, citizens and journalists alike are eagerly adapting to new technologies, and India is no different. The country's communication revolution in the post-liberalization era has led to one of the largest media markets in the world. Further, changes in media ownerships and the blending of news with opinions have impacted established practices of reporting. Given the breadth and scope of India's media, there is little meaningful literature available about journalism practised in the country today. *Indian Journalism in a New Era* brings together informative and critical contributions about contemporary Indian journalism from twenty-one Indian and global scholars and journalists. The book is divided into four different sections, each addressing one relevant aspect: history and evolving changes; social media and e-journalism; marginalization; and pedagogy, ethics, and public sphere. The contributors address issues like changes in journalism practices, socio-economic conditions of the Indian state, and minority politics. Holistically, the volume focuses on the ways to approach and analyse the enormity and scope in Indian journalism, media technology, and global relations.

The Indian Media Economy (2-volume set) Adrian Athique, Vibodh Parthasarathi, S.V. Srinivas, 2017-12-29 The twenty-first century has witnessed the rise of India as a major media producer and consumer market increasingly engaged with the global economy. Aided by rising incomes, technological remediation, regulatory strategies, and a shifting political terrain, the business of media has been given official recognition as a substantive component of India's economy and as a prominent feature of its economic thinking. In light of these developments, these two pioneering volumes investigate the dynamics of an increasingly integrated media economy

encompassing television, film, music, sport, and telecoms. Volume 1: Industrial Dynamics and Cultural Adaptation illustrates the distinctive industrial dynamics of India's media economy, tracking the deeply embedded cultural, political, and economic forces that determine its everyday operation. The selection of essays serves to demonstrate the unique patterns of development and the complex field of exchanges that have constituted India's media economy. As a whole, this volume posits a comprehensive approach to understanding the nature of media resources, the negotiation of industrial norms and the cultural context of a media economy firmly situated in the realities of India's distinct regions, cultures, and human networks. Volume 2: Market Dynamics and Social Transactions provides a comprehensive analysis of the interlocking markets that constitute the media economy, focusing upon its particular commodity forms, labour conditions, and spaces of consumption. Taking account of a rich set of case studies, this volume argues for the necessary consideration of multiple and interdependent markets in explicating our everyday encounters with media. By foregrounding the social transactions that encapsulate market exchanges, it begins to illustrate some of the novel aspirations, meanings, and relationships arising with India's media economy.

Apps Gerard Goggin, 2021-05-20 Since the rise of the smartphone, apps have become entrenched in billions of users' daily lives. Accessible across phones and tablets, watches and wearables, connected cars, sensors, and cities, they are an inescapable feature of our current culture. In this book, Gerard Goggin provides a comprehensive and authoritative guide to the development of apps as a digital media technology. Covering the technological, social, cultural, and policy dynamics of apps, Goggin ultimately considers what a post-app world might look like. He argues that apps represent a pivotal moment in the development of digital media, acting as a hinge between the visions and realities of the "mobile," "cyber," and "online" societies envisaged since the late 1980s and the imaginaries and materialities of the digital societies that emerged from 2010. Apps offer frames, construct tools, and constitute "small worlds" for users to reorient themselves in digital media settings. This fascinating book will reframe the conversation about the software that underwrites our digital worlds. It is essential reading for students and scholars of media and communication, as well as for anyone interested in this ubiquitous technology.

**The WhatsApp India Story** Sunetra Sen Narayan, Shalini Narayanan, 2024-02-13 WhatsApp is used by over half a billion people in India today in all fields - in business, corporate and informal sectors, in government, for education and among friends, families and acquaintances. This book critically explores the social messaging app's rapid expansion in India and its growing influence and looks at whether, as a form of horizontal communication, it poses a challenge to more traditional structures of communication. The book examines WhatsApp's spread in the personal and professional lives of Indians and the myriad ways in which people in India are using the app in social and business interactions, including among people living with disabilities. Using case studies, interviews, surveys and in-depth research, it analyses key aspects of WhatsApp's massive popularity and its impact on how people communicate. It also explores its impact on the psycho-social dynamics in India, including the dissemination of fake news and politically motivated content, and the consequent need for media regulation in the country. One of the first books to analyse the pervasiveness of WhatsApp and social media apps in different areas of Indian society, this book will be of interest to scholars and students of media studies, communication studies, digital media, cultural studies, cyberculture studies, sociology and social policy and media law.

**Open and Distance Non-formal Education in Developing Countries** Colin Latchem, 2018-01-29 This book is the first comprehensive account of developments in open and distance non-formal education in developing countries for over more than 20 years. It includes many

instructive and inspiring examples of how international agencies such as UNESCO, FAO, WHO, UNICEF, USAID and the Commonwealth of Learning and national providers are using radio, TV, online and mobile learning, telecentres and other means to achieve the Education for All, Millennium Development and Sustainable Development Goals. It describes the educational needs of the world's most disadvantaged, vulnerable and least formally educated children, youth and adult populations, including the disabled, refugees and prisoners. It also reports on the successes, outcomes, constraints and shortcomings of using open and distance methods and technology to deliver literacy and numeracy programmes, equivalency, 'second chance' or alternative schooling, life skills and rural community development programmes and income generation and vocational training outside the framework of the formal education system. It concludes with suggestions for the extension and improvement of such lifelong learning. Designed to encourage further research and development in these capacity-building practices outside the established formal system, this is a must-read for all policy-makers, managers, educators, students and researchers interested in non-formal education for individuals, families and communities in the developing world.

**Modern India** John McLeod, 2019-11-15 This one-volume thematic encyclopedia examines life in contemporary India, with topical sections focusing on geography, history, government and politics, economy, social classes and ethnicity, religion, food, etiquette, literature and drama, and more. *Modern Indian*, an addition to the *Understanding Modern Nations* series, is an in-depth and interdisciplinary encyclopedia. Innovative Pest Management Approaches for the 21st Century Akshay Kumar Chakravathy,2020-03-20 Several Integrated Pest Management (IPM) approaches are available for managing pests of varied kinds, including individual and integrated methods for pest suppression. Recently the focus has shifted to pest management tools that act on insect systems selectively, are compatible with the environment, and are not harmful for ecosystems. Other approaches target specific biochemical and physiological aspects of insect metabolism, and involve biotechnological and genetic manipulation. Still other approaches include the use of nanotechnology, endophytes, optical and sonic manipulation to detect and control pest insects. Unfortunately, conventional forms of pest management do not focus on technology transfer to the ground level workers and farmers. As a result, farmers are incurring huge losses of crops and revenues. This book highlights the importance of using communication tools in pest management and demonstrates some success

stories of utilizing automated unmanned technologies in this context. The content is divided into three sections, the first of which, “Pest Population Monitoring: Modern Tools,” covers long and short-range pest population monitoring techniques and tools such as satellites, unmanned aerial vehicles/drones, remote sensing, digital tools like GIS, GPS for mapping, lidar, mobile apps, software systems, artificial diet designs and functional diversity of info-chemicals. The second section of the book is devoted to “Emerging Areas in Pest Management” and offers a glimpse of diversified tactics that have been developed to contain and suppress pest populations such as endophytes, insect vectors of phytoplasma, Hymenopterans parasitoids, mass production and utilization of NPV etc. In turn, the third section focuses on “Integrated Pest Management” and presents farming situations that illustrate how research in diversified aspects has helped to find solutions to specific pest problems, and how some new and evolving tactics can be practically implemented. Given its scope, the book offers a valuable asset for entomology and plant pathology researchers, students of zoology and plant protection, and readers whose work involves agriculture, horticulture, forestry and other ecosystems.
