**Television in India** Nalin Mehta, 2008-06-03 This book examines the development of television in India since the early 1990s, and its implications for Indian society more widely. Until 1991, India possessed only a single state-owned television channel, but since then there has been a rapid expansion in independent satellite channels which came as a complete break from the statist control of the past. This book explores this transformation, explaining how television, a medium that developed in the industrial West, was adapted to suit Indian conditions, and in turn has altered Indian social practices, making possible new ways of imagining identities, conducting politics and engaging with the state. In particular, satellite television initially came to India as the representative of global capitalism but it was appropriated by Indian entrepreneurs and producers who Indianized it. Considering the full gamut of Indian television - from national networks in English and Hindi to the state of regional language networks - this book elucidates the transformative impact of television on a range of important social practices, including politics and democracy, sport and identity formation, cinema and popular culture. Overall, it shows how the story of television in India is also the story of India's encounter with the forces of globalisation.

India On Television Nalin Mehta, 2009-01-27 'Excellent...an incisive and much needed study of how television is changing India.' - Rajdeep Sardesai, Managing Editor, CNN-IBN and IBN-7 More than fifty 24-hour news networks, operating in eleven different languages, emerged in India between 1992 and 2006. This book traces the evolution of satellite television and how it effected major changes in political culture, the state, and expressions of Indian nationhood. Explaining how television, a medium that developed in the industrial West, was adapted to suit Indian conditions, the book focuses specifically on the emergence of satellite news channels. It shows how live television used new forms of technology to plug into existing nodes of communication, which in turn led to the creation of a new visual language - national, regional and local - that altered politics and forms of identity formation in significant ways. Satellite television came to India as the representative of global capitalism in the early 1990s and crushed the governmental monopoly over broadcasting that had existed since independence. As such, the story of satellite news is also the story of India's encounter with the forces of globalisation. 'Accumulated with an insider's knowledge...a genuine contribution to the literature, bringing together valuable material that deserves a wide audience.' - Prof. Arvind Rajagopal, author of Politics After Television.

Spectacle and Diversity Lee Artz, 2021-12-30 This book shows how transnational media operate in the contemporary world and what their impact is on film, television, and the larger global culture. Where a company is based geographically no longer determines its outreach or output. As media consolidate and partner across national and cultural boundaries, global culture evolves. The new transnational media industry is universal in its operation, function, and social impact. It reflects a shared transnational culture of consumerism, authoritarianism, cultural diversity, and spectacle. From Wolf Warriors and Sanju to Valerian: City of 1000 Planets and Pokémon, new media combinations challenge old assumptions about cultural imperialism and reflect cross-boundary collaboration as well as boundary-breaking cultural interpretation. Intended for students of global studies and international communication at all levels, the book will appeal to a wide range of readers interested in the way transnational

media work and how that shapes our culture.

Media Discourse in Contemporary India Sudeshna Devi, 2022-06-24 This book examines the historical trajectory of the growth of the television news and critically analyzes the role of private television news in framing the nature of public discourse in contemporary India. Set in the context of a transformed media landscape, the book attempts to understand and analyze the role of two private national news channels, NDTV 24x7 and Aaj Tak, in producing mediatized narratives that offer a commentary on the various social, political, cultural, religious and economic issues in the public domain. This is achieved by critically examining the process and techniques of production, representation and consumption of current affairs programs such as studio debates, panel discussions, audience talk shows and documentaries aired on both the channels. Highlighting some of the key trends that impinge on the structure and mode of operation of television news media in contemporary India, the book offers a simultaneous examination of how the production, representation and consumption of the mediatized discourses shape the nature of public discourse and have social-political ramifications for the functioning of Indian democracy. The book will be of interest to researchers in sociology, media and communication studies, popular culture and South Asian Studies.

*The Media Globe* Lee Artz, Yahya R. Kamalipour, 2007 In *The Media Globe*, a diverse group of scholars follows emerging patterns in media beyond the United States, identifying the issues and the potential impacts on democratic communication. The authors assess the current tensions between global media practices and cultural norms, further considering alternatives in global communication that could better integrate with these norms and practices. Given the rapid global consolidation of media and the reform of its regulatory agencies, this reassessment is a timely read.

*Indian Silver Screen* Dr. Paramveer Singh, 2021-08-05 Indian Silver Screen Television in India has been a medium of entertainment as well as social and economic awareness. It was started under government control as a medium of social awareness, but now this medium has become an industry. There was a time when Doordarshan was the only channel on television in India, but today, hundreds of channels broadcast programs day and night. In India today, there are many channels based on sports, news, film, documentary, and music. There was a time when television programs could be viewed only through television sets, but today, through devices such as computers, laptops, and mobiles, viewers can watch their favorite programs at their convenient location, and time. The main objective of this book written on Indian television is to make students aware of the history and status of Indian television. The book begins with the story of the introduction of television in various countries. It describes the development of television in Britain, America, Australia, China, Africa, and other countries of the continent of Asia. After this, the early experiments, projects, and history and current status of television in India are told. Many of the chapters in the book are about the major television business groups in India that have deep penetration into the Indian television industry. The book also introduces programs that have become famous in India, which have proved to be milestones in Indian television history and reached heights of popularity. Apart

from this, the book describes the laws of India which have been implemented to control the television industry. A chapter in the book is written about various television broadcasting techniques practiced in the country. Apart from this, there is a chapter about Direct to Home, which tells the story of the development of DTH in India. Television rating points determine the popularity of television channels and programs. The book introduces various agencies and institutions that determine TRP in India. In addition to this, the history of television journalism in India has also been discussed. A chapter about television journalism in various languages of India such as Hindi, Punjabi, Gujarati, Marathi, Tamil, Telugu, Kannada, Malayalam, Bengali, and Assamese is described in detail. The last chapter of the book discusses various international television channels that are broadcasting in India.

*Indian Journalism in a New Era* Shakuntala Rao, 2018-12-24 In the ever-changing information environment of the early twenty-first century, citizens and journalists alike are eagerly adapting to new technologies, and India is no different. The country's communication revolution in the post-liberalization era has led to one of the largest media markets in the world. Further, changes in media ownerships and the blending of news with opinions have impacted established practices of reporting. Given the breadth and scope of India's media, there is little meaningful literature available about journalism practised in the country today. *Indian Journalism in a New Era* brings together informative and critical contributions about contemporary Indian journalism from twenty-one Indian and global scholars and journalists. The book is divided into four different sections, each addressing one relevant aspect: history and evolving changes; social media and e-journalism; marginalization; and pedagogy, ethics, and public sphere. The contributors address issues like changes in journalism practices, socio-economic conditions of the Indian state, and minority politics. Holistically, the volume focuses on the ways to approach and analyse the enormity and scope in Indian journalism, media technology, and global relations.
