Biocontamination Control for Pharmaceuticals and Healthcare

Tim Sandle, 2018-11-30 Biocontamination Control for

Pharmaceuticals and Healthcare outlines a biocontamination strategy that tracks bio-burden control and reduction at each

transition in classified areas of a facility. This key part of

controlling risk escalation can lead to the contamination of

medicinal products, hence necessary tracking precautions are

essential. Regulatory authorities have challenged pharmaceutical

companies, healthcare providers, and those in manufacturing

practice to adopt a holistic approach to contamination control.

New technologies are needed to introduce barriers between

personnel and the environment, and to provide a rapid and more

accurate assessment of risk. This book offers guidance on

building a complete biocontamination strategy. Provides the

information necessary for a facility to build a complete

biocontamination strategy Helps facilities understand the main

biocontamination risks to medicinal products Assists the reader in

navigating regulatory requirements Provides insight into

developing an environmental monitoring program Covers the

types of rapid microbiological monitoring methods now available,

as well as current legislation
