**Physical Layer Multi-Core Prototyping** Maxime Pelcat,Slaheddine  
Aridhi,Jonathan Piat,Jean-François Nezan,2012-08-11 Base stations developed  
according to the 3GPP Long Term Evolution (LTE) standard require  
unprecedented processing power. 3GPP LTE enables data rates beyond hundreds  
of Mbits/s by using advanced technologies, necessitating a highly complex LTE  
physical layer. The operating power of base stations is a significant cost  
for operators, and is currently optimized using state-of-the-art hardware  
solutions, such as heterogeneous distributed systems. The traditional system  
design method of porting algorithms to heterogeneous distributed systems  
based on test-and-refine methods is a manual, thus time-expensive, task.  
Physical Layer Multi-Core Prototyping: A Dataflow-Based Approach provides a

clear introduction to the 3GPP LTE physical layer and to dataflow-based prototyping and programming. The difficulties in the process of 3GPP LTE physical layer porting are outlined, with particular focus on automatic partitioning and scheduling, load balancing and computation latency reduction, specifically in systems based on heterogeneous multi-core Digital Signal Processors. Multi-core prototyping methods based on algorithm dataflow modeling and architecture system-level modeling are assessed with the goal of automating and optimizing algorithm porting. With its analysis of physical layer processing and proposals of parallel programming methods, which include automatic partitioning and scheduling, Physical Layer Multi-Core Prototyping: A Dataflow-Based Approach is a key resource for researchers and students. This study of LTE algorithms which require dynamic or static assignment and dynamic or static scheduling, allows readers to reassess and expand their knowledge of this vital component of LTE base station design.

**The Technology of Text** David H. Jonassen, 1982 Abstract: Techniques for designing and developing text materials are described and elaborated for text development technologists. This book focuses on 2 broad categories of techniques for structuring textual materials, termed implicit (e.g.: discourse analysis, elaboration theory) and explicit (e.g.: algorithms, tables, diagrams) techniques. Implicit techniques are concerned with the structure of the content and sequencing of the message; explicit techniques display the structure of the message. The 4 sections of the book address;

implicit communication techniques; explicit textual design; specific design problems; and how individuals differentially interact with text materials, ranging from printed matter to television projections. (wz).

*Multifunctional Systems for Combined Delivery, Biosensing and Diagnostics*  
Alexandru Mihai Grumezescu, 2017-05-03 Multifunctional Systems for Combined Delivery, Biosensing, and Diagnostics explores how multifunctional nanocarriers are being used in combined delivery and diagnostics in contemporary medicine. Particular attention is given to efforts to i) reduce the side effects of therapeutic agents, ii) increase the pharmacological effect, and iii) improve aqueous solubility and chemical stability of different therapeutic agents. The chapters focus on applications of nanostructured materials and nanocarriers, highlighting how these can be used effectively in both diagnosis and delivery. This applied focus makes the book an important reference source for those wanting to learn more about how specific nanomaterials and nanotechnology systems can help to solve drug delivery and diagnostics problems. This book is a valuable resource for materials scientists, bioengineers, and medical researchers who are looking for an applications-oriented guide on how nanotechnology and nanomaterials can be used effectively throughout the medical treatment process, from diagnosis to treatment. Explores the benefits of using a variety of nanomaterials as drug delivery agents Explains how nanocarriers can reduce

the side effects of therapeutic agents Provides an analysis of the pros and cons of using specific nanocarriers to solve particular diagnosis and delivery problems

Aimms Optimization Modeling Johannes Bisschop,2006 The AIMMS Optimization Modeling book provides not only an introduction to modeling but also a suite of worked examples. It is aimed at users who are new to modeling and those who have limited modeling experience. Both the basic concepts of optimization modeling and more advanced modeling techniques are discussed. The Optimization Modeling book is AIMMS version independent.

*Biofilm Associated Antimicrobial Resistance and Its Recovery* Dibyajit Lahiri, Moupriya Nag, Rina Rani Ray, Sougata Ghosh, 2023-12-01 A biofilm is a collection of microbial cells that have adhered to biotic surfaces such as plant cuticles or animal epithelia, as well as abiotic surfaces such as rocky substratum or catheter exteriors. The life cycle of a microorganism includes the fundamental process of biofilm formation for survival in diverse and harsh environments since it is a protected mode of growth allowing colonisation of new habitats by dispersal of microbes from the microbial clusters. The biofilm bound microorganisms remain embedded in an extracellular polymeric matrix that protects the indwelling cells from surfactants, biocides, several invaders like protozoans, and defences offered by the hosts like phagocytic cells. The biofilm bound recalcitrant microbes induce chronic and nosocomial diseases, posing a serious threat to public health. It has been observed that various antimicrobial drugs are able to successfully remove the planktonic (freely suspended) states of microbes as compared to the sessile (substrate-bound) forms, thus resulting in the development of antimicrobial resistance. Modern pharmacological strategies targeting the biofilm matrix differ from the conventional methods of

antibiotic usage. This includes the use of natural compounds such as plant bioactive molecules, antimicrobial peptides, green synthesised nanoparticles, or secondary metabolites from other organisms that not only prevent the rise of antimicrobial resistance but are also safe for the host tissues. *Biofilm Associated Antimicrobial Resistance and Its Recovery* provides a detailed and systematic review of alternative pharmacological developments in the field of biofilm research. Features: A narrative overview of the mechanism of biofilm formation and its role in the emergence of antimicrobial resistance. Recent research in the development of antibiofilm remedies involving biogenic compounds. Advancements in biofilm detection methodologies with cutting-edge technologies. This book serves as a resource for researchers who need to understand and analyze the progression of events during microbial biofilm formation, as well as design safer methodologies for its successful eradication. It may also be used as a textbook for a graduate level course in microbiology or microbial biotechnology.

Entrepreneurship for Deprived Communities Nikolai Mouraviev, Alex Avramenko, 2020-04-09 Using case studies and research-based narratives to investigate the barriers facing developing enterprises in deprived communities, this book provides a toolkit for small business professionals and local authorities to revitalise a community-centered enterprise culture

and reinvigorate disadvantaged groups.

*Molecular Detection of Human Bacterial Pathogens* Dongyou Liu, 2011-04-18 As more original molecular protocols and subsequent modifications are described in the literature, it has become difficult for those not directly involved in the development of these protocols to know which are most appropriate to adopt for accurate identification of bacterial pathogens. *Molecular Detection of Human Bacterial Pathogens* addresses this issue, with international scientists in respective bacterial pathogen research and diagnosis providing expert summaries on current diagnostic approaches for major human bacterial pathogens. Each chapter consists of a brief review on the classification, epidemiology, clinical features, and diagnosis of an important pathogenic bacterial genus, an outline of clinical sample collection and preparation procedures, a selection of representative stepwise molecular protocols, and a discussion on further research requirements relating to improved diagnosis. This book represents a reliable and convenient reference on molecular detection and identification of major human bacterial pathogens; an indispensable tool for upcoming and experienced medical, veterinary, and industrial laboratory scientists engaged in bacterial characterization; and an essential textbook for undergraduate and graduate students in microbiology.

**Microbial Biofilms** Mahmoud Ghannoum, Matthew Parsek, Marvin Whiteley, Pranab K. Mukherjee, 2015-10-01 An examination of the research and translational

application to prevent and treat biofilm-associated diseases In the decade since the first edition of Microbial Biofilms was published, the interest in this field has expanded, spurring breakthrough research that has advanced the treatment of biofilm-associated diseases. This second edition takes the reader on an exciting, extensive review of bacterial and fungal biofilms, ranging from basic molecular interactions to innovative therapies, with particular emphasis on the division of labor in biofilms, new approaches to combat the threat of microbial biofilms, and how biofilms evade the host defense. Chapters written by established investigators cover recent findings, and contributions from investigators new to the field provide unique and fresh insights. Specifically, Microbial Biofilms provides state-of-the-art research in the field of bacterial and fungal biofilms detailed descriptions of the in vitro and in vivo models available to evaluate microbial biofilms future areas of research and their translational and clinical applications Microbial Biofilms is a useful reference for researchers and clinicians. It will also provide insight in the dynamic field of microbial biofilms for graduate and postgraduate students.

**Multicomponent Polymeric Materials** Gennady E. Zaikov, Nodar G. Lekishvili, Yurii J.
