Getting Started on the Internet Irene Krechowicka,1999 This guide aims to give people the essential skills they need to get maximum benefit from the Internet. Written in jargon-free language, it should be useful for those unfamiliar with the communications revolution that the Internet embodies.

On the Internet Hubert L. Dreyfus,2002 Internet is een van de eerste boeken waarin het filosofische inzicht -van Plato tot Kierkegaard - betrokken wordt op het debat over de mogelijkheden en onmogelijkheden van het internet. Dreyfus laat zien dat de onstoffelijke, 'vrij zwevende' websurfer zijn oorsprong vindt in Descartes' scheiding van geest en lichaam, en hoe Kierkegaards inzichten in de opkomst van het moderne leespubliek vooruitlopen op de nieuwsgierige, maar elk risico vermijdende internet-junkie. Uitgaande van recente onderzoeken naar het isolement dat veel internetgebruikers ervaren, toont Dreyfus aan hoe het internet, door zijn nadruk op privé-ervaringen, gebruikers berooft van wezenlijke, belichaamde vermogens zoals vertrouwen, stemmingen en betrokkenheid bij met anderen gedeelde lokale aangelegenheden. Internet is verplichte kost voor iedereen die on line is en is geïnteresseerd in onze plaats in de 'e-revolutie'.

Sequencing Apple's DNA Patrick Corsi,Dominique Morin,2016-01-19 This book aims to extract the molecular genes leading to craziness! Geniuses are the ones who are crazy enough to think they can change the world and boldly go where no one has gone before. Where no past habit and usage are available, there is no proof of viability, as nobody has done it yet, or even imagined it, and no roadmap for guidance or market study has come up with it. The authors call upon Leonardo Da Vinci, the Renaissance genius, who as strange as it seems, shared many traits of personality with that of Steve Jobs, in terms of the ways of performing. Da Vinci helps in understanding Jobs, and hence Apple, with his unique way of designing radically novel concepts, which were actually quite crazy for his time. In order to shed light on a special creative posture, the indomitable sense of specifying undecidable objects – a hallmark of the late Steve Jobs – is what led the authors to match it with a specific design innovation theory. A real theory, backed by solid mathematical proof, exists and can account for the business virtue of a prolific ability to move into unknown crazy fields! The authors postulate that, by bringing the power of C-K theory to crack open a number of previous observations made about Apple’s methods, it is possible to identify most of the genes of this company. The authors analyze how and why an Apple way of doing business is radically different from standard business practices and why it is so successful. Genes are a measure of the entity at hand and can encourage past business education routine approaches, then become transferable across the spectrum of the socio-economic world.

Information Worlds Paul T. Jaeger,Gary Burnett,2010-04-05 The authors present a multi-level theory of Information Worlds to investigate the ways in which information creates the social worlds of people. Building upon the foundational works of Library and Information Studies (LIS) scholar and theorist Elfreda Chatman and philosopher Jurgen Habermas, as well as from theory and research from a wide range of other fields, the theory of information worlds can serve as a theoretical driver both in LIS studies and across other disciplines that study information issues, enriching and expanding our understanding of the multi-layered role of information in society. Testing their theory through application to a variety of real-world issues, Burnett and Jaeger tackle the topics of libraries and information provision, the value assigned to information by differing social groups, information access and exchange, international information policies, the role of information in democracy, and technological change. Information Worlds provides a framework for empirical investigations into the fascinating and very real social dimensions of information.

Comprehensive Approach as "Sine Qua Non" for Critical Infrastructure Protection D. Čaleta,S. Radosevic,2014-12-16 The world in which we live is becoming ever more complex, both from the viewpoint of ensuring security, and also because of our level of dependence on technology, as represented by so-called critical infrastructure. Despite the efforts of national security entities in the national and international context, terrorist attacks will probably never be completely preventable. This makes it necessary to prepare the functioning of our systems for the occurrence of a terrorist attack so that they will operate quickly and effectively even in this type of crisis. This book presents the papers delivered at the NATO Advanced Research Workshop: Managing Terrorism Threats to Critical Infrastructure – Challenges for South Eastern Europe, held in Belgrade, Serbia in May 2014. The book is divided into five sections: strategic environment and critical infrastructure protection; information security and counterterrorism considerations; terrorist threats to critical infrastructure operation – environmental aspects; energy security as a key factor of critical infrastructure protection; and national approaches to critical infrastructure protection. The book highlights the main dilemmas and challenges of managing terrorist threats in the region of South Eastern Europe, and will be of interest to all those whose work involves protecting critical infrastructure from the threat of terrorist attack.

Technical, Business, and Legal Dimensions of Protecting Children from Pornography on the Internet Institute of Medicine,National Research Council,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee to Study Tools and Strategies for Protecting Kids from Pornography and Their Applicability to Other Inappropriate Internet Content,2002-04-29 In response to a mandate from Congress in conjunction with the Protection of Children from Sexual Predators Act of 1998, the Computer Science and Telecommunications Board (CSTB) and the Board on Children, Youth, and Families of the National Research Council (NRC) and the Institute of Medicine established the Committee to Study Tools and Strategies for Protecting Kids from Pornography and Their Applicability to Other Inappropriate Internet Content. To collect input and to disseminate useful information to the nation on this question, the committee held two public workshops. On December 13, 2000, in Washington, D.C., the committee convened a workshop to focus on nontechnical strategies that could be effective in a broad range of settings (e.g., home, school, libraries) in which young people might be online. This workshop brought together researchers, educators, policy makers, and other key stakeholders to consider and discuss these approaches and to identify some of the benefits and limitations of various nontechnical strategies. The December workshop is summarized in Nontechnical Strategies to Reduce Children's Exposure to Inappropriate Material on the Internet: Summary of a Workshop. The second workshop was held on March 7, 2001, in Redwood City, California. This second workshop focused on some of the technical, business, and legal factors that affect how one might choose to protect kids from pornography on the Internet. The present report provides, in the form of edited transcripts, the presentations at that workshop.
