Legal Knowledge Representation: Automatic Text Analysis in Public International and European Law

Erich Schweighofer, 1999-10-19 This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science. A new method of automatic analysis of legal texts is presented in four case studies. Law is seen as an information system with legally formalised information processes. The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step: conceptual indexing and automatic analysis of texts. Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems. The concept-based model for semi-automatic analysis of legal texts provides this necessary connection. The knowledge base of descriptors, context-sensitive rules and meta-rules formalises properly all important passages in the text corpora for automatic analysis. Statistics and self-organising maps give assistance in knowledge acquisition. The result of the analysis is organised with automatically generated hypertext links. Four case studies show the huge potential but also some drawbacks of this approach.

Cases, Materials and Text on National, Supranational and International Non-Discrimination Law Dagmar Schiek, Lisa Waddington, Mark Bell, Tufyal Choudhury, Olivier De Schutter, Janneke

Gerards, Aileen McColgan KC, Gay Moon, 2007-08-31

This casebook, the result of the collaborative efforts of a panel of experts from various EU Member States, is the latest in the Ius Commune Casebook series developed at the Universities of Maastricht and Leuven. The book provides a comprehensive and skilfully designed resource for students, practitioners, researchers, public officials, NGOs, consumer organisations and the judiciary. In common with earlier books in the series, this casebook presents cases and other materials (legislative materials, international and European materials, excerpts from books or articles). As non-discrimination law is a comparatively new subject, the chapters search for and develop the concepts of discrimination law on the basis of a wide variety of young and often still emerging case law and legislation. The result is a comprehensive textbook with materials from a wide variety of EU Member States. The book is entirely in English (i.e. materials are translated where not available in English). At the end of each chapter a comparative overview ties the material together, with emphasis, where appropriate, on existing or emerging general principles in the legal systems within Europe. The book illustrates the distinct relationship between international, European and national legislation in the field of non-discrimination law. It covers the grounds of discrimination addressed in the Racial Equality and Employment Equality Directives, as well as non-discrimination law relating to gender. In so doing, it covers the law of a large number of EU Member States, alongside

some international comparisons. The Ius Commune Casebook on Non-Discrimination Law - provides practitioners with ready access to primary and secondary legal material needed to assist them in crafting test case strategies. - provides the judiciary with the tools needed to respond sensitively to such cases. - provides material for teaching non-discrimination law to law and other students. - provides a basis for ongoing research on non-discrimination law. - provides an up-to-date overview of the implementation of the Directives and of the state of the law. This Casebook is the result of a project which has been supported by a grant from the European Commission's Anti-Discrimination Programme. See the detailed website for this book: www.casebooks.eu/nonDiscrimination/.

Technology Management Norma Harrison, Danny Samson, 2002 A broad and diverse perspective is presented from various industries throughout the world. This approach provides students better understanding of key success factors for implementation of technology projects. Students see first-hand how to implement technological change by examining the processes, routines, organizational structure, cultural and leadership factors that relate to introducing and implementing successful new technology. authorship, the cases were written by leading experts from top institutions around the world including USA, UK, Germany, Japan, Korea, Australia and Canada.--Pub. desc.

Strategic International Management Dirk Morschett, Hanna Schramm-Klein, Joachim Zentes, 2011-01-19 "Strategic International Management" takes a global perspective and covers the major aspects of international business strategies, the coordination of international companies and the particularities of international value chain activities and management functions. The book provides a thorough understanding of how Production & Sourcing, Research & Development, Marketing, Human Resource Management and Controlling have to be designed in an international company and what models are available to understand those activities in an international context. The book offers 20 lessons that provide a comprehensive overview of all key issues. Each lesson is accompanied by a case study from an international company to facilitate the understanding of all important factors involved in strategic international management.

International Management Paul W. Beamish, 2000 This text focuses on how firms become and remain international in scope, and tells of their experiences as they come to grips with an increasingly competitive global environment. It is about the practice of management when a home-market perspective is not enough to achieve and sustain success.

Basic Texts in International Relations Evan Luard, 2016-07-27 This text combines passages from

major writers on international relations over the ages, together with a brief commentary on each. The collection is divided into three main sections - the individual, the state and the society of states - the three main alternative ways of conceiving the subject.

INTERNATIONAL BUSINESS SANJAY MISRA,P. K.

YADAV,2009-01-30 Today, with the pervasive impact of globalization and liberalization sweeping across the globe, exerting its influence on both the developed and the developing nations, business is no more confined to the national borders of a country. More and more companies are spreading their business to markets abroad (for example, Tata Consultancy Services and Infosys Technologies spreading their business to USA and elsewhere) or acquiring new companies (for instance, Tata acquiring the Corus and the Land Rover and Jaguar, or reversely, Vodafone acquiring Hutch).

International business, therefore, has become such an important area of study for students of management and commerce. This comprehensive and easy-to-read text tries to lay bare the ramifications and complexities of international business. Divided into six sections, the book provides a harmonious blend of concepts and applications of international business. What distinguishes the text is the emphasis it lays on the Indian cases and the Indian scenario through the provision of many cases and illustrative examples. However, the book goes beyond the Indian context by giving international cases, thus imbuing the text with a global business flavour.

Key Features □ The case studies discussed include

the cases such as Tata Motors, Hindustan Unilever, Ranbaxy, McDonald, Nokia, Microsoft and Walt Disney. □ The opening case in each chapter introduces the students to a real-life example, followed by the text which provides the theoretical knowledge on the subject. The concluding case study correlates the theoretical knowledge with the real-life situation. □ Review questions are cited after every case study to check students' comprehension of the subject. Primarily intended as a text for undergraduate and postgraduate students of Business Administration, MBA, MIB and postgraduate students of Commerce, the book would be of great value also to practising managers.

Strategic Retail Management Joachim Zentes,Dirk Morschett,Hanna Schramm-Klein,2016-10-07 This book

is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.
