Take Control of Apple TV Josh Centers, 2014 Everything you need to know about the Apple TV! The Apple TV may be the smallest component of a home entertainment system, but its size is in stark contrast to the vast quantity of content that it can bring to life through your television. With it, you can consider cutting the cord to your cable company -- and ditching that expensive monthly bill! And with the advice in **Take Control of Apple TV**, you can go far beyond watching movies and TV shows to make the Apple TV into the hub of your stereo system, display gorgeous slideshows of your photos, and play iPhone and iPad games on the big screen. Written by TidBITS managing editor Josh

Centers, the ebook walks new owners through setup, and then dives into explaining how to best control the Apple TV with the included remote, Apple's Remote app, or another TV remote. You'll learn to customize the icon grid on the main screen, enable parental controls, and make your screen saver look awesome. Josh also covers uses of AirPlay, the Apple technology that lets you beam audio and video from an iPhone, iPad, or Mac to the Apple TV, and lets the Apple TV send audio to compatible speakers anywhere in your home. When it comes to content, you'll tour the Apple TV's built-in video apps -- iTunes Store, Netflix, Hulu, HBO Go, PBS, YouTube, and more -- plus get ideas for which are likely to offer what you want to watch. But you're not restricted to commercial video -- Josh explains how you can best view home movies and any DVDs or Blu-ray discs you own, listen to your music or iTunes Radio, use Home Sharing to display your photos via the Apple TV, and discover iOS games designed for playing via the Apple TV. If you're feeling geeky, you can read about how to make Plex bring in even more video content, including free access to Comedy Central's The Daily Show and The Colbert Report. Finally, the Apple TV isn't just about entertainment. Thanks to AirPlay, it makes a great device for giving presentations from a Mac, iPhone, or iPad using Keynote; it's the perfect accompaniment for a road warrior heading into unfamiliar conference rooms. Josh gives you all the details, including a list of what you'll need to handle any hardware you may encounter. In Take Control of Apple TV you'll read about:

- The one-button press for jumping immediately to the main menu
- Hiding unwanted Apple TV apps that clutter your main screen

Mastering Apple TV 4K Adidas Wilson , When you hear Apple TV you immediately think it is an actual TV that you are purchasing. But this is not the case. The Apple TV is actually a device that you will use to stream something a little similar to Amazon's Fire or Roku. It is a little black box that is about an inch and a half tall, just a little bit less than four inches, and it runs on a very similar platform to the iPad and the popular iPhones. You can download a list of apps and also games beyond the standard streaming video that you could get from Hulu, Netflix, Amazon, just to name a few. The Apple TV has been centered on various apps, and it is still able to stream multiple TV

shows, movies straight to your HDTV, but this is just the tip of the iceberg on the features this box has been packed with. The box allows you to watch and stream podcasts, play your favorite game, stream your workout playlist, and much more. But what is important to note, to enjoy all these benefits this box is ready to provide it will all depend on the apps that you have installed. Some of the apps you will use are free, and some will cost. Think of it this way; the Apple TV is able to turn your TV into a Smart TV. You can either rent your favorite movies or merely stream your collection from your iTunes account. You could also stream movie shows from apps like Hulu Plus or Netflix; stream your music from the Pandora or Apple Music apps. I mean the list is endless on what the Apple TV can actually do for you. The Apple TV 4K has been designed with some of the fastest processors you could find, the same that powers the iPad Pro. The Apple TV box has been made to be as powerful as most laptops we use. It also has a fast graphics processor that has been designed with enough power that could turn the black box into a game console. Nothing sounds better than this. Apple has genuinely revamped the new generation, but this does not mean you have to throw away your older model, just the same thing they have been doing with iPhone. The third generation is still available in the market for you to purchase.
