Decolonization of e-Government Research and Practice Kelvin J. Bwalya, 2018-12-01 With the rapid increase in the implementation of e-Government in Africa and across the world, the need to investigate the key bottlenecks (issues) caused by the failure of a large number of e-Government projects cannot be ignored. The main purpose of this book is to contribute to the current scholarly and intellectual discourse on different aspects of e-Government such as understanding the critical issues in design, implementation and monitoring. This book specifically intends to bring out contextual issues that hugely impact on the probability for e-Government failure or success. It also differentiates itself by carefully exploring the issue of context-awareness (informed by the local context) for e-Government design and implementation, which has not been pursued in any publication in e-Government before, although it has been used in other information computational contexts. Therefore, the many theses within this book are concerned with e-Government design approaches, implementation policies and requirements, and monitoring dimensions need to be informed by the contextual characteristics in which they are implemented. This book contributes to the body of knowledge by presenting an in-depth analysis of a case of e-Government implementation. Therefore, this book has its facts backed by intermittent reference to an empirical study done in Zambia to accentuate issues in design, adoption, usage and monitoring of e-Government projects. The case articulates the methodological issues in the design and measurement of e-Government. The use of a combination of structural equation modelling (SEM), exploratory factor analysis (EFA) and advanced techniques such as principal component analysis (PCA) in investigating different aspects of e-Government in a developing country context has not been done in any previous research. The novel methodological nuances articulated in this book can go a long way toward understanding the factors explaining successful implementation of e-Government. Previous publications have used basic statistical approaches devoid of adequate scientific or statistical rigour such as descriptive statistics to arrive at factors influencing the success or failure of e-Government. Furthermore, this book contributes to the body of knowledge by emphasising the different dimensions and issues of the multidimensional perspectives of e-Government. The book explores tangible pointers for design and implementation of e-Government, giving it the thrust to potentially guide actual implementation of e-Government in African setups.

Redesigning Organizations Denise Feldner, 2019-12-11 This book offers readers a deeper understanding of the Cyberspace, of how institutions and industries are reinventing themselves, helping them excel in the transition to a fully digitally connected global economy. Though technology plays a key part in this regard, societal acceptance is the most important underlying condition, as it

poses pressing challenges that cut across companies, developers, governments and workers. The book explores the challenges and opportunities involved, current and potential future concepts, critical reflections and best practices. It addresses connected societies, new opportunities for governments, the role of trust in digital networks, and future education networks. In turn, a number of representative case studies demonstrate the current state of development in practice.

Toward ICT-enabled Co-production for Effective Crisis and Emergency Response Elina Ramsell, 2020-12-29 In contemporary society, public services struggle to maintain a high quality of service if the authority responsible for the service delivery experiences resource deficit and increased uncertainties and vulnerabilities. This thesis explores how information and communication technology (ICT) can enable new types of network collaborations - co-production - between government (municipalities) and citizens, for a more effective crisis and emergency response. This is explored in the light of digitalization and taking an end-user perspective. The thesis's first objective is to describe the transformation toward ICT-enabled co-production. The second objective is to identify opportunities and challenges involved in ICT-enabled co-production. The thesis's method includes two case studies supported by various theories and approaches: network collaboration (including co-production), sociotechnical systems, and end-user involvement. The data collection is conducted using semi-structured interviews, focus groups, user participation techniques, and document reviews. The intended audience is practitioners (local government and national agencies) and researchers within crisis and emergency response, information systems (IS), and public administration research disciplines and domains (e.g. co-production). The description of the transformation toward ICT-enabled coproduction in crisis and emergency response is a result in its own right. Here, the citizen volunteers become involved in the actual delivery of the response, despite non-specific competence and non-organizational affiliation. In relation to the transformation toward co-production, the thesis concludes that digitalization facilitates end-user involvement in the ICT development process and increases their influence. If open systems as mobile technologies are used, end-users can adapt the technology on their own and add technologies, without the support of the formal developer or local government. The thesis also identifies opportunities and challenges of ICT-enabled co-production. Examples of opportunities include citizen volunteers having a high degree of engagement, being an effective complement to professional responders, and increasing perceived safety in the community. This informal structure of co-production enabled by ICT minimizes the need for local governments to spend resources on managing collaboration. Examples of challenges include the lack of organizational affiliation of volunteers (e.g. integration of citizen

volunteers, i.e. end-users with non-organizational affiliation in the technology of the ICT system) and aspects of formal and social control (regulation, and moral and privacy issues). The thesis's contributions include enriched knowledge of essential aspects to consider when developing ICT-enabled co-production with an end-user perspective, and an understanding of the transformation of the application domain over time and the implications of ICT-enabled coproduction. This makes it easier to comprehend and develop contemporary and future co-productions. The thesis is perceived to have high originality and value since it studies time periods in which local government, technology, and crisis and emergency response have undergone dramatic changes, and explores one of the first Swedish empirical initiatives involving citizen volunteers as responders. Avhandlingen undersöker hur informations- och kommunikationsteknik (IKT) kan möjliggöra nya typer av nätverkssamverkan - co-production - mellan offentliga aktörer (kommuner i detta fall) och frivilliga civila medborgare för att på så sätt få en mer effektiv hantering av kriser och olyckor. Detta görs med bakgrund av minskade resurser i offentlig service, ökad digitalisering, och med fokus på slutanvändare som inte tillhör en formell organisation. Avhandlingen beskriver förändringen till IKT-möjliggjord co-production där frivilliga medborgare larmas ut trots avsaknad av specifik kompetens för uppdraget och organisatorisk tillhörighet. Avhandlingen identifierar även möjligheter och utmaningar när kommuner co-producerar med frivilliga medborgare. Möjligheter inkluderar t ex högt engagemang från frivilliga medborgare och att de är ett effektivt komplement till de professionella aktörerna. Utmaningar innefattar t ex svårigheter med IKT integration av slutanvändare utan organisatorisk tillhörighet, samt legala och etiska oklarheter. Avhandlingen bidrar med kunskap om viktiga aspekter att beakta när IKT-möjliggjord co-production utvecklas, för att på så sätt underlätta förståelse och utveckling av framtida co-productions. Avhandlingen har hög originalitet och värde då den undersöker två tidsperioder där lokal offentlig sektor, digital teknik och hantering av kriser och olyckor har genomgått dramatiska förändringar, samt undersöker ett av de första svenska initiativen där civila medborgare larmas ut som första insatspersoner.

The History and Uncertain Future of Handwriting Anne Trubek, 2016-09-06 The future of handwriting is anything but certain. Its history, however, shows how much it has affected culture and civilization for millennia. In the digital age of instant communication, handwriting is less necessary than ever before, and indeed fewer and fewer schoolchildren are being taught how to write in cursive. Signatures--far from John Hancock's elegant model--have become scrawls. In her recent and widely discussed and debated essays, Anne Trubek argues that the decline and even elimination of handwriting from daily life does not signal a decline in civilization, but rather the next stage in the evolution of communication. Now, in *The History and Uncertain Future of Handwriting*, Trubek uncovers the long and significant impact handwriting has had on culture and humanity--from the first recorded handwriting on the clay tablets of the Sumerians some four thousand years ago and the invention of the alphabet as we know it, to the rising value of handwritten

manuscripts today. Each innovation over the millennia has threatened existing standards and entrenched interests: Indeed, in ancient Athens, Socrates and his followers decried the very use of handwriting, claiming memory would be destroyed; while Gutenberg's printing press ultimately overturned the livelihood of the monks who created books in the pre-printing era. And yet new methods of writing and communication have always appeared. Establishing a novel link between our deep past and emerging future, Anne Trubek offers a colorful lens through which to view our shared social experience.

The Missing Ink Philip Hensher, 2012-11-27 When Philip Hensher realized that he didn't know what a close friend's handwriting looked like (bold or crabbed, sloping or upright, italic or rounded, elegant or slapdash), he felt that something essential was missing from their friendship. It dawned on him that having abandoned pen and paper for keyboards, we have lost one of the ways by which we come to recognize and know another person. People have written by hand for thousands of years— how, Hensher wondered, have they learned this skill, and what part has it played in their lives? *The Missing Ink* tells the story of this endangered art. Hensher introduces us to the nineteenth-century handwriting evangelists who traveled across America to convert the masses to the moral worth of copperplate script; he examines the role handwriting plays in the novels of Charles Dickens; he investigates the claims made by the practitioners of graphology that penmanship can reveal personality. But this is also a celebration of the physical act of writing: the treasured fountain pens, chewable ballpoints, and personal embellishments that we stand to lose. Hensher pays tribute to the warmth and personality of the handwritten love note, postcards sent home, and daily diary entries. With the teaching of handwriting now required in only five states and many expert typists barely able to hold a pen, the future of handwriting is in jeopardy. Or is it? Hugely entertaining, witty, and thought-provoking, *The Missing Ink* will inspire readers to pick up a pen and write.

State Formation in Early Modern England, C.1550-1700 Michael J. Braddick,2000-12-07 This book examines the development of the English state during the long seventeenth century, emphasising the impersonal forces which shape the uses of political power, rather than the purposeful actions of individuals or groups. It is a study of state formation rather than of state building. The author's approach does not however rule out the possibility of discerning patterns in the development of the state, and a coherent account emerges which offers some alternative answers to relatively well-established questions. In particular, it is argued that the development of the state in this period was shaped in important ways by social interests - particularly those of class, gender and age. It is also argued that this period saw significant changes in the form and functioning of the state which were, in some sense, modernising. The book therefore offers a narrative of the development of the state in the aftermath of revisionism.

Homage to Catalonia George Orwell,2023-11-27 Homage to Catalonia is George Orwell's personal account of his experiences and observations fighting for the POUM militia of the Republican army during the Spanish Civil War. The war was one of the defining events of his political outlook and a significant part of what led him to write in 1946, Every line of serious work that I have written since 1936 has been written, directly or indirectly, against totalitarianism and for Democratic Socialism, as I understand it. The first edition was published in the United Kingdom in 1938. The book was not published in the United States until February 1952, when it appeared with an influential preface by Lionel Trilling. The only translation published in Orwell's lifetime was into Italian, in December 1948. A French translation by Yvonne Davet-with whom Orwell corresponded, commenting on her translation and providing explanatory notes-in 1938-39, was not published until five years after Orwell's death. Book Summary: Orwell served as a private, a corporal (cabo) and-when the informal command structure of the militia gave way to a conventional hierarchy in May 1937-as a lieutenant, on a provisional basis, in Catalonia and Aragon from December 1936 until June 1937. In June 1937, the leftist political party with whose militia he served (the POUM, the Workers' Party of Marxist Unification, an anti-Stalinist communist party) was

declared an illegal organisation, and Orwell was consequently forced to flee. Having arrived in Barcelona on 26 December 1936, Orwell told John McNair, the Independent Labour Party's (ILP) representative there, that he had come to Spain to join the militia to fight against Fascism. He also told McNair that he would like to write about the situation and endeavour to stir working class opinion in Britain and France. McNair took him to the POUM barracks, where Orwell immediately enlisted. Orwell did not know that two months before he arrived in Spain, the [Soviet law enforcement agency] NKVD's resident in Spain, Aleksandr Orlov, had assured NKVD Headquarters, 'the Trotskyist organisation POUM can easily be liquidated'-by those, the Communists, whom Orwell took to be allies in the fight against Franco.

The Smart City - how smart can 'IT' be? Malin Granath, 2016-08-30 Cities are facing many challenges; challenges linked to world-wide trends like urbanisation, climate changes and globalisation. In parallel to these trends, we have seen a rapid digitalisation in and of different parts of society. Cities and local governments have been appointed an important role in overcoming these world-wide challenges, and subsequently, in policy practices digitalisation is perceived as an important dimension in delivering better and sustainable services to its citizens. As a result, the smart city has emerged as a concept and approach to contemporary urban planning and development. There is still no common understanding of the concept and what components and dimensions it covers. However, in all definitions digitalisation constitutes one dimension, but the role and function of it is still not clear. In this study I have examined how different stakeholders talk about digitalisation in policy and planning practices of urban development. The aim has been to identify and analyse different repertoires of discourses on digitalisation to advance our knowledge on how goals related to the smart city and digitalisation are put into practice. The results are based on a qualitative and interpretative case study with a social constructionist approach. An analytical framework based on discourse analysis, stakeholder theory and (new) institutional theory has been constructed to analyse the case. Main results show that repertoires on digitalisation are limited in both policy and planning of urban development. In these practices, digitalisation is primarily seen as a means or as a communication infrastructure in relation to two city services/functions; i.e. services related to governance and to environment. Results also show that practices of urban planning and development are institutionalised, where different stakeholders' salience and stakes in urban development and in digitalisation differ, but it is clear that digitalisation is a secondary issue. Implications of these results are that the taken-for-granted discourses in policy and planning practices of urban development limit both practice and research when developing a smart city. Städer står inför många utmaningar kopplat till världsomspännande trender såsom urbanisering, klimatförändringar, och globalisering. Parallellt med dessa trender har vi sett en snabb digitalisering i och av olika delar av samhället. I detta sammanhang har städer och kommuner blivit tilldelade en viktig roll i hanteringen av dessa utmaningar. På policynivå ses digitalisering som en viktig dimension för att leverera hållbar och bättre service till medborgarna. Som ett led i detta har smarta städer vuxit fram som både begrepp och metod för

stadsplanering och stadsutveckling. Det finns dock ingen gemensam tolkning av begreppet. Däremot finns digitalisering med som en dimension i definitionerna, men vilken roll och funktion den har är fortfarande oklart. I denna studie har jag undersökt hur olika intressenter talar om digitalisering i olika policy- och planeringspraktiker kopplat till stadsutveckling. Syftet har varit att identifiera och analysera repertoarer av digitaliseringsdiskurser för att bidra med kunskap om hur mål kopplade till smarta städer och digitalisering omsätts i praktiken. Resultaten är baserade på en kvalitativ och tolkande fallstudie med en socialkonstruktionistisk ansats. Ett analytiskt ramverk baserat på diskursanalys, intressentanalys, och nyinstitutionell teori har tagits fram för att analysera fallet. Resultaten visar att digitaliseringsrepertoarer är begränsade både i policy och i planering av stadsutveckling. I dessa praktiker ses digitalisering främst som ett verktyg eller en kommunikationsinfrastruktur i relation till två samhällsfunktioner, nämligen funktioner kopplade till styrning och administration, och funktioner kopplade till miljö. Resultaten visar också att praktiker kopplade till stadsplanering och stadsutveckling är institutionaliserade, praktiker där olika intressenter har olika makt, legitimitet och angelägenhet gällande stadsutveckling och digitalisering. Det är dock tydligt att digitalisering är en sekundär fråga. Implikationerna av dessa resultat är att de förgivettagna diskurserna begränsar både praktiken och forskningen i utvecklingen av smart städer.

Locust Girl Merlinda Bobis, 2015 This novel is a fairytale, a political allegory, and a philosophical interrogation of the human heart. Most everything has dried up: water, the womb, even the love among lovers. The earth is now mostly desert, except the last green haven behind the border where the carers of the earth preserve the natural order. Carers manage the earth's last resources and keep the wasters out. But in the vast dry outside, hunger is the pernicious plague, and people feed on sand and locusts. So they walk the dry to cross the border. But once, terrible fires crossed it too and devastated the green haven. Since then, carers have been evermore vigilant and afraid. One night, a village is bombed for seeking to walk to the border. Only two survive: nine-year old Amedea and a locust buried in her brow. This is the story of the Locust Girl. This is her lovesong -- for those walking to the border for dear life, and those guarding the border for dear life.

When Owen Merrick is lured into the witch's wood, one of her tree-siren daughters, Seren, saves his life instead of ending it. Every night, he climbs over the garden wall to see her, and every night her longing to become human deepens. But a shift in the stars foretells a dangerous curse, and Seren's quest to become human will lead them into an ancient war raging between the witch and the king who is trying to stop her.
