**Managing iOS Devices with OS X Lion Server** Arek Dreyer, 2011-08-19 Learn how to use Profile Manager, a feature included in OS X Lion Server, to configure and remotely manage iOS devices (including iPad, iPhone, and iPod touch) and Macs running Lion. With this eBook, you will learn how to use Profile Manager's web-based tools to configure user settings for services such as Mail, Calendar, VPN, and Wi-Fi; define passcode settings to prevent unauthorized access to data stored on your users' devices; and remotely wipe devices if they go missing. The Profile Manager uses the Apple Push Notification Service (APNS), so you can immediately push configuration changes to your devices, as long as they have some kind of network connectivity. Why do all the work yourself? Show your users how easy it is for them to use the self-service web portal to download and install the configuration profiles you've carefully crafted for them, and how to remotely lock or wipe their own devices without your intervention. This eBook includes the knowledge you need to configure your Lion Server to be an Open Directory master, use an appropriate SSL certificate, provide Profile Manager services, and perform basic troubleshooting.

**Managing Apple Devices** Arek Dreyer, Kevin M. White, 2015-05-05 Managing Apple Devices, Second Edition will enable you to create an effective plan for deploying and maintaining groups of Apple devices using iOS 8 and OS X Yosemite in your organization. This all-in-one resource teaches a wide variety of Apple management technologies; explains the theory behind the tools; and provides practical, hand-on exercises to get you up and running with the tools. You will be introduced to Apple management technologies including Mobile Device Management, the Volume Purchase Program, and the Device Enrollment Program. For example, not only will you learn how to use Profile Manager—Apple's implementation of Mobile Device Management—but you will also learn about the ideas behind profile management and how to make configuration easier for both administrators and users while maintaining a highly secure environment. The exercises contained within this guide are designed to let you explore and learn the tools provided by Apple for deploying and managing iOS 8 and OS X Yosemite systems. They start with verification of access to necessary services, move on to the configuration of those services, and finally test the results of those services on client devices. Each lesson builds on previous topics and is designed to give technical coordinators and system administrators the skills, tools, and knowledge to deploy and maintain Apple devices by:

- Providing knowledge of how Apple deployment technologies work
- Showing how to use specific deployment tools
- Explaining deployment procedures and best practices
- Offering practical exercises step-by-step solutions available
