Studying the Qur'an in the Muslim Academy Majid Daneshgar, 2020-01-30 Studying the Qur'an in the Muslim Academy examines what it is like to study and teach the Qur'an at academic institutions in the Muslim world, and how politics affect scholarly interpretations of the text. Guided by the author's own journey as a student, university lecturer, and researcher in Iran, Malaysia, and New Zealand, this book provides vivid accounts of the complex academic politics he encountered. Majid Daneshgar describes the selective translation and editing of Edward Said's classic work *Orientalism* into various Islamic languages, and the way Said's work is weaponized to question the credibility of contemporary Western-produced scholarship in Islamic studies. Daneshgar also examines networks of journals, research centers, and universities in both Sunni and Shia contexts, and looks at examples of Quranic interpretation there. Ultimately, he offers a constructive program for enriching Islamic studies by fusing the best of Western theories with the best philological practices developed in Muslim academic contexts, aimed at encouraging respectful but critical engagement with the Qur'an.

Education and Muslim Identity During a Time of Tension Melanie Brooks, 2018-09-03 *Education and Muslim Identity During a Time of Tension* explores life inside an Islamic Center and school in present-day America. Melanie Brooks' work draws on in-depth discussions with community and school leaders, teachers, parents and students to present thoughtful and contemporary perspectives on many issues central to American-Muslim identities. Particularly poignant are the children's voices, as they discuss their developing identities and how they navigate the choice of being American, Muslim, or both. The book covers topics ranging from establishing the community and the considerations involved, the management of diversity within the community, and approaches to modern opinions on and experiences of gender and extremism in the western world. Based on focus groups, interviews and observations collected over a two-year period, this book serves as a fascinating and informative insight into the culture and experiences of modern American Muslims. This is essential reading for students and researchers interested in education, religion, politics, sociology, and most particularly in contemporary Islamic studies.

Islam and Freedom of Human Will Muhammad Tahir ul- Qadri,

Treasures in the Sunnah 3 Zaghlul El-Naggar, The Noble Sunnah constitutes the second source of Islamic Law and the link between the different generations of the Muslim Ummah on one side and between them and the Prophet (PBUH) on the other. There is no room for doubt concerning the antecedence of the Glorious Qur'an and the Sunnah in referring to a number of scientific facts and secrets. This reference came in a precise, concise, scientific language that makes it thoroughly proficient for Da'wah especially in this modern age of technological and scientific progress.

The Glory of Iqbal Abul Hasan Ali Nadwi, 2022-03-13 Iqbal's poems established him as a rising poet on the literary horizon of the subcontinent. His brilliance later dazzled the eyes of people living in distant countries and won for him an honourable place amongst the immortal poets of the world. It was after his return from Europe that he started his real poetic career. His transitory period was over. His ideas had matured and he had formulated his outlook on human aspects, which lasted throughout his life. *Asraari-Khudi* (Secrets of Self) and *Rumuzi-Bekhudi* (Mysteries of Selflessness) thrilled the literary circles of the East and the West. These poems deliver the message he has for mankind and deal with the development of the individual self and the problems an individual faces as a member of society.

Blaming Islam John R. Bowen,2012-03-02 Why fears about Muslim integration into Western society—propagated opportunistically by some on the right—misread history and misunderstand multiculturalism. In the United States and in Europe, politicians, activists, and even some scholars argue that Islam is incompatible with Western values and that we put ourselves at risk if we believe that Muslim immigrants can integrate into our society. Norway's Anders Behring Breivik took this argument to its extreme and murderous conclusion in July 2011. Meanwhile in the United States, state legislatures' efforts to ban the practice of Islamic law, or sharia, are gathering steam—despite a notable lack of evidence that sharia poses any real threat. In *Blaming Islam*, John Bowen uncovers the myths about Islam and Muslim integration into Western society, with a focus on the histories, policy, and rhetoric associated with Muslim immigration in Europe, the British experiment with sharia law for Muslim domestic disputes, and the claims of European and American writers that Islam threatens the West. Most important, he shows how exaggerated fears about Muslims misread history, misunderstand multiculturalism's aims, and reveal the opportunism of right wing parties who draw populist support by blaming Islam.

Bilal Ibn Rabah Shahada Sharelle Haqq,2020 The early days of Islam were very difficult for Muslims who gathered around Prophet Muhammad, peace be upon him. Slaves who embraced Islam were the ones who suffered most. Bilal was one spectacular hero from among them who rose to become a free believer and became the first muezzin to call Muslims to prayer.
