Exit Path: How to Win the Startup End Game Touraj Parang, 2022-08-02 An exit strategy, if implemented early, is the surprising secret to ultimate startup success. Find out why—and how to develop one—in this comprehensive, practical guide from veteran Silicon Valley dealmaker Touraj Parang. In 2008, Touraj Parang's award-winning startup, Jaxtr, had 10 million users, raised nearly \$20 million from top-tier Silicon Valley investors, and seemed poised to sail straight through the Great Recession. But, by January of 2009, Jaxtr's only hope for survival was to find a buyer—sadly, it was too late for that. In Exit Path, Touraj draws on the lessons learned from that chaotic experience and the extraordinary successes that followed once he (and the entrepreneurs he advises) made creating and executing an exit strategy a top priority. For too long entrepreneurs have been failing to establish the requisite relationships and properly prepare for the most important milestone in their life cycle: a sale to an acquirer. But in today's hyper competitive and interconnected business world, that is no longer an option. In this first-of-its-kind, comprehensive guide, you'll discover the surprising reasons few startups succeed while many fail—and you'll learn that implementing an exit strategy early will empower you to take charge of your startup's ultimate fate, maximizing its potential for success while mitigating the risks of failure. Arranged in four sequential parts, Exit Path walks you through actionable steps to devise and execute an effective exit strategy, starting with a fresh new perspective on the critical importance of creating a viable sale option for your startup. You'll learn why creating your exit strategy is necessary well before you're contemplating an exit, regardless of the stage of your startup. You'll also discover how to create your own exit plan, how to make your plan a reality through personal and business relationships, and how to approach and negotiate with acquirers for an outcome best aligned with your values and ambitions should the need arise. Whether you are an entrepreneur, investor, or advisor, the expert advice and insights in Exit Path will inspire you to take charge of your startup's destiny and unlock its strategic potential and options over time.

Disruptive Business Alexander Manu, 2016-05-23 Disruptive Business is a provocative and insightful redefinition of innovation as an outcome of human behaviour, a dynamic in constant change requiring the shaping of new responses in business and the economy. Alexander Manu believes that organizations must treat innovation not as a process to be managed but as an outcome that changes people's lives. In Disruptive Business he explains how innovation is the moment when human behaviour is changed by a particular invention, discovery or event. This position challenges the current understanding of innovation, as well as the current ecology in which innovation operates in organizations: its management, methods, tools, language, focus and metrics. The challenge extends to some of the labels currently applied to innovation typologies, such as 'disruptive innovation', seen today as addressing purely the technological side of an invention, rather than the more complex motivational and behavioural side. Alexander Manu considers that a disruption is not manifest in the moment a new technology is introduced. The disruption is the human being and manifest only when human motivation embraces the technology and uses it to modify and improve everyday life. Our acceptance and appropriation of new technologies creates the business disruption. Manu makes the case that successful innovation outcomes are answers to conscious or subconscious goals residing in human motivation, and motivation starts in desire. This position is consistent with the history of innovations that have changed, improved and reshaped human life, and also consistent with their roots and ethos. Humans are a 'perpetually wanting animal', bound to desire, to seek media for a better self and to need innovation. In this dynamic, innovation is the constant and business is the variable. The role of business is to create the tools, objects and services through which people can manifest what they want and who they are. The book provides a new perspective of current behavioural disruptions which are relevant to the continuity of business, as well as a set of practical methodologies for business design, aimed at creating innovation outcomes of value to users.

Selected Papers Of K C Chou Chou Kuang-chao, 2009-05-12 Professor Kuang-Chao Chou (also known as Guang-Zhao Zhou) is the former President of Chinese Academy of Sciences. He has been elected as the Academician of Chinese Academy of Sciences, Foreign Associate of the US National Academy of Sciences, Fellow of the Third World Academy of Science, Foreign Member of Soviet (Russian) Academy of Sciences, Czechoslovak Academy of Sciences, Bulgarian Academy of Sciences, Romania Academy of Sciences, Mongolian Academy of Sciences, the European Academy of Arts, Sciences and Humanities, Membre fondateur Academie Francophone d'Ingenieurs. He also served as the director of Institute of Theoretical Physics at the Chinese Academy of Sciences, the Dean of the Science School of Tsinghua University, the Chairman of the China Association for Sciences and Technology, the President of Pacific Science Association, Vice President of Third World Academy of Sciences. "Zhou is a first rate physicist: broad, powerful and very quick in grasping new ideas. His style of doing physics reminds me of that of Landau, Salam, and of Teller." C N Yang "His published papers have won uniformly high praises by the international scientific community and his articles are always written with depth and elegance." T D Lee This volume presents a collection of selected papers written by Prof Chou. The papers are organized into four parts according to the subject of research areas and the language of publishing journals. Part I (in English) and Part III (in Chinese) are papers on field theories, particle physics and nuclear physics, Part II (in English) and Part IV (in Chinese) are papers on statistical physics and condensed matter physics. From the published papers, it illustrates and is clearly evident how Prof Chou was constantly at the frontiers of theoretical physics in various

periods and carried out creative research works experimenting with initial ideas and motivations, as well as how he has driven and worked in different key research directions of theoretical physics, all for which he has made significant contributions to various interesting research areas and interdisciplinary fields.

Indian Americans (Part-I) Pradeep Thakur, 2009 Anand G. Mahindra, one of the most successful business men of India Inc., recently added another feather to his cap--Satyam Computer Services Ltd, which was counted as the fourth largest Information Technology (IT) services firm of India until the revelation of a financial fraud by its founder chairman. It was a risk that even the top three Indian IT companies of India avoided, but Anand Mahindra went ahead with the calculated risk of bidding for Satyam that turned out to be--historical and game changer-- in his own words. Venturbay Consultants Pvt Ltd, a subsidiary of Tech Mahindra Ltd., India's sixth largest software exporter outbid the diversified conglomerate Larsen & Toubro Ltd, U.S. based Cognizant Technology Solutions and American investor Wilbur Ross to acquire a controlling stake in Satyam Computer. Anand Mahindra was among those business heads at the helm of family owned businesses who acknowledged that ownership should be separate from management. The professionalism has paid off well and his flagship firm Mahindra & Mahindra Ltd, one of India's leading automotive manufacturers known for its tractors, has carved out a niche space in the passenger vehicles space also with successful sports utility vehicle (SUV) models such as Scorpio and Xylo. The Scorpio, developed from scratch for just \$120 million, became a case study at the Harvard Business School. Another group company Mahindra Holidays and Resorts has just ended a four-month long drought at India's initial public offering (IPO) market. When Anand Mahindra joined the family business in early 1980s, he had to struggle to change the work culture at the grass root level. Then he focused on diversifying the business and the Group has now significant presence in sectors such as automobiles, financial services, trade and logistics, hospitality, automotive components, information technology and infrastructure development. Mahindra, India's top multi-utility vehicle maker and the world's fourth-largest tractor maker, has about 30% of the Indian tractor's market share, the world's largest by volume. Mahindra also has strong presence in urban and foreign markets like Russia, Brazil, Columbia and Africa. Mahindra was a co-founder of Kotak Mahindra Finance Ltd., which in 2003 was converted into a bank.

Collective Intelligence in Action Satnam Alag, 2008-09-30 There's a great deal of wisdom in a crowd, but how do you listen to a thousand people talking at once? Identifying the wants, needs, and knowledge of internet users can be like listening to a mob. In the Web 2.0 era, leveraging

the collective power of user contributions, interactions, and feedback is the key to market dominance. A new category of powerful programming techniques lets you discover the patterns, inter-relationships, and individual profiles-the collective intelligence--locked in the data people leave behind as they surf websites, post blogs, and interact with other users. *Collective Intelligence in Action* is a hands-on guidebook for implementing collective intelligence concepts using Java. It is the first Java-based book to emphasize the underlying algorithms and technical implementation of vital data gathering and mining techniques like analyzing trends, discovering relationships, and making predictions. It provides a pragmatic approach to personalization by combining content-based analysis with collaborative approaches. This book is for Java developers implementing Collective Intelligence in real, high-use applications. Following a running example in which you harvest and use information from blogs, you learn to develop software that you can embed in your own applications. The code examples are immediately reusable and give the Java developer a working collective intelligence toolkit. Along the way, you work with, a number of APIs and open-source toolkits including text analysis and search using Lucene, web-crawling using Nutch, and applying machine learning algorithms using WEKA and the Java Data Mining (JDM) standard. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.
