Advances in Digital Forensics IX Gilbert Peterson,Sujeet Shenoi,2013-10-09 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance - investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics IX describe original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Forensic Models, Forensic Techniques, File system Forensics, Network Forensics, Cloud Forensics, Forensic Tools, and Advanced Forensic Techniques. This book is the ninth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-five edited papers from the Ninth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in Orlando, Florida, USA in the winter of 2013. Advances in Digital Forensics IX is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson is an Associate Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

Wiley IFRS 2008 Barry J. Epstein,Eva K. Jermakowicz,2008-03-28 The one indispensable guide to IFRS compliance Wiley IFRS 2008 is the comprehensive source for guidance in applying IFRS to complex, real-world fact situations, and is equally valuable for preparers, auditors, and users of financial reports. To facilitate the reader's understanding, the book includes both examples created to explain particular IFRS requirements and selections from actual published financial statements, which have been copiously provided throughout, illustrating all key concepts. Barry J. Epstein (Chicago, IL) is a partner with Russell Novak & Company, LLP, where he specializes in technical and litigation consultation on U.S. and international accounting and auditing matters and corporate governance. Eva K. Jermakowicz, PhD, CPA (Nashville, TN) is a university professor and a leading consultant to international organizations and businesses. She is a frequent speaker at international venues and has 25 years of teaching experience.

Using Social Media for Global Security Hugh Brooks,Ravi Gupta,2013-01-16 Essential reading for cybersecurity professionals, security analysts, policy experts, decision-makers, activists, and law enforcement! During the Arab Spring movements, the world witnessed the power of social media to dramatically shape events. Now this timely book shows government decision-makers, security analysts, and activists how to use the social world to improve security locally, nationally, and globally-and cost-effectively. Authored by two technology/behavior/security professionals, Using Social Media for Global Security offers pages of instruction and detail on cutting-edge social media technologies, analyzing social media data, and building crowdsourcing platforms. The book teaches how to collect social media data and analyze it to map the social networks of terrorists and sex traffickers, and forecast attacks and famines. You will learn how to coalesce communities through social media to help catch murderers, coordinate disaster relief, and collect intelligence about drug smuggling from hard-to-reach areas. Also highlighting dramatic case studies drawn from the headlines, this crucial book is a must-read. Illustrates linguistic, correlative, and network analysis of OSINT Examines using crowdsourcing technologies to work and engage with populations globally to solve security problems Explores how to ethically deal with social media data without compromising people's rights to privacy and freedom of expression Shows activists fighting against oppressive regimes how they can protect their identities online If you're responsible for maintaining local, national or global security, you'll want to read Using Social Media for Global Security.

Intelligent Natural Language Processing: Trends and Applications Khaled Shaalan,Aboul Ella Hassanien,Fahmy Tolba,2017-11-17 This book brings together scientists, researchers, practitioners, and students from academia and industry to present recent and ongoing research activities concerning the latest advances, techniques, and applications of natural language processing systems, and to promote the exchange of new ideas and lessons learned. Taken together, the chapters of this book provide a collection of high-quality research works that address broad challenges in both theoretical and applied aspects of intelligent natural language processing. The book presents the state-of-the-art in research on natural language processing, computational linguistics, applied Arabic linguistics and related areas. New trends in natural language processing systems are rapidly emerging – and finding application in various domains including education, travel and tourism, and healthcare, among others. Many issues encountered during the development of these applications can be resolved by incorporating language technology solutions. The topics covered by the book include: Character and Speech Recognition; Morphological, Syntactic, and Semantic Processing; Information Extraction; Information Retrieval and Question Answering; Text Classification and Text Mining; Text Summarization; Sentiment Analysis; Machine Translation Building and Evaluating Linguistic Resources; and Intelligent Language Tutoring Systems.

Advances in International Accounting J. Timothy Sale, 2007-08-13 Advances in International Accounting is a refereed, academic research annual, that is devoted to publishing articles about advancements in the development of accounting and its related disciplines from an international perspective. This serial examines how these developments affect the financial reporting and disclosure practices, taxation, management accounting practices, and auditing of multinational corporations, as well as their effect on the education of professional accountants worldwide. Advances in International Accounting welcomes traditional and alternative approaches, including theoretical research, empirical research, applied research, and cross-cultural studies. Advances in International Accounting is now available online at ScienceDirect - full-text online of volumes 14 onwards.

Japan International Monetary Fund. Monetary and Capital Markets Department, 2017-09-18 This Technical Note discusses the findings and recommendations made in the Financial Sector Assessment Program for Japan in the areas of regulation and supervision of securities firms. The supervision of the two major Japanese securities groups and the Japanese subsidiaries of global banking groups deserves special attention, given the domestic and cross-border interconnectedness of these firms. The authorities should continue to ensure that the supervisory teams for the major Japanese groups have access to sufficient number of experienced staff. It is also important to continue to enhance the existing international cooperation in the supervision of Japanese firms' overseas operations and foreign-owned firms' activities in Japan.

The Big Humanities Richard J. Lane, 2016-11-25 This book provides an accessible introduction to, and overview of, the digital humanities, one of the fastest growing areas of literary studies. Lane takes a unique approach by focusing on the technologies and the new environment in which the digital humanities largely takes place: the digital laboratory. The book provides a brief history of DH, explores and explains the methodologies of past and current DH projects, and offers resources such as detailed case studies and bibliographies. Further, the focus on the digital laboratory space reveals affiliations with the types of research that have traditionally taken place in the sciences, as well as convergences with other fast-growing research spaces, namely innovation labs, fabrication labs, maker spaces, digital media labs, and change labs. The volume highlights the profound transformation of literary studies that is underway, one in which the adoption of powerful technology – and concomitantly being situated within a laboratory environment – is leading to an important re-engagement in the arts and humanities, and a renewed understanding of literary studies in the digital age, as well as a return to large-scale financial investment in humanistic research. It will be useful to students and teachers, as well as administrators and managers in charge of research infrastructure and funding decisions who need an accessible overview of this technological transformation in the humanities. Combining useful detail and an overview of the field, the book will offer accessible entry into this rapidly growing field.

El Ingenio ó Juego de Marro, de Punta ó Damas de Antonio de Torquemada (1547) Govert Westerveld, 2015-08-27 According to data available at this time the first draughts book written in Valencia in 1547 was titled El Ingenio o juego de marro, de punta o Damas. This is indicated by Nicolao Antonio, Bibliotheca Hispana Vetus, 1696 Volume I, page 165. I am able to write about this draughts book, because I came to possession of a copy of this book. The cost was rather high, but it was worthwhile to fly to Amsterdam in 1988 to obtain this copy, of which the original is now in unknown hands in Madrid. The positions of the diagrams, letters, and language that I could reproduce here are nearly identical to the original book, thus diagrams with almost the same nice decoration and with almost the same old Spanish letters and the same language of the XV century. Furthermore I reproduced the same positions of the diagrams, thus using the white squares for the pawns and having the long diagonal on the right hand. The drawing of the pawns and Dama are exactly the same as appearing in the original book.

Revelation of the True Authors Behind Villalon's Books and Manuscripts Govert Westerveld, 2018-12-09 Translator Lucena, the son of Juan Ramírez de Lucena, was in charge of translating Historia de duobus amantibus (1444) by Eneas Silvio Piccolomini (Pope Pius II) in order to publish the Estoria muy verdadera de dos amantes, Euríalo franco y Lucrecia senesa in Salamanca in 1495. He could do so since his father was in the service of this Pope between 1560 and 1564 in Rome. His father's protector in those years was the cardinal Próspero Colonna (1426-1463), who opened the door to our Lucena during his future book activities (Tragicomedia, 1506) with Gentile Montefeltro, her sister Agnesina Montefeltro (Itinerario, 1508), married to Fabricio Colonna (and Agnesina's daughter Vitoria Colonna (La Propalladia, 1517) who was married to the Marquis of Pescara, Fernando de Ávalos. There was a close contact between Lucena and Fernando de Rojas, seeing the books the latter had in his library. For me Juan del Encina continues to be one of the main authors of La Celestina. The JGAAP and other linguistic proofs confirm that the texts of the book Propalladia by the pseudonymous author Bartolomé Torres Naharro are mainly written by Juan del Encina and Lucena. The foreword to the book seems to be by Lucena'. We

see something similar in Lozana andaluza, but here Lucena is again involved in the printing, this time under the pseudonym Francisco Delicado. Most of the texts seem to have been written by Juan del Encina and most of the additional texts were also written by him and probably a small part of the book by Lucena. However, historians say that the book is written by Francisco Delicado. As explained hereafter, Francisco Delicado is the pseudonym of Lucena and according to the JGAAP Lucena did not write all the text of Lozana Andaluza. However, we must understand that the JGAAP is not 100% trustworthy. The JGAAP is only one more aid in the history, but cannot be used as the main research tool. Thus we need additional linguistic proofs, such as those done by Dr. Rolf Eberenz. Since it was a custom in the 15th and 16th century to seize texts of other authors and edit them under one's name, I have been careful with texts and forewords. The forewords could have been written by the editor of the work and its texts by the real author. The JGAAP indicates that Francisco Delicado has the authorial fingerprint of Lucena in two Italian books: *El modo de adoperare el legno de India occidentale* and *Specchio vulgare per li Sacerdoti*. We come to the conclusion that Diego de San Pedro and Juan de Flores are pseudonyms of Lucena. With regards to *La Celestina* we will observe in this book that Calisto is Lucena, as per Dr. Ricardo Calvo's hypothesis from 1997 which we finally confirmed with the JGAAP. When Francisco Delicado left Rome he must have gone to Venice and Valencia to publish the translation of Luis Vives' work *Tratado sobre la educación de la mujer cristiana* under the name Juan Justiniano. Around 1530 we see him in France where he was involved in a chess manuscript under the name of Lucena. Back in Venice Francisco Delicado was involved in various books until he left Venice in 1534 to publish the second *Celestina* in Medina del Campo under the name Feliciano de Silva. There he was heavily involved in books and known as Pedro de Mercado. At that time he started to publish books under the name Villalón. However, the JGAAP cannot confirm several works, among them *Viaje de Turquía* and *El Crotalón*. On the other hand Lucena was a man of many languages. Being Judeoconverso and son of Ambassador Juan Ramírez de Lucena he knew Hebrew. He also had to master Greek and Latin for his studies. Then his international trips forced him to know Italian, Portuguese, and French. He was the ideal man to write *Gramática Castellana*. Since several works of Cristóbal de Villalón are giving problems as we do not know whether he was their real author, this work can hopefully clarify somewhat certain unknown territories.

Modes of Composition and the Durability of Style in Literature David L. Hoover, 2020-11-29 *Modes of Composition and the Durability of Style* employs the tools and methods of computational stylistics to show that style is extremely resistant to changes in how texts are produced. Addressing an array of canonical writers, including William Faulkner, Joseph Conrad, Thomas Hardy, and Henry James, along with popular contemporary writers like Stephen King and Ian McEwan, this volume presents a systematic study of changes in mode of composition and writing technologies. Computational analysis of texts produced in multiple circumstances of composition, such as dictation, handwriting, typewriting, word processing, and translation, reveals the extraordinary durability of authorial style. *Modes of Composition and the Durability of Style in Literature* will be essential for readers interested in exploring the rapidly expanding field of digital approaches to literature.

Literary Detective Work on the Computer Michael P. Oakes, 2014-05-15 Computational linguistics can be used to uncover mysteries in text which are not always obvious to visual inspection. For example, the computer analysis of writing style can show who might be the true author of a text in cases of disputed authorship or suspected plagiarism. The theoretical background to authorship attribution is presented in a step by step manner, and comprehensive reviews of the field are given in two specialist areas, the writings of William Shakespeare and his contemporaries, and the various writing styles seen in religious texts. The final chapter looks at the progress computers have made in the decipherment of lost languages. This book is written for students and researchers of general linguistics, computational and corpus linguistics, and computer forensics. It will inspire future researchers to study these topics for themselves, and gives sufficient details of the methods and resources to get them started.

Analyzing Textual Information Johannes Ledolter, Lea S. VanderVelde, 2021-05-05 Researchers in the social sciences and beyond are dealing more and more with massive quantities of text data requiring analysis, from historical letters to the constant stream of content in social media. Traditional texts on statistical analysis have focused on numbers, but this book will provide a practical introduction to the quantitative analysis of textual data. Using up-to-date R methods, this book will take readers through the text analysis process, from text mining and pre-processing the text to final analysis. It includes two major case studies using historical and more contemporary text data to demonstrate the practical applications of these methods. Currently, there is no introductory how-to book on textual data analysis with R that is up-to-date and applicable across the social sciences. Code and a variety of additional resources to enrich the use of this book are available on an accompanying website. These resources include data files from the 39th Congress, and also the collection of tweets of President Trump, now no longer available to researchers via Twitter itself.
