Assisted Reproduction in Wild Mammals of South America Alexandre Rodrigues Silva, 2023-12-01 South America has one of the greatest riches in the world in terms of biodiversity. Despite all this richness, recent reports warn of different threats to this biodiversity. As a strategy to reduce the rate of loss of animal species, the development and application of assisted reproduction techniques (ARTs) for their conservation currently stands out. Thus, this book compiles information on recent scientific studies regarding the development of ARTs for the conservation of wild mammalian species in South America, thus serving as an important source of reference for professionals and students interested in wildlife conservation.

Hong Kong's Court of Final Appeal Simon N. M. Young, Yash Ghai, 2014 In the years since it was established on 1 July 1997, Hong Kong's Court of Final Appeal has developed a distinctive body of new law and doctrine with the help of eminent foreign common law judges. Under the leadership of Chief Justice Andrew Li, it has also remained independent under Chinese sovereignty and become a model for other Asian final courts working to maintain the rule of law, judicial independence and professionalism in challenging political environments. In this book, leading practitioners, jurists and academics examine the Court's history, operation and jurisprudence, and provide a comparative analysis with European courts and China's other autonomous final court in Macau. It also makes use of extensive empirical data compiled from the jurisprudence to illuminate the Court's decision-making processes and identify the relative impacts of the foreign and local judges.

It's the Culture Chester Graham, 2021-11-16 What's going on? Lino Squagliace has been sent to Brazil to report on Excet, a sprawling financial complex which may be ripe for an American takeover. He is overwhelmed by a seemingly random labyrinth of technology, sex, luxury, drugs and financial genius which could be either a gold mine or a land mine. How can Lino cope with a society where the street muggers are young and pretty, adults legally adopt other adults and grown men fight with guns over the right to a parking space? Will he become used to having personal bodyguards, before and behind, who slip in and out of the shadows as he explores this most exotic of cultures? And what will Lino's billionaire patron think of company executives who sometimes embrace Lino (intimately as well as figuratively) but at other times seem bent on manipulating his trusted auditor into being the front man for a complicated financial scam?

Stories on a String Candace Slater, 2023-11-10 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1982.

The Politics of Cross-border Crime in Greater China Shiu Hing Lo, 2009 This text brings together studies in various aspects of the theory of the capitalist economy. It focuses on major themes of the Marxist tradition that postulate the existence and importance of social relations and structures underlying the esoteric realm of prices, profits, wages, etc.

Ethnomedicinal Plants Mahendra Rai, Deepak Acharya, Jose Luis Rios, 2011-02-01 Presenting recent discoveries on ethnomedicinal plants around the world, this book focuses on evaluating the progress to date as well as the future potential of drug development in ethnomedicine. Eight reviews examine therapeutic applications including the spasmolytic effects of various plants, the anti-inflammatory activity of plants from Brazil a

The Cambridge Handbook of Foreign Judges on Domestic Courts Anna Dziedzic, Simon N. M. Young, 2023-10-31 This Handbook presents a comparative study of foreign judges on domestic courts, examining the practice and its implications for adjudication, judicial identity and judicial independence and accountability. The Handbook will interest scholars of comparative law and judicial studies, as well as judges, lawyers and historians.

Biaxial/Multiaxial Fatigue and Fracture Andrea Carpinteri, Manuel De Freitas, Andrea Spagnoli, 2003-03-19 The European Structural Integrity Society (ESIS) Technical Committee on Fatigue of Engineering Materials and Structures (TC3) decided to compile a Special Technical Publication (ESIS STP) based on the 115 papers presented at the 6th International Conference on Biaxial/Multiaxial Fatigue and Fracture. The 25 papers included in the STP have been extended and revised by the authors. The conference was held in Lisbon, Portugal, on 25-28 June 2001, and was chaired by Manuel De Freitas, Instituto Superior Tecnico, Lisbon. The meeting, organised by the Instituto Superior Tecnico and sponsored by the Portuguese Ministerio da Ciencia e da Tecnologia and by the European Structural Integrity Society, was attended by 151 delegates from 20 countries. The papers in the present book deal with the theoretical, numerical and experimental aspects of the Multiaxial fatigue and fracture of engineering materials and structures. They are divided into the following six sections; Multiaxial Fatigue of Welded Structures; High cycle Multiaxial fatigue; Non proportional and Variable-Amplitude loading; Defects, Notches, Crack Growth; Low Cycle Multiaxial Fatigue; Applications and Testing Methods. As is well-known, most engineering components and structures in the mechanical, aerospace, power generation, and other industries are subjected to multiaxial loading during their service life. One of the most difficult tasks in design against fatigue and fracture is to translate the information gathered from uniaxial fatigue and fracture tests on engineering materials into applications involving complex states of cyclic stress-strain conditions. This book is the result of co-operation between many researchers from different laboratories, universities and industries in a number of countries.

Renewable Energy Resource Assessment and Forecasting George Galanis, 2020-11-27 In recent years, several projects and studies have been launched towards the development and use of new methodologies, in order to assess, monitor, and support clean forms of energy. Accurate estimation of the available energy potential is of primary importance, but is not always easy to achieve. The present Special Issue on 'Renewable Energy Resource Assessment and Forecasting' aims to provide a holistic approach to the above issues, by presenting multidisciplinary methodologies and tools that are able to support research projects and meet today's technical, socio-economic, and decision-making needs. In particular, research papers, reviews, and case studies on the following subjects are presented: wind, wave and solar energy; biofuels; resource assessment of combined renewable energy forms; numerical models for renewable energy forecasting; integrated forecasted systems; energy for buildings; sustainable development; resource analysis tools and statistical models; extreme value analysis and forecasting for renewable energy resources.

Financial Liberalization and Economic Performance Luiz Fernando de Paula, 2012-07-26 Since the beginning of the 1990s, Brazil has followed a pattern of economic development inspired by Washington Consensus. This framework includes a set of liberalising and market friendly policies such as privatisation, trade liberalization, stimulus to foreign direct investment, tax reform, and social security reforms. This book assesses the determinants and impacts of financial liberalisation in Brazil considering its two dimensions: the opening up of the balance of payments capital account, and the penetration by foreign bank of the domestic banking sector. The author combines theoretical and empirical analyses. Some make use of mathematical models and/or statistical techniques; however, they are only used when they are strictly necessary to the analysis.

The Politics of Cross-border Crime in Greater China Sonny Shiu-Hing Lo, 2020-07-24 Organized crime has been on the rise in the Greater China region since the People's Republic opened up its economy and society in the mid-1980s. Today, triads from Hong Kong, Macao, and even Taiwan are involved in businesses in Guangdong Province, and often recruit local Chinese for illegal activities such as extortion, kidnapping, assassinations, and smuggling of illegal aliens. This book provides a detailed and comprehensive study of how the state at the central and local levels has responded to the changing patterns and activities of cross-border crime in Greater China. It discusses the theoretical concept of organized crime; the transnational nature of organized crime in recent years; the significance of studying organized crime in Greater China; and the implications for the national security of other countries such as the United States, Canada, and Australia. The author reviews the history of organized crime and secret societies, and addresses the legal complexities of dealing with criminal groups in the region. He covers such topics as money laundering, the financing of terrorist activities, and regional efforts in fighting terrorism.

Sure Road? Nationalisms in Angola, Guinea-Bissau and Mozambique Eric Morier-Genoud, 2012-04-19 This book brings together new research on nations and nationalism in Angola, Guinea-Bissau and Mozambique. It provides original case studies as well as a theoretical discussion on the subject.

Carnivoran Ecology Steven W. Buskirk,2023-05-02 These charismatic mammals, which include dogs, cats, hyenas, weasels, mongooses, seals, sea lions and bears, have always held special importance to humans throughout history and continue to do so today. In recent decades, the emergence of new technologies has completely transformed our knowledge of how carnivorans interact with their environments and consequently reshaped our view of carnivoran ecology. This unique synthesis uses examples from a diverse and expanding carnivoran literature, drawing from all carnivoran families and spanning the world's oceans and continents, to produce a clearly written and richly illustrated book that reviews our current state of knowledge of carnivoran ecology. It addresses all levels of biological organization and function, from genes to enzymes, organisms, populations, and ecosystems. Special attention is given to how carnivoran species interact with their prey, each other, and humans. There is an emphasis on community interactions and their importance in carnivoran evolution, showing how evolutionary constraints (morphological, physiological, and behavioral) structure communities today. The book's approach is strongly comparative, contrasting herbivores with carnivores, predators with scavengers, and cats with dogs. Carnivorans play important roles in many high-profile conservation cases, either as species of concern or agents of endangerment, and their importance is demonstrated in both contexts. Carnivoran Ecology is an accessible advanced textbook aimed principally at senior undergraduate and graduate students taking courses in carnivore ecology, as well as a broad audience of professional academics (especially carnivore and mammalian biologists), researchers, and practitioners working in both governmental and non-governmental organizations. A significant secondary market will exist amongst the large amateur naturalist community including those wishing to explore the ecological and evolutionary links between domestic carnivorans (dogs, cats, ferrets etc.) and their wild counterparts.

Basic Concepts and Recent Advances in Microbial Diversity, Taxonomy, Speciation and Evolution Suchitra Godbole,Dhara P. Sachdev,2024-03-05 This book delves into the fundamental principles that underpin the classification and understanding of bacteria, from the basic concepts to the latest advances. This book encompasses numerous topics related to diversity, such as speciation and evolution of species, microbial diversity, and methods for estimating diversity and taxonomy of bacteria. The reader can gain valuable insights into the cutting-edge techniques used to identify and classify bacteria, such as genomics, metagenomics, and phylogenetic analysis. With expert contributions from leading scientists, this comprehensive guide offers a holistic view of the microbial world in the context of their role in global biodiversity, and explores the upcoming role of machine learning and artificial intelligence for exploration of bacterial diversity. For students and researchers in microbiology, genetics and biotechnology, this book is an essential resource for unravelling the mysteries of bacterial speciation, evolution, diversity, and taxonomy.
