Rules for Wrongdoers Arthur Ripstein, Oona Anne Hathaway, Christopher Kutz, Jeff McMahan, 2021 Ripstein's lectures, which constitute the central texts of this book, focus on the two bodies of rules governing war: the jus ad bellum, which regulates resort to armed force, and the jus in bello, which sets forth rules governing the conduct of armed force and applies equally to all parties. The lectures argue that both sets of rules constitute prohibitions rather than permissions, and that recognizing them as distinctive prohibitions can reconcile the seeming tension between them. By understanding that the central wrong of war is that war is the condition which force decides, Ripstein contends that the law and morality of war are in fact aligned; the rules governing the conduct of hostilities must apply equally to parties in the right and parties in the wrong in an armed conflict, because the prohibitions outlined in the rules governing war are prohibitions that restrain war. Ripstein's method of analysis and the substantive argument he puts forward offer an opportunity for rigorous critical engagement in subsequent essays by commentators Hathaway, Kutz, and McMahan, followed by a response from Ripstein--

Weighing Lives in War Jens David Ohlin, Larry May, Claire Finkelstein, 2017-08-11 The chief means to limit and calculate the costs of war are the philosophical and legal concepts of proportionality and necessity. Both categories are meant to restrain the most horrific potential of war. The volume explores the moral and legal issues in the modern law of war in three major categories. In so doing, the contributions will look for new and innovative approaches to understanding the process of weighing lives implicit in all theories of jus in bello: who counts in war, understanding proportionality, and weighing lives in asymmetric conflicts. These questions arise on multiple levels and require interdisciplinary consideration of both philosophical and legal themes.

Justice, Intervention, and Force in International Relations Kimberly A. Hudson, 2009-03-05 This book analyses the problems of current just war theory, and offers a more stable justificatory framework for non-intervention in international relations. The primary purpose of just war theory is to provide a language and a framework by which decision makers and citizens can organize and articulate arguments about the justice of particular wars. Given that the majority of conflicts that threaten human security are now intra-state conflicts, just war theory is often called on to make judgments about wars of intervention. This book aims to critically examine the tenets of just war theory in light of these changes, and formulate a new theory of intervention and just cause. For Michael Walzer, the leading scholar of just war theory, armed humanitarian intervention is permissible only in cases of genocide, ethnic cleansing, widespread massacres, or enslavement. This book shows why this threshold is too restrictive in light of the progressive shift away from interstate conflict as well as the emerging norms of 'sovereignty as responsibility' and the 'responsibility to protect'. *Justice, Intervention and Force in International Relations* aims to establish a new, stable foundation for non-intervention and a revised threshold for 'just cause'. In addition, this book demonstrates that over-reliance on the just cause category distorts understanding, analysis, and public discussion of the justice or injustice of resorting to war. This new book will be of much interest to students of ethics, security studies, international relations and international law. Kimberley Hudson is Assistant Professor of Political Science at American International College, and has a Phd in International Relations from Brown University.

People and Places in Northern Europe, 500-1600 Ian N. Wood, Niels Lund, 1991 A collection of essays dealing with the history and archaeology of Northern Europe in the middle ages. It looks at Anglo-Saxon England, at its contacts with Francia and Scandinavia, and at the impact of the Norwegians and the Danes on the place-names of the British Isles. Two papers deal with the history of women as recorded in runestones, and as evidenced by law suits of the medieval period.

Plural Pasts Claire Norton, 2017-02-03 Through a study of a variety of Ottoman and modern Turkish accounts of the Ottoman-Habsburg sieges of Nagykanizsa Castle (1600-01) including official documents, correspondence, histories, and more literary genres such as gazavatnames [campaign narratives], Plural Pasts explores Ottoman literacy practices. By considering the diverse roles that the various accounts served – construction of identities, forging of diplomatic alliances and legitimization of political ideologies and geo-political imaginations – it explores the cultural and socio-political significance the various accounts had for different audiences. In addition, it interweaves theoretical reflection with textual analysis. Using the sieges of Nagykanizsa as a case study, it offers a sophisticated contribution to ongoing historiographical arguments: namely, how historians construct hierarchies of primary sources and judge some to be more truthful, or more valuable, than others; how texts are assigned to particular genres based on perceived epistemological status – as story or history, fact or fiction; and the circular role that historians and their histories play in constructing, reflecting and reinforcing cultural and political imaginaries.

The Mamluk City in the Middle East Nimrod Luz, 2014-04-28 The Mamluk City in the Middle East offers an interdisciplinary study of urban history, urban experience, and the nature of urbanism in the region under the rule of the Mamluk Sultanate (1250-1517). The book focuses on three less-explored but politically significant cities in the Syrian region - Jerusalem, Safad (now in Israel), and Tripoli (now in Lebanon) - and presents a new approach and methodology for understanding historical cities. Drawing on diverse textual sources and intensive field surveys, Nimrod Luz reveals the character of the Mamluk city as well as various aspects of urbanism in the region, establishing the pre-modern city of the Middle East as a valid and useful lens through which to study various themes such as architecture, art history, history, and politics of the built environment. As part of this approach, Luz considers the processes by which Mamluk discourses of urbanism were conceptualized and then inscribed in the urban environment as concrete expressions of architectural design, spatial planning, and public memorialization.

A Political History of the Bible in America Paul D. Hanson, 2015-08-24 Biblical history, enriched by many religious and cultural traditions, flows into and is intertwined with our nation's epic, both for better and for worse. To ignore that history is to cut ourselves off from our roots and to deny the ancestral experiences that forged our individual and collective identity. from the prologue This substantial work explores the interplay of religion and politics throughout the history of the United States. Paul D. Hanson traces American history back to colonial times, paying close attention to the role that biblical tradition has played in shaping the national story of the United States. He then presents a detailed study of politics in the Bible that is framed by the challenges and crises in American history. Students will learn how deeply religion has influenced both domestic and international policy and contributed to the nation's sense of identity and purpose. After laying these biblical-historical foundations, Hanson considers a method of biblical interpretation that can speak to the diverse nation of today. He proposes an inclusive form of public moral discourse that invites full participation by members of all religious and philosophical groups.

Does the Pro-Life Worldview Make Sense? Stephen Kershner, 2017-10-03 This book looks at a family of views involving the pro-life view of abortion and Christianity. These issues are important because major religious branches (for example, Catholicism and some large branches of Evangelicalism) and leading politicians assert, or are committed to, the following: (a) it is permissible to prevent some people from going to hell, (b) abortion prevents some people from going to hell, and (c) abortion is wrong. They also assert, or are committed to, the following: (d) it is permissible to use defensive violence to prevent people from killing innocents, (e) doctors who perform abortions kill innocents, and (f) it is wrong to use defensive violence against doctors who perform abortions. Stephen Kershner argues that these and other principles are inconsistent. Along the way, he explores the ways in which theories of hell, right forfeiture, and good consequences relate to each other and the above inconsistencies.
