Athletic CEOs Stanislav Shekshnia,Alexey Ulanovsky,Veronika Zagieva,2018-01-26 Athletic CEOs: Leadership in Turbulent Times is a book about high-performing transformational leaders operating in turbulent environments. These CEOs do not lead by the book: they may not praise their subordinates, provide positive feedback or regularly celebrate small wins. Yet they have created formidable enterprises that deliver sustainable growth, have elevated their companies' employees to new levels, have set new standards for their industries and have advanced their regions. Most remarkably, in spite of their prominence, these leaders continue to reinvent themselves. Having studied them for a decade, Stanislav Shekshnia, Veronika Zagieva and Alexey Ulanovsky developed a model of athletic leadership which describes the leadership agendas, practices, outcomes and outputs of these leaders as well as unique attributes that make them effective.

It Security Products for Corporate Users Peter Stelzhammer,Andreas Clementi,Thomas Arlt,Philippe Rödlach,2010 Most organizations are aware of the risks threatening their IT environment. Viruses, trojans, worms, exploits and many other threats represent a serious danger for the IT department. A collapse of the IT system could mean grave financial losses right up to insolvency for a company. The IT departments of companies are conscious of this problem. Getting the best protection against these threats is the only issue. A simple file antivirus solution alone is totally inadequate, as there are too many threats from contaminated e-mails, exploits etc. What is re-quired is a comprehensive suite that provides protection against all of these. Functional Diversity Because of the immense functional diversity of various antivirus suites and corporate prod-ucts, it is becoming increasingly difficult for decision-makers in the IT sector to get a proper overview. Which product should one opt for and for which areas of protection? During these tests our main focus has not been on malware detection rates, but on the prod-ucts' handling and user-friendliness, and the scope of functionality. We have compiled the functional scope of various products in a detailed table. For malware detection rates of indi-vidual products please refer to the tests of our website: <http://www.av-comparatives.org>
