A War Transformed Frederick Silburn-Slater,2023-09-28 The Great War meets the horrors of forgotten folklore in this occult skirmish wargame. 1916: A World Transformed. As the Great War raged, the Moon fell from its orbit. Seas shifted, uncovering new lands and revealing what tide and time had concealed. Long known as a potent occult power, the Moon's descent also heralded the terrifying resurgence of magic. Long-forgotten gods and spirits began to stir in hidden groves and caverns and old traditions found new strength. Soon, stone circles echoed once more with the chanting of ancient rituals and menhirs were again bedecked with wildflowers and presented with offerings of honey and blood. 1918: A War Transformed. Rival nations battle on new fronts, seeking dominance with weapons of spell, song, and sacrifice. Thrust to the surface, Doggerland, the ancient bridge between Britain and Europe, becomes a crucial battleground in the conflict. In this alien landscape, raiding parties pick through the ribs of wrecks and the ruins of lost villages, war machines festooned with totems and fetishes roll over the brittle bones of long-dead giants, and cavalry charge across plains made verdant by the vegetation returning to this new land with unnatural speed. A War Transformed is a skirmish wargame set in a world where World War I was utterly changed by forces far beyond human comprehension. Players command small forces of infantry, cavalry, artillery, and other... stranger... troops on the Doggerland Front. Fast-paced gameplay and a tense initiative bidding system are combined with authentic folk traditions and occult philosophies of the era – it is a game of rifle and relic, of bayonet and belief, of machine gun and magic.

The Archival Afterlives of Philippine Cinema Bliss Cua Lim,2024-01-05 Drawing on cultural policy, queer and feminist theory, materialist media studies, and postcolonial historiography, Bliss Cua Lim analyzes the crisis-ridden history of Philippine film archiving—a history of lost films, limited access, and collapsed archives. Rather than denigrate underfunded Philippine audiovisual archives in contrast to institutions in the global North, *The Archival Afterlives of Philippine Cinema* shows how archival practices of making do can inspire alternative theoretical and historical approaches to cinema. Lim examines formal state and corporate archives, analyzing restorations of the last nitrate film and a star-studded lesbian classic as well as archiving under the Marcos dictatorship. She also foregrounds informal archival efforts: a cinephilic video store specializing in vintage Tagalog classics; a microcuratorial initiative for experimental films; and guerilla screenings for rural Visayan audiences. Throughout, Lim centers the improvisational creativity of audiovisual archivists, collectors, advocates, and amateurs who embrace imperfect access in the face of inhospitable conditions.

Onomastics of the “Chanson de Roland” Gustav A. Beckmann,2023-03-20 This ambitious study of all proper names in the Chanson de Roland is based for the first time on a systematic survey of the whole geographical and historical literature from antiquity to after 1100 for the Geographica, and on working through (almost) the entire documentary tradition of France and its neighbouring regions from 778 to the early 12th century for the personal names. The overall result is clear: the surviving song is more tightly and profoundly structured, even in smaller scenes, than generally assumed, it is also richer in depicting reality, and it has a very long prehistory, which can be traced in outline, albeit with decreasing certainty, (almost) back to the Frankish defeat of 778. Here are some individual results: for the first time, a detailed (and ultimately simple!) explanation not only of the ‘pagan’ catalogue of peoples, but also of the overarching structure of Baligant’s empire, the organisation of North Africa, the corpus of the Twelve Anti-Pairs as well as the ‘pagan’ gods are given, and individual names such as Bramimunde and Jurfaret, toponyms such as Marbrise and Marbrose are explained. From Roland’s Spanish conquests (v. 196–200), the course of the elapsed set anz toz pleins is reconstructed. Even the names of the weapons prove to be a small structured group, in that they are very discreetly adapted to their respective ‘pagan’ or Christian owner. On the Christian side, the small list of relics in Roland’s sword is also carefully devised, not least in what is left out: a relic of the Lord; this is reserved for Charlemagne’s Joise. The author explains for example, why from the archangel triad only Michael and Gabriel descend to the dying Roland, whereas ‘the’ angel Cherubin descends in Rafael’s place. Munjoie requires extensive discussion, because here a (hitherto insufficiently recorded) toponym has been secondarily charged by the poet with traditional theological associations. The term Ter(e) major is attested for the first time in reality, namely in the late 11th century in Norman usage. For the core of France, the fourth cornerstone – along with Besançon, Wissant and Mont-Saint-Michel – is Xanten, and its centre is Aachen. The poet’s artful equilibration of Charles’s ten eschieles and their leaders is traced. The Capetian barrier emerges as a basic fact of epic geography. Approximatively, the last quarter of the study is devoted to the prehistory of the song, going backwards in time: still quite clearly visible is an Angevin Song of Roland from around 1050, in which Marsilie, Olivier, Roland, Ganelon, Turpin and Naimés already have roles similar to those in the preserved Song. Behind it, between about 970 and shortly after 1000, is the Girart de Vienne from the Middle Rhône, already recognised by Aebischer, with the newly invented Olivier contra Roland. Finally, in faint outlines, an oldest attainable, also Middle Rhône adaptation of the Roland material from shortly after 870 emerges. For the Chanson de Roland, Gaston Paris and Joseph Bédier were thus each right on the main point that was close to their hearts: the surviving song has both the thoroughly sophisticated structure of great art that Bédier recognised in it, and the imposingly long prehistory that Paris conjectured.

Our Original Rights as a People Ariane Schnepf,2006 In their struggle for universal suffrage, the Chartists adapted language to further their cause. Adopting the prevailing keywords of the time and reformulating them within their own cultural environment, the Chartists defined and redefined their own political identity and interpreted the situation they lived in. This book is a case study of Chartism as an example of how radical political movements present themselves in language and how they appear in networks of meaning. Chartist vocabulary and keywords are studied in their historical context and decoded according to political, social and cultural significance. Set in constitutional politics of the time, the Chartist network of keywords includes allusions to a radical past and reaches out into an imaginary future of a liberal market economy and social policy. The three main concerns in the Chartist struggle were the individual, Britain as a nation and the influence of political movements abroad.

Elites and Democratic Development in Russia Vladimir Gel'man,Anton Steen,2003-09-02 The transformation from Communist rule towards democratic development in Russia cannot be fully understood without taking the elites into full consideration. Elites and Democratic Development in Russia examines how elites support and challenge democracy and why they are crucial to Russian democracy in particular. In this innovative volume, twelve respected scholars investigate how elites have affected the transition from Communist rule towards democratic development in Russia. They discuss how the elites' degree of integration on national and regional levels may constitute the main condition for the consolidation of the emerging political regime and interpret the complex post-communist elite patterns of behaviour and attitudes into a theoretical framework of elitist democracy. This book will appeal to those interested in democratization, elites, post-Soviet Russia and post-communist studies.

The Religious Rhetoric of U.S. Presidential Candidates Arnaud Vincent,2019-08-21 Drawing on corpus linguistic methods of analysis, this book critically examines the rhetorical God gap in American political discourse between the Democratic and Republican parties. The volume investigates the claims (which have often not been substantiated by quantitative data in the literature and have tended to focus on particular genres of political discourse) that there is a correlation between a higher degree of religiosity in Republican political discourse and voting preferences for the party and that Democratic politicians should engage in similar discourse toward closing the gap. The book adopts a keyword approach, using such techniques as collocation analyses, concordance reading, and Bible-specific N-gram identification, toward the study of a corpus of general campaign speeches over a 50-year period, and links findings from this data with social and cultural contextual factors to provide a more informed understanding of rhetorical patterns in religiously laden political language. The volume showcases the value of corpus linguistic methods in interrogating claims around political language and their broader applicability in linguistic research, making this key reading for students and scholars in corpus linguistics, critical discourse analysis, American politics, and religious studies.
