Engbert Doede Botma

The Condemnation of Blackness Khalil Gibran Muhammad,2011 The Idea of Black Criminality was crucial to the making of modern urban America. Khalil Gibran Muhammad chronicles how, when, and why modern notions of black people as an exceptionally dangerous race of criminals first emerged. Well known are the lynch mobs and racist criminal justice practices in the South that stoked white fears of black crime and shaped the contours of the New South. In this illuminating book, Muhammad shifts our attention to the urban North as a crucial but overlooked site for the production and dissemination of those ideas and practices. Following the 1890 census - the first to measure the generation of African Americans born after slavery - crime statistics, new migration and immigration trends, and symbolic references to America as the promised land were woven into a cautionary tale about the exceptional threat black people posed to modern urban society. Excessive arrest rates and overrepresentation in northern prisons were seen by many whites - liberals and conservatives, northerners and southerners - as indisputable proof of blacks' inferiority. What else but pathology could explain black failure in the land of opportunity? Social scientists and reformers used crime statistics to mask and excuse anti-black racism, violence, and discrimination across the nation, especially in the urban North. The Condemnation of Blackness is the most thorough historical account of the enduring link between blackness and criminality in the making of modern urban America. It is a startling examination of why the echoes of America's Jim Crow past continue to resonate in 'color-blind' crime rhetoric today.--Book jacket.

Susa and Elam. Archaeological, Philological, Historical and Geographical Perspectives. Katrien De Graef,Jan Tavernier,2012-12-07 Through archaeological, philological, historical and geographical contributions, this volume offers an overview of the present research in the socio-economic, historical and political developments of the Suso-Elamite region from prehistoric times until the great Persian Empire.

Animal Models of Cancer Predisposition Syndromes Hiroshi Hiai,Okio Hino,1999 This book brings together some of the most recent advances made in the genetic analysis of cancer susceptibility using animal models. Leading investigators in the field present model systems for studying cancers including liver and stomach cancer, breast cancer, myeloid leukemia, retrovirus-induced lymphoma, pulmonary adenoma and familial adenomatous polyposis. An overview of transgenic and gene knockout mice is given, and in several chapters the implications of these findings for human cancers are discussed. The book is recommended reading for all scientists and graduate students in experimental cancer research and cancer genomics.

Separated Flows and Jets Victor V. Kozlov,Alexander Dovgal,2012-12-06 Separated flows and jets are closely linked in a variety of applications. They are of great importance in various fields of fluid mechanics including vehicle efficiency, technical branches concerned with gas/liquid flows, atmospheric effects on various constructions, etc. Knowledge of the physics of separated flows and jets and the development of reliable control techniques are prerequisite for future progress in the field. These aspects were in focus during the IUTAM-Symposium which was held in Novosibirsk, 9-13 July, 1990. This volume contains a selection of papers presenting recent results of theoretical and numerical studies as well as experimental work on separated flows and jets. The topics include sub- and supersonic, laminar and turbulent separation as well as organized structures in separated flows and jets. The reader will find here the state of the art and major trends for research in this field of aero-hydrodynamics.

Linguistic Stratigraphy Matthias Urban,2023-12-31 This book examines the historical linguistic panorama of Western South America, focusing on the minor languages that were partially or fully replaced by the expansion of the Quechuan family through the region. The author presents a coherent and generally applicable framework for studying prehistoric language shift processes and reconstructing earlier linguistic landscapes before significant language spreads ousted former patterns of linguistic diversity. This framework combines toponymic evidence with the analysis of substrate contact effects, and, in some cases, extralinguistic evidence, to create an integrated if incomplete of extinct and undocumented languages. In an authoritative exploration of case studies, concerning Aymara in parts of Southern Peru, Cañar in Ecuador, and Chacha in Northern Peru, the book shows how the identities of lost languages and earlier linguistic panoramas can be reconstructed.

Recent Progress In Many-body Theories - Proceedings Of The 9th International Conference David Neilson,Raymond F Bishop,1998-10-20 This inaugural volume in a new series on quantum many-body theory contains the papers presented at the Ninth International Conference on Recent Progress in Many-Body Theories. The conference focused on the development and refinement of many-body methods. A major aim was to foster the exchange of ideas among physicists working in such diverse areas as nuclear physics, quantum chemistry, complex systems, lattice Hamiltonians, quantum fluids and condensed matter physics. A special feature was a session devoted to theories for many-electron systems in low-dimensional quantum dots, wires and electrons.

Applied Process Control Michael Mulholland,2016-08-31 Bridging theory and practice, this book contains over 200 practical exercises and their solutions, to develop the problem-solving abilities of process engineers. The problems were developed by the author during his many years of teaching at university and are kept brief, taken from the fields of instrumentation, modelling, plant control, control strategy design and stability of control. The algorithm flows and codes, which are mostly based on MATLAB®, are given in many cases and allow for easy translation into applications. Since the text is structured according to Applied Process Control: Essential Methods, all of the necessary background information on the underlying methods can be easily and quickly found in this accompanying book.

Study Guide for The Human Body in Health and Illness - E-Book Barbara Herlihy,2013-12-27 Corresponding to the chapters in The Human Body in Health and Illness, 4th Edition, by Barbara Herlihy, this study guide offers fun and practical exercises to help you review, understand, and remember basic A&P. Even if you find science intimidating, this book can help you succeed. Textbook page references are included with the questions to make information easy to find. Each chapter includes three parts: Mastering the Basics with matching, ordering, labeling, diagram reading, and coloring exercises Putting It All Together including multiple-choice quizzes and case studies Challenge Yourself! with critical thinking questions and puzzles

Insight Tasha Eurich,2017-05-18 Do you understand who you really are? Or how others really see you? We all know people with a stunning lack of self-awareness - but how often do we consider whether we might have the same problem? Research shows that self-awareness is the meta-skill of the 21st century - the foundation for high performance, smart choices, and lasting relationships. Unfortunately, we are remarkably poor judges of ourselves and how we come across, and it's rare to get candid, objective feedback from colleagues, employees, and even friends and family.Integrating hundreds of studies with her own research and work in the Fortune 500 world, organizational psychologist Tasha Eurich shatters conventional assumptions about what it takes to truly know ourselves - like why introspection isn't a bullet train to insight, how experience is the enemy of self-knowledge, and just how far others will go to avoid telling us the truth about ourselves. Through stories of people who've made dramatic self-awareness gains, she offers surprising secrets, techniques and strategies to help readers do the same - and therefore improve their work performance, career satisfaction, leadership potential, relationships, and more.At a time when self-awareness matters more than ever, Insight is the essential playbook for surviving and thriving in an unaware world.

Self-Awareness (HBR Emotional Intelligence Series) Harvard Business Review,Daniel Goleman,Robert Steven Kaplan,Susan David,Tasha

Eurich,2018-11-13 Self-awareness is the bedrock of emotional intelligence that enables you to see your talents, shortcomings, and potential. But you won't be able to achieve true self-awareness with the usual quarterly feedback and self-reflection alone. This book will teach you how to understand your thoughts and emotions, how to persuade your colleagues to share what they really think of you, and why self-awareness will spark more productive and rewarding relationships with your employees and bosses. This volume includes the work of: Daniel Goleman Robert Steven Kaplan Susan David HOW TO BE HUMAN AT WORK. The HBR Emotional Intelligence Series features smart, essential reading on the human side of professional life from the pages of Harvard Business Review. Each book in the series offers proven research showing how our emotions impact our work lives, practical advice for managing difficult people and situations, and inspiring essays on what it means to tend to our emotional well-being at work. Uplifting and practical, these books describe the social skills that are critical for ambitious professionals to master.
