Cybercrime and Digital Deviance Roderick S. Graham,'Shawn K. Smith,2019-09-10 *Cybercrime and Digital Deviance* is a work that combines insights from sociology, criminology, and computer science to explore cybercrimes such as hacking and romance scams, along with forms of cyberdeviance such as pornography addiction, trolling, and flaming. Other issues are explored including cybercrime investigations, organized cybercrime, the use of algorithms in policing, cybervictimization, and the theories used to explain cybercrime. Graham and Smith make a conceptual distinction between a terrestrial, physical environment and a single digital environment produced through networked computers. Conceptualizing the online space as a distinct environment for social interaction links this text with assumptions made in the fields of urban sociology or rural criminology. Students in sociology and criminology will have a familiar entry point for understanding what may appear to be a technologically complex course of study. The authors organize all forms of cybercrime and cyberdeviance by applying a typology developed by David Wall: cybertrespass, cyberdeception, cyberviolence, and cyberpornography. This typology is simple enough for students just beginning their inquiry into cybercrime. Because it is based on legal categories of trespassing, fraud, violent crimes against persons, and moral transgressions it provides a solid foundation for deeper study. Taken together, Graham and Smith's application of a digital environment and Wall's cybercrime typology makes this an ideal upper level text for students in sociology and criminal justice. It is also an ideal introductory text for students within the emerging disciplines of cybercrime and cybersecurity.

Networked Music Cultures Raphaël Nowak, Andrew Whelan, 2016-09-16 This collection presents a range of essays on contemporary music distribution and consumption patterns and practices. The contributors to the collection use a variety of theoretical and methodological approaches, discussing the consequences and effects of the digital distribution of music as it is manifested in specific cultural contexts. The widespread circulation of music in digital form has far-reaching consequences: not least for how we understand the practices of sourcing and consuming music, the political economy of the music industries, and the relationships between format and aesthetics. Through close empirical engagement with a variety of contexts and analytical frames, the contributors to this collection demonstrate that the changes associated with networked music are always situationally specific, sometimes contentious, and often unexpected in their implications. With chapters covering topics such as the business models of streaming audio, policy and professional discourses around the changing digital music market, the creative affordances of format and circulation, and local practices of accessing and engaging with music in a range of

distinct cultural contexts, the book presents an overview of the themes, topics and approaches found in current social and cultural research on the relations between music and digital technology.

The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. - Learn how BitTorrent and peer-to-peer networks work.
- Set up a BitTorrent client and find files to download.
- Open, play, read, or run what you download.

Organised into eight sections - Approaches to Film and Politics; Film, Activism and Opposition; Film, Propaganda, Ideology and the State; The Politics of Mobility; Political Hollywood; Alternative and Independent Film and Politics; The Politics of Cine-geographies and The Politics of Documentary - this collection covers a broad range of topics, including: third cinema, cinema after 9/11, eco-activism, human rights, independent Chinese documentary, film festivals, manifestoes, film policies, film as a response to the post-2008 financial crisis, Soviet propaganda, the impact of neoliberalism on

Terrorism, Political Violence, and Extremism Chris E. Stout Ph.D., 2017-05-24 A must-read for psychologists—clinical and academic alike—as well as for political scientists, policy analysts, and others working in the realm of terrorism, political violence, and extremism, this book carefully explores the theories, observations, and approaches of authorities in the field and addresses how and why terrorism has perpetuated for so long. Terrorism is now a regular topic in the news rather than a rare or an unusual occurrence. The possibility of violent terrorist acts constitutes a legitimate safety concern, regardless of one's country of residence: no longer can anyone assume that their location is beyond the reach or outside the targeted areas of any number of terrorist groups. *Terrorism, Political Violence, and Extremism: New Psychology to Understand, Face, and Defuse the Threat* examines why the number of terrorist attacks has greatly increased since the attacks on September 11, 2001 occurred, including well-known events such as the Madrid train bombings (2004), the London Underground bombings of 2005, the San Bernardino and Paris attacks (2015), and countless others, particularly in the Middle East and Africa. Beyond providing a

careful and up-to-date assessment of the state of terrorism worldwide, which includes coverage of the religious and political origins of terrorist activities, the book pinpoints less-recognized and rarely studied aspects of terrorism, such as terrorism hysteria, sexuality, shame, and rape. The diverse perspectives within this unified volume are relevant to a breadth of subject areas, such as international psychology, military psychology, political science, political theory, religious studies, military theory, peace studies, military sciences, law enforcement, public health, sociology, anthropology, social work, law, and feminist theory.
