**Parenting the New Teen in the Age of Anxiety** Dr. John Duffy, 2019-09-15 A Guidebook for Parents Navigating the New Teen Years Learn about the “New Teen” and how to adjust your parenting approach. Kids are growing up with nearly unlimited access to social media and the internet, and unprecedented academic, social, and familial stressors. Starting as early as eight years old, children are exposed to information, thought, and emotion that they are developmentally unprepared to process. As a result, saving the typical “teen parenting” strategies for thirteen-year-olds is now years too late. Urgent advice for parents of teens. Dr. John Duffy’s parenting book is a new and necessary guide that addresses this hidden phenomenon of the changing teenage brain. Dr. Duffy, a nationally recognized expert in parenting for nearly twenty-five years, offers this book as a guide for parents raising children who are growing up quickly and dealing with unresolved adolescent issues that can lead to anxiety and depression. Unprecedented psychological suffering among our young and why it is occurring. A shift has taken place in how and when children develop. Because of the exposure they face, kids are emotionally overwhelmed at a young age, often continuing to search for a sense of self well into their twenties. Paradoxically, Dr. Duffy recognizes the good that comes with these challenges, such as the sense of justice instilled in teenagers starting at a young age. Readers of this book will: • Sort through the overwhelming circumstances of today’s teens and better understand the changing landscape of adolescence • Come away with a revised, conscious parenting plan more suited to addressing the current needs of the New Teen • Discover the joy in parenting again by reclaiming the role of your teen’s ally, guide, and consultant If you enjoyed parenting books such as *The Yes Brain*, *How to Raise an Adult*, *The Deepest Well*, and *The Conscious Parent*; then *Parenting the New Teen in the Age of Anxiety* should be next on your list!

**Facebook Nation** Newton Lee, 2012-09-15 President Barack Obama, in his 2011 State of the Union Address, called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer, Steven VanRoekel, said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.

*The Age of Surveillance Capitalism* Shoshana Zuboff, 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called surveillance capitalism, and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new behavioral futures markets, where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new means of behavioral modification. The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a Big Other operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled hive of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

*Parental Monitoring of Adolescents* Vincent Guilamo-Ramos, James Jaccard, Patricia Dittus, 2010 The close supervision of adolescents dramatically reduces the incidence of risky sexual behavior, drug and alcohol use, and other activities that could negatively affect one's health and well-being. Because of the strong correlation between parental monitoring and a child's welfare, social workers, psychologists, child development specialists, and other professionals who work with children now incorporate monitoring into their programs and practice. A definitive resource providing the best research and techniques for productive supervision within the home, this volume defines and develops the conceptual, methodological, and practical areas of parental monitoring and monitoring research, locating the right balance of closeness and supervision while also remaining sensitive to ethnic and socioeconomic backgrounds. Assembled by leading experts on childrearing and healthy parent-child communication, *Parental Monitoring of Adolescents* identifies the conditions that best

facilitate parental knowledge, ideal interventions for high-risk youth, and the factors that either help or hinder the monitoring of an adolescent's world. The volume also sets a course for future research, establishing a new framework that evaluates the nature and approach of monitoring within the parent-adolescent relationship and the particular social realities of everyday life.
