Helping Children to Improve Their Communication Skills Deborah Plummer, 2011 `This book encourages all those working with children with speech, language and communication needs to develop their creativity within a model of child-centred reflective practice, acknowledging that our interaction with children has an effect at many different levels. Therapists, teachers, teaching assistants and parents will find a wealth of practical suggestions and a solid foundation of research within these pages.' Mary Hampton, Chair, Association of Speech and Language Therapists in Independent Practice (ASLTIP), UK For many children, the act of communication that most of us take for granted can be a struggle, and communicating with others can become something to fear rather than enjoy. This creative book is full of fun and imaginative ideas to help children aged 4-11 with a speech or language delay or disorder to develop their communication abilities and skills. It is packed with activities and games tailored to help develop abilities such as effective listening, imagination and perseverance, and to build specific skills such as formulation of questions, categorising, taking turns and understanding non-verbal communication. Tips for personalising and shaping the activities are provided. A comprehensive theory section also covers how play can be a therapeutic tool for enhancing communication, and how to structure the emotional environment. Practical advice on working with groups and individuals and in different settings is also given. This activity book is an invaluable resource

not only for speech and language therapists and students, but also for parents, teachers, carers and other support staff who are looking for creative ways to promote speech and language development. Communication and Relationships Dr Rosina

McAlpine, 2014-12-16 Is your child a good communicator? Can your child make & keep the right kinds of friends? Do you want your child to be a good leader & team player? 12 step-by-step activities help parents support children to manage their emotions & develop effective & thoughtful communication which helps kids build strong relationships with family, friends & peers. Research shows that kids who have close friends are safer from bullying and are less likely to experience anxiety & depression than children who are loners. Kids feel safest and happiest when they have good friends. Kids are social by nature, so being able to manage their emotions, communicate & relate with others is a

valuable skill for building personal relationships with family & friends. It's heartbreaking for a parent to hear their child say; 'I've got no friends, nobody wants to be with me'. And, it's frightening for parents when their kids get in with the wrong crowd. Help your child make the right kinds of friends, know what it means to be a good friend & develop their communication skills so you can feel relaxed knowing they can make & keep good friends. One of the main ingredients of good communication is listening & managing emotions. Research shows that most people are not good listeners. However, we all want to be heard & understood, & it's for this reason that people who have good listening skills tend to have more successful interpersonal relationships & closer friendships. Understanding the complexity of social relationships requires more than just trial & error, or a simple understanding of 'manners'. Communication & social skills are developed over time, through a comprehensive program of instruction, interaction, experience, reflection & practice. At school kids have so many team projects and activities. Learning how to cooperate & work in a group, as well as understanding when to take the lead & when to follow, are valuable skills for ensuring your child's good education. Other social skills your kids will learn in this book include active listening, understanding how to avoid unnecessary conflict, managing & expressing anger in an effective way & how to be a good communicator. Each of these activities supports your child to develop strong relationships with their family & friends, as well as relate in a productive & harmonious way in life.

Jumpstarting Communication Skills in Children with Autism Mary Jane Weiss,Valbona Demiri,2011 When children's communication skills lag, all areas of learning and socialisation are affected. This book describes how an ABA approach can help children aged 2 to 10 years who have significant communication problems -- difficulty making requests, perseverative speech, a lack of fluency in conversational exchanges, trouble reading others' signals,

and more -- learn to understand and use speech and language. Enriched by case studies, this straightforward and information-packed book examines using the Applied Verbal Behaviour (AVB) method to tackle a wide variety of communication problems typical of children with autism. In a nutshell, AVB consists of observing and analysing a child's communication behaviours, breaking them down into functions, and then teaching and reinforcing needed skills. AVB strategies and the other methods profiled (PECS, sign language, video modelling, scripts, social stories, etc.,) can greatly boost a child's understanding of verbal and non-verbal communication, and help him improve his expressive abilities. The authors provide helpful suggestions on how parents can support this process and teach and reinforce communication skills at home. With this book parents and professionals can help young kids, both those with and without speech, expand their communication abilities and opportunities, enabling greater inclusion and progress in daily activities.

Talking with Kids Alison Mulvaney, 1995 Parents communicate many things to their children. As the first and most enduring role models, parents set goals and teach values. Successful communication between a parent and child is also one of the cornerstones of good family relationships, but it is not always easy. In all families, different patterns of communication develop, and sometimes they can break down, causing conflict and unhappiness. Using exercises, case studies and dialogue examples Alison Mulvaney examines classic communication patterns and the common barriers that prevent us from learning, changing and developing new skills. In positive and practical terms, she explains the fundamentals of

establishing good communication with children, including how to focus and use active listening, and how to implement win-win resolution strategies. In addition she shows how to motivate your children and build their self-esteem, and provides methods for teaching important values.
