Troubling Topics, Sacred Texts Roberta Sterman Sabbath,2021-10-04 Abrahamic scriptures serve as cultural pharmakon, prescribing what can act as both poison and remedy. This collection shows that their sometimes veiled but eternally powerful polemics can both destroy and build, exclude and include, and serve as the ultimate justification for cruelty or compassion. Here, scholars not only excavate these works for their formative and continuing cultural impact on communities, identities, and belief systems, they select some of the most troubling topics that global communities continue to navigate. Their analysis of both texts and their reception help explain how these texts promote norms and build collective identities. Rejecting the notion of the sacred realm as separate from the mundane realm and beyond critical challenge, this collection argues—both implicitly and sometimes transparently—for the presence of the sacred within

everyday life and open to challenge. The very rituals, prayers, and traditions that are deemed sacred interweave into our cultural systems in infinite ways. Together, these authors explore the dynamic nature of everyday life and the often-brutal power of these texts over everyday meaning.

Time to Write John Sylvester Lofty, 2015-02-10 Analyzes interviews with students, teachers, and administrators to develop a new set of literacies essential for student success in the digital age. To read John's work is to take on the role of a patient listener A book, like a piece of music, is scored for time, and I feel Time to Write is scored adagio. I believe that Time to Write can be read as a critique of [the] time-chopping approach to education and an argument for presence, for being fully open to experience, for being there To do good work, we must enter something like island time or what John calls existential time or what is sometimes called flow when we lose, at least temporarily, a sense of clock time. from the Foreword by Thomas Newkirk Twenty-five years ago, John Sylvester Lofty studied the influence of cultural time values on students' resistance to writing instruction in an isolated Maine fishing community. For the new edition of Time to Write, Lofty returned to the island to consider how social and

educational developments in the intervening years may have affected both local culture and attitudes toward education. Lofty discovered how the island time values that previously informed students' literacy learning have been transformed by outside influences, including technology, social media, and the influx of new residents from urban areas. Building on the ethnographic findings of the original study, the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication, and those of school-based literacy. Lofty examines the new literacies now essential for students in a technologically connected world, both those who aspire to continue the traditional island work of lobster fishing, and for the many who now choose to pursue other careers and attend college on the mainland.

Txtng: The Gr8 Db8 David Crystal,2009-07-09 This book takes a long hard look at the text-messaging phenomenon and its effects on literacy, language, and society. Young people who seem to spend much of their time texting sometimes appear unable or unwilling to write much else. Media outrage has ensued. It is bleak, bald, sad shorthand, writes a commentator in the UK Guardian. It masks dyslexia, poor spelling, and mental laziness. Exam answers using textese and reports that examiners find them acceptable have led to headlines in the tabloids and leaders in the qualities. Do young people text as much as people think? Do adults? Does texting spell the end of literacy? Is there a panic in the media? David Crystal looks at the evidence. He investigates how texting began and who uses it, why and what for. He shows how to

interpret its mix of pictograms, logograms, abbreviations, symbols, and wordplay, and how it works in different languages. He explores the ways similar devices have been used in different eras and discovers that the texting system of conveying sounds and meaning goes back a long way, all the way in fact to the origins of writing - and he concludes that far from hindering literacy, texting may turn out to help it.

Advances in Artificial Intelligence Balázs Kégl, Guy Lapalme, 2005-05-03 The 18th conference of the Canadian Society for the Computational Study of Intelligence (CSCSI) continued the success of its predecessors. This set of papers reflects the diversity of the Canadian AI community and its international partners. AI 2005 attracted 135 high-quality submissions: 64 from Canada and 71 from around the world. Of these, eight were written in French. All submitted papers were thoroughly reviewed by at least three members of the Program Committee. A total of 30 contributions, accepted as long papers, and 19 as short papers are included in this volume. We invited three distinguished researchers to give talks about their current research interests: Eric Brill from Microsoft Research, Craig Boutilier from the University of Toronto, and Henry Krautz from the University of Washington. The organization of such a successful conference benefited from the collaboration of many individuals. Foremost, we would like to express our appreciation to the Program Committee members and external referees, who provided timely and significant reviews. To manage the submission and reviewing process we used the Paperdyne system, which was developed by Dirk Peters. We owe special thanks to Kellogg Booth and Tricia d'Entremont for handling the local arrangements and registration. We also thank Bruce Spencer and members of the CSCSI executive for all their efforts in making AI 2005 a successful conference.

Reclaiming Conversation Sherry Turkle, 2016-10-04 “In a time in which the ways we communicate and connect are constantly changing, and not always for the better, Sherry Turkle provides a much needed voice of caution and reason to help explain what the f*** is going on.” —Aziz Ansari, author of *Modern Romance* Renowned media scholar Sherry Turkle investigates how a flight from conversation undermines our relationships, creativity, and productivity—and why reclaiming face-to-face conversation can help us regain lost ground. We live in a technological universe in which we are always communicating. And yet

we have sacrificed conversation for mere connection. Preeminent author and researcher Sherry Turkle has been studying digital culture for over thirty years. Long an enthusiast for its possibilities, here she investigates a troubling consequence: at work, at home, in politics, and in love, we find ways around conversation, tempted by the possibilities of a text or an email in which we don't have to look, listen, or reveal ourselves. We develop a taste for what mere connection offers. The dinner table falls silent as children compete with phones for their parents' attention. Friends learn strategies to keep conversations going when only a few people are looking up from their phones. At work, we retreat to our screens although it is conversation at the water cooler that increases not only productivity but commitment to work. Online, we only want to share opinions that our followers will agree with – a politics that shies away from the real conflicts and solutions of the public square. The case for conversation begins with the necessary conversations of solitude and self-reflection. They are endangered: these days, always connected, we see loneliness as a problem that technology should solve. Afraid of being alone, we rely on other people to give us a sense of ourselves, and our capacity for empathy and relationship suffers. We see the costs of the flight from conversation everywhere: conversation is the cornerstone for democracy and in business it is good for the bottom line. In the private sphere, it builds empathy, friendship, love, learning, and productivity. But there is good news: we are resilient. Conversation cures. Based on five years of research and interviews in homes, schools, and the workplace, Turkle argues that we have come to a better understanding of where our technology can and cannot take us and that the time is right to reclaim conversation. The most human—and humanizing—thing that we do. The virtues of person-to-person

conversation are timeless, and our most basic technology, talk, responds to our modern challenges. We have everything we need to start, we have each other. Turkle's latest book, *The Empathy Diaries* (3/2/21) is available now.

Paul and the Imperial Authorities at Thessalonica and Rome James R. Harrison, 2011 James R. Harrison investigates the collision between Paul's eschatological gospel and the Julio-Claudian conception of rule. The ruler's propaganda, with its claim about the 'eternal rule' of the imperial house over its subjects, embodied in idolatry of power that conflicted with Paul's proclamation of the reign of the risen Son of God over his world. This ideological conflict is examined in 1 and 2 Thessalonians and in Romans, exploring how Paul's eschatology intersected with the imperial cult in the Greek East and in the Latin West. A wide selection of evidence - literary, documentary, numismatic, iconographic, archeological - unveils the 'symbolic universe' of the Julio-Claudian rulers. This construction of social and cosmic reality stood at odds with the eschatological denouement of world history, which, in Paul's view, culminated in the arrival of God's new creation upon Christ's return as Lord of all. Paul exalted the Body of Christ over Nero's 'body of state', transferring to the risen and ascended Jesus many of the ruler's titles and to the Body of Christ many of the ruler's functions. Thus, for Paul, Christ's reign challenged the values of Roman society and transformed its hierarchical social relations through the Spirit.
