**Beginning C# Object-Oriented Programming** Dan Clark, 2011-08-12 Beginning C# Object-Oriented Programming brings you into the modern world of development as you master the fundamentals of programming with C# and learn to develop efficient, reusable, elegant code through the object-oriented programming (OOP) methodology. Take your skills out of the 20th century and into this one with Dan Clark's accessible, quick-paced guide to C# and object-oriented programming, completely updated for .NET 4.0 and C# 4.0. As you develop techniques and best practices for coding in C#, one of the world's most popular contemporary languages, you'll experience modeling a "real world" application through a case study, allowing you to see how both C# and OOP (a methodology you can use with any number of languages) come together to make your code reusable, modern, and efficient. With more than 30 fully hands-on activities, you'll discover how to transform a simple model of an application into a fully-functional C# project, including designing the user interface, implementing the business logic, and integrating with a relational database for data storage. Along the way, you will explore the .NET Framework, the creation of a Windows-based user interface, a web-based user interface, and service-oriented programming, all using Microsoft's industry-leading Visual Studio 2010, C#, Silverlight, the Entity Framework, and more.

**Karachi, You're Killing Me!** Saba Imtiaz, 2014-02-24 Ayesha is a twenty-something reporter in one of the world's most dangerous cities. Her assignments range from showing up at bomb sites and picking her way through scattered body parts to interviewing her boss's niece, the couture-cupcake designer. In between dicing with death and absurdity, Ayesha despairs over the likelihood of ever meeting a nice guy, someone like her old friend Saad, whose shoulder she cries on after every romantic misadventure. Her choices seem limited to narcissistic, adrenaline-chasing reporters who'll do anything to get their next story—to the spoilt offspring of the Karachi elite who'll do anything to cure their boredom. Her most pressing problem, however, is how to straighten her hair during the chronic power outages. *Karachi, You're Killing Me!* is Bridget Jones's Diary meets The Diary of a Social Butterfly—a comedy of manners in a city with none.

**The Politics of Contemporary Art Biennials** Panos Kompatsiaris, 2017-03-31 Contemporary art biennials are sites of prestige, innovation and experimentation, where the category of art is meant to be in perpetual motion, rearranged and redefined, opening itself to the world and its contradictions. They are sites of a seemingly peaceful cohabitation between the elitist and the popular, where the likes of Jeff Koons encounter the likes of Guy Debord, where Angela Davis and Frantz Fanon share the same

ground with neoliberal cultural policy makers and creative entrepreneurs. Building on the legacy of events that conjoin art, critical theory and counterculture, from Nova Convention to documenta X, the new biennial blends the modalities of protest with a neoliberal politics of creativity. This book examines a strained period for these high art institutions, a period when their politics are brought into question and often boycotted in the context of austerity, crisis and the rise of Occupy cultures. Using the 3rd Athens Biennale and the 7th Berlin Biennale as its main case studies, it looks at how the in-built tensions between the domains of art and politics take shape when spectacular displays attempt to operate as immediate activist sites. Drawing on ethnographic research and contemporary cultural theory, this book argues that biennials both denunciate the aesthetic as bourgeois category and simultaneously replicate and diffuse an exclusive sociability across social landscapes.

**The Races of Man** Joseph Deniker, 1906

**The Unmaking of Arab Socialism** Ali Kadri, 2016-10-01 Conditions of malnutrition, conflict, or a combination of both characterize many Arab countries, but this was not always so. As in much of the developing world, the immediate post-independence period represented an age of hope and relative prosperity. But imperialism did not sleep while these countries developed, and it soon intervened to destroy these post-independence achievements. The two principal defeats and losses of territory to Israel in 1967 and 1973, as well as the others that followed, left in their wake more than the destruction of assets and the loss of human lives: the Arab World lost its ideology of resistance. The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world's developmental descent from the

pinnacle of Arab socialism to its present desolate conditions through an examination of the post-colonial histories of Egypt, Syria, and Iraq.

**Quest for War** Mark Giaconia, 2016-11-01 A sobering and very human depiction of war, post war, military valor and heroism, passion, and success. Not your average war story. Quest for War spans a 15 year career in Special Operations and contains the only firsthand accounts of Operation Viking Hammer, the 2003 battle against Ansar Al Islam in Northern Iraq, and the Joint CIA/Green Beret Advanced Force Operations (AFO) prior to the shock and awe. Mark Giaconia is a two-time Green Beret valor award recipient and holds an MS in Software Engineering and a BA in English. DoD Pre-Publication Review Case Number: 15-S-2150

**Arabic Typography** Huda Smitshuijzen AbiFarès, 2001 In the twenty-first century, the widespread integration of computer technologies has brought text-based information into many facets of everyday life. This has caused an ever-growing interest in typography across many fields of visual communication, where text and letterform play a central role in disseminating social trends and reflecting the spirit of the times. Arabic Typography takes the reader through a comprehensive study of Arabic letterforms, starting with a concise historical overview of their development and styles, and proceeding to the latest design and technological advances. It attempts to establish the foundations for Arabic type-design by drawing lessons from past practices and aesthetic conventions, in order to retain the enduring traits that are of relevance for improvement and innovation in future type-design creations. Going beyond the historical facts to discuss current design issues pertaining to the creation and production of letterforms, it presents Arabic typographic design as an essential communication tool that should marry functionality and

legibility to aesthetic delight. This book will serve as a valuable reference on Arabic typography, and as an educational guide for design students, professionals and anyone who uses Arabic type and enjoys the visual appearance of this language and its letterforms.

*The Autonomous Administration of North and East Syria: Between A Rock and A Hard Place* Thomas Schmidinger, 2020-11-28 This book is based on papers presented at the conference. However, it is not a typical publication of academic conference proceedings because the topics are not completely congruent with those of the conference. Some lectures that could not be held due to travel restrictions related to the coronavirus pandemic were submitted as book contributions. In addition, I also wrote a short contribution on the Jewish history of the region, which has been often neglected in previous presentations of the region. The various authors for this volume have been intensively involved with the region in recent years. However, the authors do not only focus on the situation on the ground, but also on the international context of the autonomous administration. The conflict in Syria is no longer just a civil war, but a transnational conflict with important roles played not only by actors such as Russia or the USA, but also Turkey or Iran. Given the transnationality of the conflict and the role of the hegemonic powers, these authors share thoughtful analyses from very different perspectives. It is important to share these diverse views with the world so that the tragic conflict might become more comprehensible. This does not mean, however, that I necessarily advocate each particular position taken by the varied contributors to this book. The intent is to offer you multiple perspectives and certainly not a common narrative.

*Encyclopedia of the Ottoman Empire* Ga' bor A' goston, Bruce Alan

Masters,2010-05-21 Presents a comprehensive A-to-Z reference to the empire that once encompassed large parts of the modern-day Middle East, North Africa, and southeastern Europe.

*Freedom in the World 2020* Freedom House,2021-01-22 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 195 countries and fifteen territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

**Arsenic Contamination in the World** Susan Murcott,2012-09-30 Arsenic Contamination in the World: an International Sourcebook provides a global compendium of cited arsenic occurrences in the world as they affect public health. This book details arsenic contamination by source, region and arsenic-affected country. Arsenic is identified in 105 countries and territories, representing a larger database than any previous published work.

Sources of arsenic contamination are categorized as Anthropogenic, Geogenic, Volcanogenic, Coal, Mining and Petroleum-related. National, regional and international maps locate the affected areas and populations. A synthesis of critical country information includes an estimate of the exposed population of 226 million people worldwide. This reference work is an indispensable tool for medical doctors, public health workers, scientists, water experts, governments, industries, non-profit organizations and communities in identifying site-specific arsenic contamination. An extensive bibliography of peer-reviewed literature gives the reader important arsenic contamination locations as the first step towards remediation. This Sourcebook is updatable via an on-line annex which provides up-to-date information on new arsenic occurrences and developments. We invite readers to participate in updating this database at:

*Comparative Indo-European Linguistics* Robert Stephen Paul Beekes, 2011 This book gives a comprehensive introduction to Comparative Indo-European

Linguistics. It starts with a presentation of the languages of the family (from English and the other Germanic languages, the Celtic and Slavic languages, Latin, Greek and Sanskrit through Armenian and Albanian) and a discussion of the culture and origin of the Indo-Europeans, the speakers of the Indo-European proto-language. The reader is introduced into the nature of language change and the methods of reconstruction of older language stages, with many examples (from the Indo-European languages). A full description is given of the sound changes, which makes it possible to follow the origin of the different Indo-European languages step by step. This is followed by a discussion of the development of all the morphological categories of Proto-Indo-European. The book presents the latest in scholarly insights, like the laryngeal and glottalic theory, the accentuation, the ablaut patterns, and these are systematically integrated into the treatment. The text of this second edition has been corrected and updated by Michiel de Vaan. Sixty-six new exercises enable the student to practice the reconstruction of PIE phonology and morphology.
