Television Weathercasting Robert Henson, 1990
Will it rain tomorrow? That perennial question has made weather the most popular segment of local television news for years. Yet weathercasters do far more than simply convey the latest outlook. Depending on the circumstances, they may inject humor into the forecast (having a Lhasa apso pant and wag its tail during the forecast, for instance), warn of a life-threatening tornado or hurricane, or instruct viewers on the science behind weather. This book, the first critically to examine weathercasters and their craft, is based on years of research and covers both the lighthearted and serious aspects of television weather. Chapters include pioneer weathercasters of the 1940s and 1950s, technical advances, interaction with the National Weather Service, severe weather coverage, celebrities who began with television weather, and the status of women and minorities in weathercasting.

The USA Today Weather Book Jack Williams, 1997-07-14 Here's the most scientifically accurate, easy-to-understand weather guide ever. From the people who developed USA TODAY's style-setting weather page comes a revolutionary new approach to understanding how weather happens. Full-color graphics explain weather concepts from what makes the sky blue to how a tornado gets its twist.

Information Needs of Communities Steven Waldman, 2011-09 In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of

communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts and tables. This is a print on demand report.

Willard Garvey Maura McEnaney,2013 Willard Garvey lived at the center of 20th century history. Born in Dust Bowl country, as a teenager he road the rails at the height of the Great Depression to work in California's Grapes of Wrath orchards. He sailed on the Queen Mary to the European theater of World War II, where he was one of the first three American officers into Berlin following its fall, and attended the Potsdam Conference. A visionary businessman who dreamed of Every man a homeowner, Garvey pioneered affordable home ownership in developing countries at a time when few if any knew or cared about the millions living in slums worldwide. Despite revolutions, coups, and Anti-American persecution, his World Homes provided thousands of families in countries from South America to Asia the opportunity of moving onto and up the economic ladder.

Nightmare in Wichita Robert Beattie,2005-03-21 Lawyer Robert Beattie assisted the police during the thirty-year search for the BTK Strangler—and was instrumental in the long-awaited arrest of a suspect. Here he shares his inside knowledge of the case, from its terrifying beginnings to its most up-to-date developments. In 1974 a killer embarked on a murder spree in Wichita, Kansas, counting among his victims, men, women, and children. Longing to join the ranks of the Hillside Stranglers and Black Dahlia killer, the elusive sex murderer taunted authorities and the media with clues, puzzles, and obscene letters. Then in 1979, he vanished. The killings appeared

to have stopped, and one of the longest and most baffling manhunts in the annals of crime came to a dead end. But in 2004, a letter—and a grisly clue—arrived at a Wichita paper. And with it, a terrifying implication: BTK was back. The biggest shock of all came when they made their arrest. Now, from his unique vantage point, Robert Beattie tells the complete story of one of the most intriguing and horrifying serial murder cases in American history.

Cockpit Confidential Patrick Smith,2018-06-05 A New York Times bestseller For millions of people, travel by air is a confounding, uncomfortable, and even fearful experience. Patrick Smith, airline pilot and author of the popular website www.askthepilot.com, separates fact from fallacy and tells you everything you need to know: • How planes fly, and a revealing look at the men and women who fly them • Straight talk on turbulence, pilot training, and safety. • The real story on delays, congestion, and the dysfunction of the modern airport • The myths and misconceptions of cabin air and cockpit automation • Terrorism in perspective, and a provocative look at security • Airfares, seating woes, and the pitfalls of airline customer service • The colors and cultures

of the airlines we love to hate COCKPIT CONFIDENTIAL covers not only the nuts and bolts of flying, but the grand theater of air travel, from airport architecture to inflight service to the excitement of travel abroad. It's a thoughtful, funny, at times deeply personal look into the strange and misunderstood world of commercial flying. Patrick Smith is extraordinarily knowledgeable about modern aviation...the ideal seatmate, a companion, writer and explorer. -Boston Globe Anyone remotely afraid of flying should read this book, as should anyone who appreciates good writing and great information. -The New York Times, on ASK THE PILOT.

El Dorado Jay M. Price, 2005 In 1915, workers struck oil at a well in Butler County, Kansas, called Stapleton #1. Over the next several years, civilian and military demand for oil transformed what had once been the farm towns of Augusta, Towanda, and El Dorado (pronounced El Dor-AY-do in local parlance) into petroleum communities. Risk-taking entrepreneurs supported drilling and exploration that brought wealth to some and loss to others. Teams of geologists, using what were still novel and experimental techniques, fanned

out across the prairie to find the right places to drill. Workers found employment that was hard and dangerous but offered excitement and opportunity. Families of those workers set up new lives in company towns such as Oil Hill and Midian. Drilling, refining, and related industries supported a wide range of activities. Oil money financed the budding aviation industry in neighboring Wichita, which literally launched the resources from under the ground into the sky. While the petroleum industry changed in the years that followed, the Butler County oil boom has lived on in the companies, the people, and the very landscape of the region.
