Health in Rural Canada Judith C. Kulig, Allison M. Williams, 2011-12-06

Health research in Canada has mostly focused on urban areas, often overlooking the unique issues faced by Canadians living in rural and remote areas. This volume provides the first comprehensive overview of the state of rural health and health care in Canada. The contributors bring insights and methodologies from multiple disciplines and community-based research projects to a full spectrum of topics: health literacy, rural health-care delivery and training, Aboriginal health, web-based services and their application, rural palliative care, and rural health research and policy. Together, these multifaceted explorations of the dynamic relationship between health and place offer a valuable resource for understanding the special, ever-changing needs of rural communities.

Metmen in Wartime Morley K. Thomas,2001 Everybody's talking about the weather... Metmen in Wartime is a detailed account of the meteorological services in practice in Canada during World War II. Why were forecasts so crucial during the war? For anti-submarine warfare and convoy protection operations from bases along the Atlantic and Pacific coasts. But Metmen is also a thorough examination of the men behind the forecasts: the nearly 400 science graduates who became metmen and were stationed at flying training schools. This book explains the importance of aviation weather forecasts and instruction in meteorology for student pilots at the Royal Canadian Air Force stations established under the British Commonwealth Air Training Plan. Cooperation with the United States military weather services is also

examined.

CCF Colonialism in Northern Saskatchewan David Quiring, 2007-10-01
Often remembered for its humanitarian platform and its pioneering social programs, Saskatchewan's Cooperative Commonwealth Federation (CCF) wrought a much less scrutinized legacy in the northern regions of the province during the twenty years it governed. Until the 1940s churches, fur traders, and other wealthy outsiders held uncontested control over Saskatchewan's northern region. Following its rise to power in 1944, the CCF undertook aggressive efforts to unseat these traditional powers and to install a new socialist economy and society in largely Aboriginal northern communities. The next two decades brought major changes to the region as well-meaning government planners grossly misjudged the challenges that confronted the north and failed to implement programs that would meet northern needs. As the CCF's efforts to modernize and assimilate northern people met with frustration, it was the northern people themselves that inevitably suffered from the fallout of this failure. In an elegantly written history that documents the colonial relationship between the CCF and the Saskatchewan north, David M. Quiring draws on extensive archival research and oral history to offer a fresh look at the CCF era. This examination will find a welcome audience among

historians of the north, Aboriginal scholars, and general readers.

Saskatchewan Bernard D. Thraves, 2007 Saskatchewan: Geographic Perspectives is Saskatchewan's first comprehensive geography textbook. Its major sections cover these themes: Physical Geography, Historical and Cultural Geography, Population and Settlement, and Economic Geography. Eighteen chapters provide an excellent overview of the province from a variety of geographic perspectives, while twenty-nine focus studies explore specific topics in depth ... presents the work of forty-three scholars and is well-illustrated, with more than 150 figures, 70 tables, and over 60 full-colour plates. It also includes full reference lists and a comprehensive index. Although prepared specifically for use in post-secondary geography programs, this book is also appropriate for high school research projects and for anyone interested in the many facets of this vast and varied province.--Googlebooks.

Climate Change [3 volumes] Bruce E. Johansen, 2017-09-15 This three-volume set presents entries and primary sources that will impress on readers that what we do—or don't do—today regarding climate change will dramatically influence what life on this planet will be like for untold numbers of generations. How are the behaviors of birds, butterflies, and other migratory animals connected to climate change? What does the term thermal inertia mean, and what does this geophysical effect have on predicting what the planet's future will be like? What is the context for the effects we are seeing on various forms of animal life, from migrating birds to polar bears to

mosquitoes that transmit Zika and other diseases? Climate Change: An Encyclopedia of Science, Society, and Solutions combines entries describing Earth's variable climatic history, references to scientific literature, weather record data, and selected primary documents to present readers with a comprehensive account of global warming's effects worldwide. By examining verifiable, quantitative information such as the frequency and intensity of hurricanes and changes in the hydrological cycle, as well as clear patterns and trends of alternating droughts and deluges and wildfires, melting ice, and rising seas, readers will be able to understand why scientists are so concerned about the future of our climate. Researchers will benefit from detailed explanations of scientific topics such as thermal inertia, feedbacks, and tipping points; and receive invaluable context on the role of energy use in climate change, including automobiles and air travel. Readers will learn about the role of China in the current global climate and in the future; the widespread effects of climate change on agriculture; and how indigenous peoples' lives are being impacted, from drought and the Navajos to hunters' lives in the Arctic. The work concludes with thought-provoking debates regarding potential solutions, from wind power and solar power to geo-engineering.

Nurse Stuck in the Snow Annette Wetherly, 2008-09-17 A personal memoir, by a seasoned nurse practitioner living and working independently in remote, isolated indigenous communities of the Arctic, Labrador, Western and Northern Canada. Graphically shows self-reliance, descriptions of local cultures and personalities and the understanding of the health care needs of the indigenous people and how their health has been affected by historical happenings. She worked onboard ships and visited lighthouses and treated animals. In between working contacts in the north she participates in volunteer health care in indigenous Latin American communities and exercises her knowledge of language, culture and the desire to travel. Returning to urban living in Victoria at sedentary occupation, which involved committee work with employment equity and multiculturalism. Magnetism and Call of the North draws her back twice demonstrating her love of challenge and adventure. An exciting, engaging, entertaining, instructive and stimulating book, which some read twice and others cannot put down.
