**The Doctrine of Salvation** Charles Horne,2021-03-15 Is anything more important than understanding eternal salvation? When it comes down to it, all human beings can be divided into two categories: the saved and the unsaved. Every person longs to find the path to eternal life. Many different paths are tried. But what does the Word of God have to say about it? In *The Doctrine of Salvation*, Charles Horne explains the basics of this important biblical doctrine. Why is there a need for salvation? What is its basis? What are its results? How can you be assured of it? And how does salvation culminate in eternal life? Using clear and precise language, Dr. Horne lays out the biblical evidence. "The doctrine of salvation is central to the message of Scripture," he writes. "From Genesis 3 to Revelation 22 we witness the unfolding drama of redemption." May this book open your eyes to the greatest story ever told!

**China Rich Girlfriend** Kevin Kwan,2015-06-16 NEW YORK TIMES BESTSELLER • The author of the international sensation *Crazy Rich Asians* delivers a "snarky ... wicked ... funny" follow-up (*The New York Times*) that's a deliciously fun romantic comedy of family, fortune, and fame in Mainland China. It's the eve of Rachel Chu's wedding, and she should be over the moon. She has a flawless Asscher-cut diamond, a wedding dress she loves, and a fiancé willing to thwart his meddling relatives and give up one of the biggest fortunes in Asia in order to marry her. Still, Rachel mourns the fact that her birth father, a man she never knew, won't be there to walk her down the aisle. Then a chance accident reveals his identity. Suddenly, Rachel is drawn into a dizzying world of Shanghai splendor, a world where people attend church in a penthouse, where exotic cars race down the boulevard, and where people aren't just crazy rich ... they're China rich.

**Sentiment Analysis and Opinion Mining** Bing Liu,2022-05-31 Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online. Table of Contents: Preface / Sentiment Analysis: A Fascinating Problem / The Problem of Sentiment Analysis / Document Sentiment Classification / Sentence Subjectivity and Sentiment Classification / Aspect-Based Sentiment Analysis / Sentiment Lexicon Generation / Opinion Summarization / Analysis of Comparative Opinions / Opinion Search and Retrieval / Opinion Spam Detection / Quality of Reviews / Concluding Remarks / Bibliography / Author Biography

**Trade Like Jesse Livermore** Richard Smitten,2013-08-12 The secret to Jesse Livermore's legendary trading success Although he began his career in 1892, Jesse Livermore is still considered to be one of the world's greatest traders. In life and in death, Livermore has always been a

controversial figure and his methods held up as a model for traders of all generations. Through 45 years of trading and market observation, Jesse Livermore determined that stocks and stock markets move in a series of repetitive patterns. He then developed a series of unique tools, using secret formulas and equations that allowed him to identify and interpret the movement in stocks with uncanny reliability. In *Trade Like Jesse Livermore*, author Richard Smitten explores the technical aspects of Livermore's trading approach and shows readers how they can use these techniques to garner the success Livermore once did. *Trade Like Jesse Livermore* covers every aspect of Livermore's trading methods, from discerning market behavior and trends such as top-down and tandem trading to paying close attention to indicators such as one-day reversals and spikes. With this book as their guide, readers can learn how to trade profitably without fear or greed. Richard Smitten (New Orleans, LA) is the author of numerous books including *Jesse Livermore: World's Greatest Stock Trader* (0-471-02326-4), *The Godmother*, *Capital Crimes*, and *Legal Tender*.

*Law in Modern Society* Roberto Mangabeira Unger, 1977-07 *Law in Modern Society* is a comparative study of the place of law in societies as well as a criticism of social theory. Under what conditions do different kinds of law emerge? What are the bases of the rule of law ideal that marks advanced liberal, capitalist societies? What can the study of law teach us about social hierarchy and moral vision in these societies, and, indeed, about the specificity of Western civilization? Why do we find it necessary to struggle for the rule of law and impossible to achieve it? What political possibilities are closed or opened by present-day changes in the established styles of legality and legal thought? Unger deals with these questions in a broad range of historical settings. But he also relates them to the central issues of social theory: the method of explanation, the conditions of social order, and the nature of 'modern' society. the book argues that to resolve its own internal dilemmas the science of society must once again become both metaphysical and political.

**One Earth, Many Religions** Paul F. Knitter, One of the world's foremost exponents of the pluralist position as the most adequate Christian theological account of religious diversity turns to a new and urgent issue facing the community of world religions. For Paul Knitter, the spectre of environmental and social injustice looms over any serious discussion of humankind's future. As urgent as it is to have peace among the world's believers to achieve peace among nations, it is urgent that these communities unite in understanding and defending of the earth. In *One Earth Many Religions* Knitter looks back at his own dialogical odyssey and forward to the way that interfaith encounters and dialogue must focus attention on new challenges. Nothing less than enlisting the commitment of the world's religions on the task of saving our common home will do. In making that case, Knitter makes clear the complex structures political, economic, and social as well as religious - that face those who approach this task. While articulating a this-worldly soteriology necessary to overcome our eco-human plight, Knitter offers practical considerations on actions and projects that have and should have been undertaken to stem the tide of environmental and human suffering. The global crisis is both at the center of *One Earth Many Religions* and a test case for Knitter and others engaged in the dialogue of religions. Can religious differences concerning the nature of the transcendent themselves be transcended in order to promote eco-human well-being? The issue seems basic and clear if interreligious dialogue cannot effect such a change, then one must question whether religion is of any use whatsoever.

**UAV Photogrammetry and Remote Sensing** Fernando Carvajal-Ramírez, Francisco Agüera-Vega, Patricio Martínez-Carricondo, 2021-09-06 The concept of remote sensing as a way of capturing information from an object without making contact with it has, until recently, been exclusively focused on the use of Earth observation satellites. The emergence of unmanned aerial vehicles

(UAV) with Global Navigation Satellite System (GNSS) controlled navigation and sensor-carrying capabilities has increased the number of publications related to new remote sensing from much closer distances. Previous knowledge about the behavior of the Earth's surface under the incidence different wavelengths of energy has been successfully applied to a large amount of data recorded from UAVs, thereby increasing the spatial and temporal resolution of the products obtained. More specifically, the ability of UAVs to be positioned in the air at pre-programmed coordinate points; to track flight paths; and in any case, to record the coordinates of the sensor position at the time of the shot and at the pitch, yaw, and roll angles have opened an interesting field of applications for low-altitude aerial photogrammetry, known as UAV photogrammetry. In addition, photogrammetric data processing has been improved thanks to the combination of new algorithms, e.g., structure from motion (SfM), which solves the collinearity equations without the need for any control point, producing a cloud of points referenced to an arbitrary coordinate system and a full camera calibration, and the multi-view stereopsis (MVS) algorithm, which applies an expanding procedure of sparse set of matched keypoints in order to obtain a dense point cloud. The set of technical advances described above allows for geometric modeling of terrain surfaces with high accuracy, minimizing the need for topographic campaigns for georeferencing of such products. This Special Issue aims to compile some applications realized thanks to the synergies established between new remote sensing from close distances and UAV photogrammetry.

*Distributed Algorithms* Wan Fokkink, 2013-12-06 A comprehensive guide to distributed algorithms that emphasizes examples and exercises rather than mathematical argumentation. This book offers students and researchers a guide to distributed algorithms that emphasizes examples and exercises rather than the intricacies of mathematical models. It avoids mathematical argumentation, often a stumbling block for students, teaching algorithmic thought rather than proofs and logic. This approach allows the student to learn a large number of algorithms within a relatively short span of time. Algorithms are explained through brief, informal descriptions, illuminating examples, and practical exercises. The examples and exercises allow readers to understand algorithms intuitively and from different perspectives. Proof sketches, arguing the correctness of an algorithm or explaining the idea behind fundamental results, are also included. An appendix offers pseudocode descriptions of many algorithms. Distributed algorithms are performed by a collection of computers that send messages to each other or by multiple software threads that use the same shared memory. The algorithms presented in the book are for the most part “classics,” selected because they shed light on the algorithmic design of distributed systems or on key issues in distributed computing and concurrent programming. Distributed Algorithms can be used in courses for upper-level undergraduates or graduate students in computer science, or as a reference for researchers in the field.

*Global Trends 2025: A Transformed World* Office of the Director of National Intelligence (U.S.), 2013-08-15 Global Trends 2025: A Transformed World is the fourth unclassified report prepared by the National Intelligence Council (NIC) in recent years that takes a long-term view of the future. It offers a fresh look at how key global trends might develop over the next 15 years to influence world events. Our report is not meant to be an exercise in prediction or crystal ball-gazing. Mindful that there are many possible futures, we offer a range of possibilities and potential discontinuities, as a way of opening our minds to developments we might otherwise miss. **Supernova** Dewi Lestari, *Supernova: The Knight, The Princess and the Falling Star* presents a series of intertwined and unconventional love stories, straight and gay, with a bit of science and spirituality added to the mix. The major characters are young, urban, and technologically highly aware. They are caught up in major forms of contemporary social conflict. The work has been highly acclaimed. The poet Taufiq Ismail has written: A renewal has taken place in Indonesian literature over the past decade. *Supernova* is an intelligent, unique and truly exciting exploration of science, spirituality and the nature of love. The literary critic Jacob Soemardjo suggests: This is an attractive novel by a young writer. It is an intellectual work in the form of a work of pop art, set in the real

world. It opposes old values with new ways of understanding, so that readers can see the world in a different way.

**Takeibo** Fumiko Chiba,2017-11-23 People in Japan are masters of minimal living, able to make do with less in all aspects of life, whether it's de-cluttering personal belongings or savvy seasonal cooking. But at the heart of all this is the takeibo- the budgeting journal used to set savings goals and track spending. The premise is simple- at the beginning of each month you sit down with your takeibo and think mindfully about how much you would like to save and what you will need to do in order to reach your goal. The takeibo then gives you space to jot down your weekly spending and reflect on the month just gone. The simple act of completing your takeibo ensures that saving is a part of your everyday life, while also giving you the opportunity to reflect and improve every month.

Medical Records Manual ,2002 This manual is aimed at helping medical record workers in the development and management of medical records services of health care facilities in developing countries in an effective and efficient manner. It has not been designed as an introductory text to medical record management, but rather as an aid to medical record officers (MROs) and medical record clerks by describing appropriate systems for Medical Records Departments in developing countries. It covers manual procedures and may be used as an adjunct to computerized systems. It does not provide all of the options for medical record management, but it does provide one option in each area for the management of medical records in developing countries. A list the textbooks that provide detailed information on medical record management is also provided.
