Journey To The Promised Land Nancy Blackburn,2018-12-07 The people in the story are Hebrew and they live on Love Boot Island. They make their living by manufacturing boots from the skins of animals and other materials. They called the boots 'Love Boots' and they worked night and day making them. The symbol of the love boot, a small pink heart, was placed at the top on the outside of each boot. The boots were shipped to all parts of the world, and the people bought and loved them because of their design, durability, comfort and colors. Males and females of all ages wore their boots to parties, school, and work. For whatever the occasion, there were boots. One day it quit raining. Days passed, and still there wasn't any rain. There was no water for the gardens and they dried up. The fresh green grass dried up and the land turned all brown. The trees did not have leaves on them anymore. Where the creeks and rivers once flowed, there was dried cracked mud. Everything was a sad sight because there wasn't any more water. The people were desperate as they could not work and eat any more. Mommies and daddies went to the grocery store, but there was no more food on the shelves or in the land and the people were hungry, as the 'Great Famine' covered the land. In order to save their 777 famine babies, read the story to find out what the Hebrew people did. This is a family story and third graders and over will enjoy the reading.

Southern African Development Community Land Issues Ben Chigara,2013-03-01 This book constitutes volume one of a two volume examination of development community land issues in Southern Africa. In this volume, Ben Chigara undertakes a holistic inter-disciplinary evaluation of the legitimacy of colonial and emergent post-colonial rule property rights in affected States of the Southern African Development Community (SADC). It particularly focuses on intensifying litigation in national courts, the SADC Tribunal, and more recently the Washington based International Centre for the Settlement of Investment Disputes (ICSID) regarding counter claims to title to property. The book examines cultural, economic and political drivers at the core of SADC land issues, focusing on their

significance and potential to contribute to the discovery of a new, sustainable land relations policy that guarantees social justice in the distribution of all the advantages and disadvantages relating to the allocation and use of land. Chigara shows that persistent systematic administrative failures by pre-colonial, colonial and post-colonial authorities have made for a very complex challenge that requires Solomonic tools that neither the Courts alone, nor human rights centric morality alone could resolutely attend. The book recommends a sophisticated systematic new approach to SADC land issues, which is developed in volume two, *Re-conceiving Property Rights in the New Millennium*. This book will be of great interest to students and researchers of Property and Conveyancing Law, Human Rights Law and Land Law.

This Land Is Not for Sale Lotte Meinert, Susan Reynolds Whyte, 2023 Although violent conflict has declined in northern Uganda, tensions and mistrust concerning land have increased. Residents try to deal with acquisitions by investors and exclusions from forests and wildlife reserves. Land wrangles among neighbours and relatives are widespread. The growing commodification of land challenges ideals of entrustment for future generations. Using extended case studies, collaborating researchers analyze the principles and practices that shape access to land. Contributors examine the multiplicity of land claims, the nature of transactions and the management of conflicts. They show how access to land is governed through intimate relations of gender, generation and belonging.
