Wrestling with Alligators, Prophets, and Theologians C. Peter Wagner,2011-09-01 For the past half-century, C. Peter Wagner has been at the leading edge of the key spiritual paradigm shifts that have been accompanied by major moves of the Holy Spirit. In the 1960s the missionary movement in South America was at its peak--and Dr. Wagner was there. In the 1970s he was a recognized authority in the church-growth movement. In the 1980s he taught a popular course at Fuller Seminary with Vineyard movement leader John Wimber that advocated praying healing for the sick, spiritual mapping, identificational repentance and spiritual warfare. Dr. Wagner coined the phrase Third Wave to describe this fresh move of the Holy Spirit--the impact of which is still being felt today. In the 1990s he became a leader of the New Apostolic Reformation, and in the new millennium he has championed the Dominion Mandate, adopting the Seven Mountain (or 7M) template for reclaiming the culture for God's kingdom. For five decades, Dr. Wagner has led the church from one great move of God to the next, riding the wave of the Spirit through changes he never imagined when he first answered God's call to ministry. In *Wrestling with Alligators, Prophets, and Theologians*, Wagner tells, for the first time, his personal story of ongoing transformation. Readers will get a close-up view of the seismic shifts in the church's recent history, through the eyes of one of the only people to have seen it all unfold.

The Remnants Reinhold J.E. Lohsen,2018-10-17 The Remnants tells how Jewish composer and Shoah (Holocaust) survivor A. Peter Gary was captured by the Nazis at age seventeen and incarcerated in three concentration camps during WWII. As well, it tells the touching story of Peter's friendship with two former members of the Hitler Youth, all in their late eighties. Friends with all three, the author project-managed the Première of Peter's Oratorio, A 20th Century Passion, performed in Israel by a world renowned conductor, the crowning achievement of Peter's early years of suffering under the Nazi Dictatorship. A dramatic reading of his Libretto about the Shoah was performed by graduating students at several high schools. The book also argues for an alternative view of Judas's role in history in line with a number of scholars and theologians. It delves into biblical translation problems and Christianity's burying of its Jewish roots, always with a hope for a Judeo Christian reconciliation.

Hypermedia Learning Environments Piet A.M. Kommers,Scott Grabinger,Joanna C. Dunlap,2012-10-12 Hypermedia and multimedia have penetrated the world of computer games, Internet, and CD-ROM based reference manuals. However, the fields of education, schooling, and training ask more specific benefits from them. This book provides practical approaches to transform these media into learning tools. Crucial helping steps include the migration from expository to exploratory learning strategies, the integration of collaborative learning practices in plenary and individualistic teaching styles, and the evolution from test-driven to experience-oriented training. This volume has three goals: * to discuss the concepts of hypermedia, multimedia, and hypertext and review pertinent research lines; * to provide guidelines and suggestions for developing multimedia applications; and * to place technology within a broader context of education and training through a discussion of rich environments for active learning (REALs). The book takes a developmental focus to helpf readers set up and manage the process of developing a multimedia application. It is not a technical or a how-to manual on working with video, sound, digitized graphics, or computer code. The text takes a unique approach to the idea of media-- viewing media as delivery systems: if video is called for, use it; if sound will help in an application, use it. The fundamental guidelines presented here are usually not media specific. Media works only within the strategies with which they are used. Aimed at practitioners--people who teach about or develop multimedia and hypermedia applications--this volume carefully examines the main components and issues in developing applications. It provides suggestions and heuristics for sound, fundamental design processes.
