‘A Clock for the Rooms’: The Horological Legacy of the Library Company of Philadelphia Jay Robert Stiefel,2006

Einstein's Legacy Julian Schwinger,2012-05-24 A Nobel Laureate relates the fascinating story of Einstein and relativity theory in well-illustrated, nontechnical terms, discussing the meaning of time, gravity and its effect on light, the curving of space-time, more.

The Legacy Tree Herman Jasper,2021-07-28 This story takes a look at the effect of racial injustice on the mind of a Black seventeen-year-old, above-average high school graduate in Philadelphia who finds himself caught between two worlds. Disillusioned by what he sees as unjustified murders of African American men and women by people sworn to protect and serve, Kenny makes the decision to explore the fast money option of drug dealing. He barely escapes a police sting operation, and as a result, is sent to spend the summer with family members who live on a farm in Georgia. Kenny meets some like-minded young people in Georgia which presents the opportunity to continue his pursuit of fast money while his family endeavors to turn him away from the streets and toward higher education. Will they be able to overcome his righteous indignation and cynicism in time to save him from prison or worse?

Lady Bountiful's Legacy to Her Family and Friends John Timbs,1868

A French Huguenot Legacy Debra Guiou(n) Stufflebean,2011-08-23 From the Knights Templar to serving in the militia under George Washington, the Huguenot's have been keepers of the faith, fighters for freedom, and left their mark on history. The Huguenots were massacred in France in the 17th century when the Royals declared one king, one law, one religion. Fleeing for their lives, and for the right to worship as Protestants, many walked away from lives of nobility. Jacques Guyon settled on Staten Island; Louis Guion settled first in Rye, then New Rochelle, NY. Follow their journeys and the lives of their descendants in a true French-American saga. Of particular interest to genealogists, with a supporting appendix, especially for those families who intermarried with the Guion's.

A Legacy of Historical Gleanings ,1875

TIME in SCIENCE and LIFE the Greatest Legacy of Albert Einstein Samuel K. K. Blankson,2009-04-30 PaperbackIn 1905, when Albert Einstein introduced a new theory of time as space-time, otherwise known as âlocal timeâ, some philosophers considered it as (probably) his greatest discovery. The reason, evidently, is that time is more important than anything else except life itself. But what, essentially, is it? Einstein did not give us the philosophical interpretation of space-time. That is a task for the philosophers. Samuel K. K. Blankson, the Ghanaian philosopher, gives one of the most lucid and logical interpretations of what Einstein called âtime, pure and simpleâ. The strange and extremely technical phenomenon known as âtime dilationâ, which inspired Einstein to discover his special theory of relativity, is lucidly explained. The reader will find the answer simple and most surprising, and, it is hoped, satisfactory too.

Huygens' Legacy ,2004

Lethal Legacy Amanda McKinney,2017-01-13 After watching her father get brutally murdered, young Victoria Henry turned to painting to escape the painful memories of her childhood. Over three decades later, a house fire destroys her Texas mansion and takes the life of her cheating husband, unleashing a series of events that open up the dark past she’s tried so desperately to forget. Former Navy SEAL, Police Lieutenant Danny Dabrowski, suspects arson and while questioning the sexy, alluring wife of the late William King, he becomes suspicious when Victoria shows no signs of emotion other than a fiery attitude toward him. As Danny’s perception of Victoria becomes clouded by desire, all bets are off when he finds out that the past and present are linked to a dangerous cartel that only wants one thing from Victoria. The one thing she doesn’t even know exists. And they’re willing to kill for it.

Manchester's Military Legacy Steven Dickens,2017-11-30 The establishment of the Roman fort of Mamucium in AD79 is the first known record of any military construction, or presence, in the area that is now the Castlefield district of the city. The Roman auxiliary units posted here used the fort as a garrison, located at Mamucium for the purpose of protecting the Roman road from Chester (Deva Victrix) to York (Eboracum). The site was previously occupied, as a defensive hill fort, by the ancient Britons, or Brigantes, who were native to the area.The next epoch of military activity at Manchester occurred in the Civil War and the Siege of Manchester in 1642. Manchesters declaration as a Parliamentarian town had far-reaching consequences, in terms of its military legacy, on the voting rights of Mancunians. Upon his restoration Charles II removed Manchesters two MPs from Parliament and Manchester was not to receive any political representation until the Reform Act of 1832.The Peterloo Massacre, of August 1819, was the scene of a mass rally brought about by a desire to repeal the Corn Laws, introduce universal suffrage and reform other repressive legislation. The cavalry charge which resulted in the deaths of an estimated eighteen innocent protesters and the wounding of over 500, took place at St. Peters Field (now Square) in the heart of the city. Its legacy resulted in the establishment of the Manchester Guardian and the rise of radical freethinking in the city, not always welcomed by those in authority.Both World Wars have had a profound influence on the city. The establishment of the Manchester Regiment is detailed and later the Manchester Pals are recalled through the pages of the local press. Heaton Park became their base, whilst General Kitchener visited the city, in order to boost recruitment. Later the Luftwaffes bombing campaign of December 1940, the Manchester Blitz, left the city with a legacy that has changed it beyond all recognition into the twenty-first century.

John Marchmont's Legacy Mary Elizabeth Braddon,1863

John Marchmont's Legacy (Complete) Mary Elizabeth Braddon,1878 There are few men who, looking back at the long story of their lives, cannot point to one page in the record of the past at which the actual history of life began. The page may come in the very middle of the book, perhaps; perhaps almost at the end. But let it come where it will, it is, after all, only the actual commencement. At an appointed hour in man's existence, the overture which has been going on ever since he was born is brought to a sudden close by the sharp vibration of the prompter's signal-bell; the curtain rises, and the drama of life begins. Very insignificant sometimes are the first scenes of the play,--common-place, trite, wearisome; but watch them closely, and interwoven with every word, dimly recognisable in every action, may be seen the awful hand of Destiny. The story has begun: already we, the spectators, can make vague guesses at the plot, and predicate the solemn climax; it is only the actors who are ignorant of the meaning of their several parts, and who are stupidly reckless of the obvious catastrophe. The story of young Arundel's life began when he was a light-hearted, heedless lad of seventeen, newly escaped for a brief interval from the care of his pastors and masters. The lad had come to London on a Christmas visit to his father's sister, a worldly-minded widow, with a great many sons and daughters, and an income only large enough to enable her to keep up the appearances of wealth essential to the family pride of one of the Arundels of Dangerfield. Laura Arundel had married a Colonel Mostyn, of the East India Company's service, and had returned from India after a wandering life of some years, leaving her dead husband behind her, and bringing away with her five daughters and three sons, most of whom had been born under canvas. Mrs. Mostyn bore her troubles bravely, and contrived to do more with her pension, and an additional income of four hundred a year from a small fortune of her own, than the most consummate womanly management can often achieve. Her house in Montague Square was elegantly furnished, her daughters were exquisitely dressed, her sons sensibly educated, her dinners well cooked. She was not an agreeable woman; she was perhaps, if any thing, too sensible,--so very sensible as to be obviously intolerant of anything like folly in others. She was a good mother; but by no means an indulgent one. She expected her sons to succeed in life, and her daughters to marry rich men; and would have had little patience with any disappointment in either of these reasonable expectations. She was attached to her brother Christopher Arundel, and she was very well pleased to spend the autumn months at Dangerfield, where the hunting-breakfasts gave her daughters an

excellent platform for the exhibition of charming demi-toilettes and social and domestic graces, perhaps more dangerous to the susceptible hearts of rich young squires than the fascinations of a valse à deux temps or an Italian scena.

The Measure of Manhattan: The Tumultuous Career and Surprising Legacy of John Randel, Jr., Cartographer, Surveyor, Inventor Marguerite Holloway, 2013-02-18 “Randel is endlessly fascinating, and Holloway’s biography tells his life with great skill.”—Steve Weinberg, USA Today John Randel Jr. (1787–1865) was an eccentric and flamboyant surveyor. Renowned for his inventiveness as well as for his bombast and irascibility, Randel was central to Manhattan’s development but died in financial ruin. Telling Randel’s engrossing and dramatic life story for the first time, this eye-opening biography introduces an unheralded pioneer of American engineering and mapmaking. Charged with “gridding” what was then an undeveloped, hilly island, Randel recorded the contours of Manhattan down to the rocks on its shores. He was obsessed with accuracy and steeped in the values of the Enlightenment, in which math and science promised dominion over nature. The result was a series of maps, astonishing in their detail and precision, which undergird our knowledge about the island today. During his varied career Randel created surveying devices, designed an early elevated subway, and proposed a controversial alternative route for the Erie Canal—winning him admirers and enemies. The Measure of Manhattan is more than just the life of an unrecognized engineer. It is about the ways in which surveying and cartography changed the ground beneath our feet. Bringing Randel’s story into the present, Holloway travels with contemporary surveyors and scientists trying to envision Manhattan as a wild island once again. Illustrated with dozens of historical images and antique maps, The Measure of Manhattan is an absorbing story of a fascinating man that captures the era when Manhattan—indeed, the entire country—still seemed new, the moment before canals and railroads helped draw a grid across the American landscape.

Letters from the Big Bend: Legacy of a Pioneer Diane Garner, 2011-06-01 March 4, 1911). . . and even at night when I cross the turbulent waters of the Rio Grande and listen to the music her waters make in their mad rush to the sea, it seems to say, I pass on and on, but not you. Lonely musings and vivid accounts of daily life along the Mexican border provide an intriguing glimpse into frontier life in Texas during the troubled times of the Mexican Revolution. Jim Landrum was a successful lawyer when he left Florida in 1908 to recover from tuberculosis in the West. After a regimen of mercury treatments, he settled in the Big Bend and gradually regained his strength. He found a place in the border community as a trading post manager, justice of the peace, postmaster, and medic and married the daughter of a respected Mexican family. Frequent letters to family in Pensacola shared his joys and problems. The most devastating of these to be falsely accused of a crime with no hope for a fair trial, he joined Carranzas Constitutionistas as a captain surgeon. In 1914, he rode with soldiers into Mexico and disappeared. The baby he and his wife expected would one day be called The Cinderella of Big Bend.

Longitude's Legacy James Harrison of Hull 1789-1875 Chris McKay, 2015-04-09 The story of John Harrison is well known. How he created an accurate regulator, made the sea clocks H1, H2, H3 and H4, has been documented in academic books, in popular literature, film and how he was the father of the marine chronometer. His quest to win the 20,000 prize, as defined in the Longitude Act of 1714, runs through the John Harrison story. However, little has been written about the other members of his family. His brother James was a very skilled and pragmatic person. From him three generations followed all involved with bells and clocks. The third generation, James Harrison of Hull, was the last of the Harrison clockmaking line. THE LEGACY James Harrison, (James 4) great-grandson of James, John's brother, worked in Hull making turret clocks between around 1826 and 1860. He died in 1875 and left at least 30 turret clocks that are known of today. James well knew his forebears horological knowledge and incorporated some of John's principles into his clocks. A key invention was a detached escapement that although it looked like a grasshopper, was in fact a gravity escapement. Other firsts for James were cast-iron wheels, expanding flies to regulate striking speed, an effective striking mechanism and skeleton cast-iron dials. But James 4 left more than what he bequeathed in his will, it was a spin-off from John Harrison's knowledge. This 'Longitude's Legacy' is exposed and explained. Much has been written about John Harrison; little has been told about the rest of the family. This book corrects some of this woeful shortfall detailing the history of the last of the Harrison clockmakers. WHO'S THE BOOK FOR? Firstly, anyone interested in clocks, particularly turret clocks. Next, those into the Harrison story who want to know more about his family. Finally local historians in the Lincolnshire, Yorkshire and Hull regions. THE CONTENTS After introducing the story of John 'Longitude' Harrison the book moves on to give a short history of James, the brother of John. He was a miller, bell hanger and bell founder in Lincolnshire. His son Henry is briefly mentioned, he carried on the bell hanging and founding until he was succeeded by his son, another James. James 3 as he is known, was completely absorbed with bellfounding casting about 200 bells during his lifetime. His character was obsessional, a throw-back to John 'Longitude'. A chance letter on clocks in the Mechanics' Magazine triggered James 3 to respond. The ensuing 100 plus letters provide a deep insight into his wide knowledge and character and this is explored in two chapters. One topic on which James 3 wrote was flying. He had the vision, not only to see the helicopter, but that it needed two contra-rotating vanes to prevent the car from spinning round. James 3 won two prizes from the Society for Arts, one for a detached escapement the other for expanding flies. James 4 his son, established himself as a turret clockmaker, appropriated his father's prizes and led a successful life dying when he was 85 and still leaving a legacy of 100. All the known clocks of James 4 are documented and illustrated. This chapter is the largest part of the 'clock' part of the book. A short chapter explains the probable links between the work of James 4 and the design of 'Big Ben' by Edmund Beckett Denison. In a somewhat unusual approach, over half the book is appendices. The majority of these are the letters that appeared in the Mechanics' Magazine and these are given for the interest of the reader and for the information of the serious researcher. THE AUTHOR Author Chris McKay is well known in the turret clock field both in historical and practical modes. It was in 1976 he saw his first Harrison turret clock and has been researching ever since. In explaining the book as 'a long time in the coming' he took advice from a friend and wrote the history 'just as it is'.

What Is Your Legacy? 101 Ideas On Getting Started to Create and Build One Anca Ioviță, 2016-12-18 Are you at a crossroads? Do you wonder what should you do with your life? Would life be easier if you could only get some direction? Even if people don’t chit-chat about legacies, these are questions arising during silent nights in the mind of almost everyone. Especially in those of us reaching certain life miles like adulthood, middle life and retirement. Have you ever noticed the process of metamorphosis in a butterfly? Getting out of its chrysalis is difficult and painful. You may think you’re doing it a service by cutting the upper part of its chrysalis to ease its access out of it. But if you’ll do that, the butterfly won’t have its wings well developed and it will be crippled for the rest of its life. Struggles and challenges are necessary for metamorphosis to take place. They are necessary for creating and building a legacy too. While you are the ONLY one responsible for knowing what makes you live another day in your own skin and in your own situation, this collection of ideas on getting started to creating and building a legacy could be just the right direction you need. A purpose in life is the main reason people go on no matter what happens to them in the present moment. Such a purpose makes life not only bearable, but enjoyable too. Hence my focus on this collection of ideas is for those who understand the importance of leaving a legacy behind, but haven’t got a clue of why they live and what should they do with their lives. It is an inspiring collection for creatives in general and people who never viewed themselves as creative or who never thought they could build anything worthwhile. These ideas are organized as a flashcard set and should be read and processed accordingly. Go through all these flashcards and pick one idea. Focus on it 100% before trying another one if you’d like to. On the back of each card you will find some starting points. This is how I’d start any of these projects. But these steps are not enough – you’ll need mentors, detailed information and time to practice. If you set out your heart on one of these projects, you’ll face a steep learning curve until you’ll learn the ropes and make things happen. If any of these 101 ideas inspired you, I’d love to hear from you!

Longitude's Legacy James Harrison of Hull 1792-1875 Chris McKay, 2015-04-22 The story of John (Longitude) Harrison is well known; how after many years of work, he developed a clock that would keep accurate time at sea. His goal was to win the Longitude prize, a glittering 20,000 offered in the Act of 1714. John's story is well recounted at all levels from the glossy booklet through the symposium proceedings, the popular book, the deep technical tome and the TV film. James Harrison, (James 4) was the great-grandson of James, John's brother. He worked in Hull making turret clocks between around 1826 and 1860. He died in 1875 and left at least 30

turret clocks that are known of today. James well knew his forebears horological knowledge and incorporated some of John's principles into his clocks. A key invention was a detached escapement that although it looked like a grasshopper, was in fact a gravity escapement. Other firsts for James were cast-iron wheels, expanding flies to regulate striking speed, an effective striking mechanism and skeleton cast-iron dials. But James 4 left more than what he bequeathed in his will, it was a spin-off from John Harrison's knowledge. This 'Longitude's Legacy' is exposed and explained. Much has been written about John Harrison, however, little has been told about the rest of the family. This book corrects some of this woeful shortfall providing a brief history of James Harrison, brother of the famous John. This James turned to bell hanging, bellfounding and milling after he had helped his brother with making of the regulators and the first sea clock. His son, Henry was a bellfounder too and was succeeded briefly by his son Henry. Henry died early in his life and the bellfoundry was then run by James 3. James 3 was eccentric but through a series of 100 plus letters in the Mechanics' Magazine provide a deep insight into his knowledge and character and this is explored in two chapters. A chapter is provided on the clockmaker William Wynn whose letters in the Mechanics' Magazine spurred responses from James 3. James 3 won two prizes from the Society for Arts, one for a detached escapement the other for expanding flies. His son, James 4 started with bells but then turned to turret clock making settling in Hull. He died in 1875 and left no issue. The books starts with necessary introductory chapters covering John Harrison and his quest for the longitude prize. Later family members are then covered followed by detailed information on James 3 and James 4. The largest chapter covers the clocks made by James 4. All known clocks are described and illustrated. In a somewhat unusual approach, over half the book is appendices. The majority of these are the letters that appeared in the Mechanics' Magazine and these are given for the interest of the reader and for the information of the serious researcher. Other details are letters written by James 4 and the various awards he received. The book will be of interest to anyone interested in clocks, particularly turret or tower clocks. Next, those who are fascinated by the Harrison story and want to know more about John 'Longitude's' wider family will find it useful. For churches that have a Harrison turret clock, and those who care for them, the book is a must. Finally local historians in the Lincolnshire, Yorkshire and Hull regions will discover more about their local man and clocks in their locality. Author Chris McKay is well known in the turret clock field both in historical and practical modes. It was in 1976 he saw his first Harrison turret clock and has been researching ever since. In explaining the book as 'a long time in the coming' he took advice from a friend and wrote the history 'just as it is'.
