Canadian Perspectives on Advanced Practice Nursing, Second Edition Eric Staples, Roger Pilon, Ruth A. Hannon, 2020-12-18 Now in its second edition, *Canadian Perspectives on Advanced Practice Nursing* provides a comprehensive and uniquely Canadian review of the roles of clinical nurse specialists and nurse practitioners, the two streams of advanced practice nursing (APN) in the country. With contributions from notable professionals and academics of the field, the text explores the history and evolution of APN in Canada, from its rural and remote outpost beginnings to the present, and proposes a vision for its future within the health care system. Key issues are examined in relation to economic, educational, legislative, political, regulatory, and social environments that have shaped the continued integration of APN roles across the country. Additionally, the contributors apply the Canadian Nurses Association's pan-Canadian framework and role competencies to real clinical cases. Speciality roles, including geropsychiatry, ambulatory care, and neonatal, are also examined. New to this edition are chapters that focus on the unique challenges of developing APN roles in Quebec; the social determinants of health of Indigenous, inner-city, rural and remote, LGBT2SQ, and refugee and migrant populations in Canada; and other critical issues, such as performance assessment and global perspectives. Thoroughly updated, this second edition of *Canadian Perspectives on Advanced Practice Nursing* is a must-read for those in the nursing profession, especially students in nursing programs.

Fundamentals of Software Culture Zheng Qin, Huidi Zhang, Xin Qin, Kaiping Xu, Kouemo Ngayo Anatoli Dimitrov, Guolong Wang, Wenhui Yu, 2018-07-17 As the first book about software culture, this book discusses software culture from three perspectives including historical perspective, the classification of software and software applications. This book takes credit from the view of science and technology development. It analyzed scientific innovations and the social areas promoted following the growth of technology. And according to the fact that information helps to build human cultural form, we proposed the concept and researching method of software culture. The aim of writing this book is to strengthen the connection between software and culture, to replenish knowledge system in the subject of software engineering, and to establish a new area of study that is the culture of software.

Addressing all major advanced practice nursing competencies, roles, and issues, *Advanced Practice Nursing: An Integrative Approach*, 5th Edition provides a clear, comprehensive, and current introduction to APN today. It applies APN core competencies to the major APN roles — including the burgeoning Nurse Practitioner role — and covers topics ranging from the evolution of APN to evidence-based practice, leadership, ethical decision-making, and health policy. This edition includes a new chapter on the international development of APN, new and enhanced illustrations, and a colorful new reader-friendly format for improved readability. From internationally known APN experts Ann Hamric, Charlene Hanson, Mary Fran Tracy, and Eileen O'Grady, along with a host of internationally recognized APN contributors, *Advanced Practice Nursing* introduces you to APN and helps you identify an APN role, develop key competencies for that role, and succeed as an APN. Coverage of APN core competencies defines and describes all competencies, including direct clinical practice, guidance and coaching, consultation, evidence-based practice (EBP), leadership, collaboration, and ethical decision-making. Operationalizes and applies APN core competencies to the major APN specialties including the Clinical Nurse Specialist, the Primary Care Nurse Practitioner, the Acute Care Nurse Practitioner, the Certified Nurse-Midwife, and the Certified Registered Nurse Anesthetist. Content on managing APN environments addresses such factors as business planning and reimbursement; marketing, negotiating, and contracting; regulatory, legal, and credentialing requirements; health policy issues; and nursing outcomes and performance improvement research. Unique Exemplar boxes provide real-life scenarios, showing APN competencies in action. In-depth discussions of educational strategies show how nurses develop competencies as they progress into advanced practice. Discussions of APN role development clearly explain the career trajectory that you can anticipate as you transition to advanced practice.

The Future of Nursing 2020-2030 National Academies of Sciences Engineering and Medicine, Committee on the Future of Nursing 2020-2030, 2021-09-30 The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. *The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity* explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by *The Future of Nursing: Leading Change, Advancing Health* (2011) report.

Advanced Practice Psychiatric Nursing Kathleen R. Tusaie,Joyce J. Fitzpatrick,2012-08-21 This text fills a void in advanced practice nursing literature by providing a foundation for integrating psychopharmacology, psychotherapy and Complementary and Alternative Medicine (CAM) into advanced practice nursing. The text includes coverage of neurobiology, theory and research evidence related to psychopharmacology, psychotherapy and complementary and alternative medicine interventions. This text addresses the issue of defining and integrating relationship-based approaches with psychopharmacological and CAM approaches by providing beautifully-designed and easy-to-follow decision trees for initiating specific treatment and discussion of specific continuing care issues. This text has a lifespan focus and includes pediatric pointers and aging alerts.

Policy and Research Needs to Maximize Independence and Support Community Living National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Institute of Medicine,Board on Health Sciences Policy,Forum on Aging, Disability, and Independence,2016-06-10 Living independently and participating in one's community are priorities for many people. In many regions across the United States, there are programs that support and enable people with disabilities and older adults to live where they choose and with whom they choose and to participate fully in their communities. Tremendous progress has been made. However, in many cases, the programs themselves and access to them vary not only between states but also within states. Many programs are small, and even when they prove to be successful they are still not scaled up to meet the needs of the many people who would benefit from them. The challenges can include insufficient workforce, insufficient funding, and lack of evidence demonstrating effectiveness or value. To get a better understanding of the policies needed to maximize independence and support community living and of the research needed to support implementation of those policies, the National Academies of Sciences, Engineering, and Medicine convened a public workshop in October 2015. Participants explored policies in place that promote independence and community living for older adults and people with physical disabilities, and identified policies and gaps in policies that can be barriers to independence and the research needed to support changing those policies. This report summarizes the presentations and discussions from the workshop.

Health Professions Education Institute of Medicine,Board on Health Care Services,Committee on the Health Professions Education Summit,2003-07-01 The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.
