The SOS Guide to Live Sound Paul White, 2014-04-03 If you've ever handled live sound, you know the recipe for creating quality live sound requires many steps. Your list of ingredients, shall we say, requires an understanding of sound and how it behaves, the know-how to effectively use a sound system), and the knowledge to choose and use your gear well. Add a dash of miking ability, stir in a pinch of thinking on your feet for when your system starts to hum or the vocals start to feed back, and mix. In practice, there really is no recipe for creating a quality performance. Instead, musicians and engineers who effectively use sound systems have a wealth of knowledge that informs their every move before and during a live performance. You can slowly gather that knowledge over years of live performance, or you can speed up the process with *The SOS Guide to Live Sound*. With these pages, you get practical advice that will allow you to accomplish your live-sound goals in every performance. Learn how to choose, set up, and use a live-performance sound system. Get the basics of live-sound mixing, save money by treating your gear well with a crash course in maintenance, and fix issues as they happen with a section on problem-solving, full of real-world situations. You'll also get information on stage-monitoring, both conventional and in-ear, along with the fundamentals of radio microphones and wireless mixing solutions. Finally, a comprehensive glossary of terminology rounds out this must-have reference.

Behind the Sound Cart Patrushkha Mierzwa, 2021-02-22 Behind the Sound Cart: A Veteran's Guide to Sound on the Set details how the entire Sound team functions on today's movie and television sets, while illuminating the overall picture of life on a production. Patrushkha takes you from the first work call to the final wrap, explaining the order of the work and the details that

This book describes the job of the UST (Utility Sound Technician), a career almost invisible, yet extremely interesting, exciting-and paying up to six figures a year. This book details how to act, how to relate to the crew, how to deal with and solve problems that are not just about sound itself-things you don't learn at film school. Patrushkha Mierzwa, one of the first female boom operators in Hollywood, has worked on over 80 movies and television projects for major directors including Robert Rodriguez, Quentin Tarantino, James Gray, and Robert Altman. She has been a judge for the Emmys, an IATSE Sound Local 695 director, and given workshops globally over her long career in the industry. Her Sound Oscar-nominated shows include *Ad Astra* and *Once Upon a Time* in Hollywood. This book condenses 40 years of experience into a practical guide for you to be able to walk onto a film set with the confidence of a sound ninja. -Stuart Wilson, Sound Oscar winner, 1917 This is my go-to reference and should be in every film school on the globe. -Simon Clark, Head of Location Sound Recording, National Film & Television School, England I think this is really going to help students, super down to earth, logical and clear. I knew that it'd be a great book after your visits and sessions with our students. You're a wonderful speaker and your voice comes right through clearly and concisely in this book. Congratulations again and I hope we get to invite you back to Greenwich again in the near future! - Dr Andrew Knight-Hill, University of Greenwich, London.
