Pedagogy and Practice Patricia Murphy, Kathy Hall, Janet Soler, 2012-06-21 This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners, and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning, through new ways of relating, and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings, and the role of the teacher in this sociocultural view of learning. By illustrating the mediated nature of agency and identity, the chapters (re)conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and from out-of-school to institutionally-based and work place situations. Curricular aspects represented include popular culture, critical literacy, multimodality, the arts, and new technologies. Teachers and student teachers, as learners, are also represented in the accounts assembled. The book takes a sociocultural view of learning and considers the pedagogical implications of this view. It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities. The contributions challenge ways of thinking about practice, both teaching and assessment, and argue for practices that bridge between learners' worlds, their communities and educational institutions. Drawing on the international literature, this book will be essential reading for students of curriculum learning and assessment in all sectors from pre-primary to further and higher education. It is suitable as a core text for masters and taught doctorate programmes. It will also be of interest to a wide range of professionals involved with curriculum, learning and the practice of teaching and assessment. This book is relevant to those in work-based and professional education and training, and in informal educational settings, as well as traditional educational institutions at all levels. A unique collection in a field that is underrepresented, it will also be of interest to an academic audience.

Forest and Crag Laura Waterman, Guy Waterman, 2019-02-28 A compelling story of our ever-evolving relationship with mountains and wilderness. Thirty years after its initial publication, this beloved classic is back in print. Superbly researched and written, Forest and Crag is the definitive history of our love affair with the mountains of the Northeastern United States, from the Catskills and the Adirondacks of New York to the Green Mountains of Vermont, the White Mountains of New Hampshire, and the mountains of Maine. It's all here in one comprehensive volume: the struggles of early pioneers in America's first frontier wilderness; the first ascent of every major peak in the Northeast; the building of the trail networks, including the Appalachian Trail; the golden era of the summit resort hotels; and the unforeseen consequences of the backpacking boom of the 1970s and 80s. Laura and Guy Waterman spent a decade researching and writing Forest and Crag, and in it they draw together widely scattered sources. What emerges is a compelling story of our ever-evolving relationship with the mountains and wilderness, a story that will fascinate historians, outdoor enthusiasts, and armchair adventurers alike. Laura Waterman and Guy Waterman (1932–2000) volunteered for the United States Forest Service and for hiking and conservation organizations, maintaining the Franconia Ridge Loop for almost two decades. They were awarded the American Alpine Club's 2012 David R. Brower Award for outstanding service in mountain conservation, and the Waterman Fund to preserve wildness and service the alpine areas across the Northeast was established in 2000. Laura and Guy wrote numerous articles and books on the outdoors, including The Green Guide to Low-Impact Hiking and Camping, Wilderness Ethics: Preserving the Spirit of Wildness, and Yankee Rock & Ice: A History of Climbing in the Northeastern United States. Laura's memoir, Losing the Garden: The Story of a Marriage, recounts their thirty years of homesteading.

ICALP is a series of annual conferences of the European Association for Theoretical Computer Science(EATCS) which first took place in 1972. This year, the ICALP program consisted of the established Track A (focusing on algorithms, automata, complexity and games) and Track B (focusing on logic, semantics and theory of programming), and of the recently introduced Track C (focusing on security and cryptography foundations). In response to the call for papers, the Program Committees received 477 submissions, the highest ever: 269 for Track A, 122 for Track B and 86 for Track C. Out of these, 126 papers were selected for inclusion in the scientific program: 70 papers for Track A, 32 for Track B and 24 for Track C. The selection was made by the Program Committees based on originality, quality, and relevance to theoretical computer science. The quality of the manuscripts was very high indeed, and many deserving papers could not be selected. ICALP 2008 consisted of five invited lectures and the contributed papers.
