**Hollywood Remaking** Kathleen Loock,2024 From the inception of cinema to today's franchise era, remaking has always been a motor of ongoing textual production. Hollywood Remaking critically examines the persistent economic and cultural relevance of film remakes, series, sequels, crossovers, spin-offs, and prequels that emerge from the large-scale system of remaking actively shape how the film industry, cinema, and audiences imagine themselves as these movies constantly negotiate past and present, stability and change through a serial dynamic of repetition and variation. The book develops a theory of Hollywood remaking as an inherently dynamic practice situated between the film industry's economic logic and the cultural imaginary and analyzes how remaking has developed as a business practice in the United States, how it has been imagined, discursively constructed, and defined by networked stakeholders from production and reception contexts, how it has shaped cinematic aesthetics and cultural debates, and how it has fostered film-historical knowledge, promoted feelings of generational belonging among audiences, and become deeply enmeshed with constructions of the self--

*Treason in the Rockies: Nazi Sympathizer Dale Maple's POW Escape Plot* Paul N. Herbert ,2016 Harvard honor graduate Dale Maple had an obsession with Nazi Germany. After enlisting in the U.S. Army, he was assigned to a regiment for soldiers suspected of harboring German sympathies. This regiment was eventually relocated next to a POW camp at Camp Hale in Colorado. In 1944 he orchestrated the escape of 2 German POWs and the trio headed to Mexico where they were captured. Maple was tried for treason for his actions.

**Perceived Brand Localness** Jörg Igelbrink,2019-11-27 Jörg Igelbrink's study provides the disclosure of a comprehensive explanation approach of the consumers purchase motivation and attitude towards local fashion brands. The structure equation model reveals six direct impacts on the consumers LFB attitude. The author's findings identify a new consumer typology presenting a model of four positive consumer-attitude-types such as the influencing Realign Performance Advocates. In the research field of consumer behaviour the new consumer typology illustrates both the consumer purchase motivation and derived local fashion brand positioning.

*Integral Operators in Non-Standard Function Spaces* Vakhtang Kokilashvili,Alexander Meskhi,Humberto Rafeiro,Stefan Samko,2016-05-11 This book, the result of the authors' long and fruitful collaboration, focuses on integral operators in new, non-standard function spaces and presents a systematic study of the boundedness and compactness properties of basic, harmonic analysis integral operators in the following function spaces, among others: variable exponent Lebesgue and amalgam spaces, variable Hölder spaces, variable exponent Campanato, Morrey and Herz spaces, Iwaniec-Sbordone (grand Lebesgue) spaces, grand variable exponent Lebesgue spaces unifying the two spaces mentioned above, grand Morrey spaces, generalized grand Morrey spaces, and weighted analogues of some of them. The results obtained are widely applied to non-linear PDEs, singular integrals and PDO theory. One of the book's most distinctive features is that the majority of the statements proved here are in the form of criteria. The book is intended for a broad audience, ranging from researchers in the area to experts in applied mathematics and prospective students.

**Film Reboots** Herbert Daniel Herbert,2020-08-18 Bringing together the latest developments in the study of serial formatting practices - remakes, sequels, series - Film Reboots is the first edited collection to specifically focus on the new millennial phenomenon of rebooting. Through a set of vibrant case studies, this collection investigates rebooting as a practice that seeks to remake an entire film series or franchise, with ambitions that are at once respectful and revisionary. Examining such notable examples as Batman, Ghostbusters, and Star Trek, among others, this collection contends with some of the most important features of contemporary film and media culture today.

*Rapid City* Bev Pechan,Bill Groethe,2008-03-01 Rapid City, the Summer Playground of America, was founded in 1876 by gold seekers, fueled by a rush to the Black Hills following Gen. George Custer's 1874 expedition. When the railroad arrived a decade later, cattlemen replaced prospectors, and Rapid City remained a hub of activity. By the end of World War I, the popularity of the automobile and newly constructed roads helped to shape area tourism. Mount Rushmore, 23 miles distant, was under construction in 1927, and the new Hotel Alex Johnson was completed in 1928. Together they were natural draws, complementing the pine-scented beauty surrounding Rapid City and making the city the center of western hospitality. As World War II ended, the traveling public again sought out Rapid City and its surrounding attractions as its destination for that memorable vacation out West. Today not much has changed. The Hotel Alex Johnson continues to be a landmark headquarters for tour operators, and Mount Rushmore remains a premier visitor site. And now Rapid City is further enhanced by the City of Presidents project, a work in progress in its historic downtown district.

**The Kelvin Timeline of Star Trek** Matthew Wilhelm Kapell,Ace G. Pilkington,2019-02-28 In an era of reboots, restarts and retreads, J.J. Abrams' Star Trek trilogy--featuring new, prequel adventures of Kirk, Spock and the rest of the original series characters, aboard the USS Enterprise--has brought the franchise to a new generation and perfected a process that is increasingly central to entertainment media: reinvigorating the beloved classic. This collection of new essays offers the first in-depth analysis of the new trilogy and the vision of the next generation of Star Trek film-makers. Issues of gender, race, politics, economics, technology and morality--always key themes of the franchise--are explored in the 21st century context of The Kelvin Timeline.

**Quantum Teleportation and Entanglement** Akira Furusawa,Peter van Loock,2011-05-03 Unique in that it is jointly written by an experimentalist and a theorist, this monograph presents universal quantum computation based on quantum teleportation as an elementary subroutine and multi-party entanglement as a universal resource. Optical approaches to measurement-based quantum computation are also described, including schemes for quantum error correction, with most of the experiments carried out by the authors themselves. Ranging from the theoretical background to the details of the experimental realization, the book describes results and advances in the field, backed by numerous illustrations of the authors' experimental setups. Aimed at researchers, physicists, and graduate and PhD students in physics, theoretical quantum optics, quantum mechanics, and quantum information.

**Constraints in Discourse 3** Anton Benz,Manfred Stede,Peter Kühnlein,2012 The analysis of discourse is probably one of the most complex problems of linguistics. It can be approached from many different directions, involving a large variety of different methods. This volume unites psycholinguistic studies, investigations of logical and computational models of discourse, corpus studies, and linguistic case studies of language-specific devices. This variety of approaches reflects the complexity of discourse production and understanding, and it also reflects the necessity of understanding the complex interplay of diverse parameters which influence these processes. The growing importance of corpus-based and experimental approaches to discourse analysis is duly reflected in this volume. Most of the chapters make use of them in one or the other form. This collection of articles grew out of the third installment of the Constraints in Discourse conferences, and will be of interest to researchers from linguistics, artificial intelligence, and cognitive science.

Northern European Overture to War, 1939-1941 ,2013-05-24 Northern European Overture to War offers an international perspective on the diplomatic and military factors that shaped the course of events in Northern Europe as the region became increasingly drawn into the wider great power war.

*Handbook of Qualitative Health Research for Evidence-Based Practice* Karin Olson,Richard A. Young,Izabela Z. Schultz,2015-10-12 This progressive reference redefines qualitative research as a crucial component of evidence-based practice and assesses its current and future impact on healthcare. Its introductory section explains the value of sociocultural context in case conceptualization, and ways this evidence can be integrated with quantitative findings to inform and transform practice. The bulk of the book's chapters review qualitative research in diverse areas, including pain, trauma, heart disease, COPD, and disabling conditions, and examine ways of effectively evaluating and applying qualitative data. This seismic shift in perception moves the healing professions away from traditional one-size-fits-all thinking and toward responsive, patient-centered care. Among the topics in the Handbook: ·Examining qualitative alternatives to categorical representation. ·The World Health Organization model of health: what evidence is needed? ·Qualitative research in mental health and mental illness. ·Qualitative evidence in pediatrics. ·The contribution of qualitative research to medication adherence. ·Qualitative evidence in health policy analysis. The Handbook of Qualitative Health Research for Evidence-Based Practice offers health and clinical psychologists, rehabilitation specialists, occupational and physical therapists, nurses, family physicians and other primary care providers new ways for understanding patients' health-related experiences and opens up new ways for developing interventions intended to improve health outcomes.

**Examinations and Analysis of Sequels and Serials in the Film Industry** Seçmen, Emre Ahmet,2023-04-25 There are many elements in the concept of visual continuity, and they are all interrelated. In films or film series that are described as sequels, establishing a visual integrity relationship between films comes to the fore. The concept of the sequel appears in two ways. Sometimes, while the ideas are scripted, the story is divided into more than one part. Sometimes the story is planned as a single movie, and after a certain time, it can be realized as a follow-up movie/film for different reasons. In both systems of expression, it is necessary to seek harmony between all elements of visual design. Examinations and Analysis of Sequels and Serials in the Film Industry examines certain contents through the concepts of cinematography and narrative, focusing more on the practical side of cinema and partially on the theoretical side. It examines samples, sequels, serials, and trilogy universes on the axis of cinematography and narration. Covering topics such as film landscape, repeated narrative elements, and storytelling, this premier reference source is an excellent resource for film industry workers, film students and educators, sociologists, librarians, academicians, and researchers.

**Raoul de Keyser** Ulrich Loock,2016 Often understated, the emotional force of Raoul De Keyser's cryptic and highly lyrical paintings is undeniable. Composed of very basic geometric shapes that hover between abstraction and figuration, many of De Keyser's works seem to hint at forms just out of focus, spaces impossible to inhabit. Their power lies in their ability to suggest through simple gestures, and to compel intense contemplation. Since his death in 2012, De Keyser's stature as a painter has only continued to grow, as has his influence on a younger generation of European painters. Raoul De Keyser: Drift is published on the occasion of the eponymous show at David Zwirner, first presented at the London gallery in November 2015 and traveling to New York in 2016. Curated by Ulrich Loock, who contributes the catalogue's text, the exhibition is organized around a group of twenty-two paintings that the artist completed shortly before his death. Collectively, these works have become known as The Last Wall. Imposing stark material and formal limitations, De Keyser was able to revisit in this body of work many of the major subjects and themes that occupied him throughout his nearly fifty-year career: the inconspicuous things close at hand, the landscape of the low lands where he grew up and lived all his life, and the partition of the picture plane. This elegant catalogue presents plates and details of a careful selection of paintings, beginning in the 1970s, that emphasizes the tentative way De Keyser chose to explore his themes--never approaching anything directly, hinting rather than demonstrating. Taken together, Raoul De Keyser: Drift reveals an uncompromising artist who continued to pose new aesthetic problems for himself--even at the end of his life--and managed to come up with original and deeply moving solutions.--Publisher's description.
