But he learns that having three wishes can be confusing and even make other people think you are a little bit weird. He also learns that wishes can be made accidentally and can create conflict when other people's needs get in the way. He also realizes that to know a wish will really come true makes the decision of what to wish for very difficult, especially when you are not certain that things happened because of your wishes or if it was all your imagination.

Lighter Side of Adaptive Optics Robert K. Tyson,2009 Adaptive optics has been under development for well over 40 years. It is an indisputable necessity for all major ground-based astronomical telescopes and is the foundation for laser and wavefront sensor design. 'Lighter Side of Adaptive Optics' is a nontechnical explanation of optics, the atmosphere, and the technology for untwinkling the stars. While interweaving a fictional romantic relationship as an analogy to adaptive optics, and inserting satire, humor, and philosophical rants, Tyson makes a difficult scientific topic understandable. The why and how of adaptive optics has never been more enjoyable.

RADICAL LIGHT Sylvia Bennett, 2010-02-24 This second book of the Real Magic series continues to explore the ancient Hermetic Teachings as “A mental art—the art of using consciousness itself as the tool for creating changes in consciousness.” What does the Hermetic axiom “as above, so below” really mean? The relationship between macrocosm (above) and microcosm (below) is the key to the Hermetic Teachings. Macrocosm refers to the Eternal Reality of Light; the realm of God. Microcosm is its reflection; a fragmentation of Light; the world of human existence and human ego. The core of the Hermetic Teachings for centuries has been focused on transforming the fragmented body of Light in human consciousness and uniting below with above.
