Vectors, Matrices and C++ Code Sergio Pissanetzky, 2004-10 Presented here is an integrated approach - perhaps the first in its class - of the basics of vector and matrix Algebra at College level, with the object-oriented C++ code that implements the vector and matrix objects and brings them to life. Thinking in terms of objects is the natural way of thinking. The concept of object has existed in Science for centuries. More recently, objects were introduced in Computation, and object-oriented programming languages were created. Yet the concept of object is not routinely used when teaching Science, and the idea that objects can come alive in a computer has not yet been fully exploited. This book integrates basic vector and matrix Algebra with object-oriented concepts and the actual code implementing them. It is both a textbook and a software release, complete with software documentation and the mathematical background that supports the code. The source code is included by download and readers can use it for their own programming. The reader will need a basic knowledge of Mathematical notation, Algebra and Trigonometry, but familiarity with C++ is not required because a course on C++ is also included. You should read this book if you are a developer who needs a background in vector or matrix algebra, a science student who needs to learn C++, a scientist who needs to write advanced code but can't waste time developing the basics, or you just need ready-to-use C++ source code for your project.

Living in the Matrix Michael Hammer, 2018-07 Why are things the way they are on this planet? There is a very cleverly designed Matrix, hidden in plain view, which we believe is our very reality, that is created to be an imposition and limitation on every aspect of our lives. Almost everything we encounter on this earth and beyond, even our religions and spirituality are an aspect of this Matrix which controls and manipulates us to feed those who run things mostly behind the scenes. This book connects the dots and exposes the grand architect(s) behind the many aspects of the matrix. Even if you are well versed in conspiracy theories, when you see how everything works together, it is truly mind blowing and will confront your very core belief systems about life. Living in the Matrix, takes you down the rabbit hole and gives you insight on how to avoid the many hidden traps and live sovereign and free. This book explores the Cosmic and Earth Matrix, ancient and galactic history, the beings that dictate their policies to the ruling elite and exposes the being at the very top of the pyramid of power. How does the Matrix controls us at the death process with karma and reincarnation and the many avenues of mind control. Most importantly, you will understand why no stone is left unturned in the epic manipulation and control of mankind and where this is all heading.

One Jerry Katz, 2006 This book compiles the most lively expressions of nonduality, which is the understanding that existence is one undivided whole and that the daily distinctions we make within this unity are useful, but not ultimately true. The book conveys what nonduality itself is, in a nonacademic style that draws heavily on modern, popular writing on the subject. Also included are spirited passages from major traditions-- Buddhism, Taoism, Hinduism, Christianity, Judaism, and Islam.

Sexing Code Claudia Herbst, 2009-05-05 Critically investigating the gender of programming in popular culture, Sexing Code proposes that the de facto representation of technical ability serves to perpetuate the age-old association of the male with intellect and reason, while identifying the female with the body. Challenging this division, in which code is situated within the male sphere, the discussion highlights women's contributions in the writing and theorizing of code, particularly in the digital arts, hacking, and hacktivism. Presenting an accessible and lively discussion, Sexing Code demonstrates that the gendering of programming selectively confers the privilege of authorship and is therefore a salient factor in the production of culture in the twenty-first century.

The Matrix Code and the Alien Agenda Tracy Yates, 2017-07-23 Within these pages lies the answers to some of the questions that we have all asked ourselves. Where did we come from? Why are we here? Where are we going? The answers to these questions are so amazing, and yet so far removed from what we have been conditioned to believe. Deep inside we all know there is something more. Some of us focus in on this feeling and search and some of us suppress this feeling by finding other things to take our minds off of it, but the truth is we all have it. All I offer is the truth. The answers may not be what you expect but they are beneficial to you in amazing and profound ways. Step out of your comfort zone and discover the knowledge that has been hidden from you for thousands of years!

Conscious Feelings Clinton Callahan, 2022-10-01 This book comprehensively details the path of feeling. Once one has a long drink of the experience of feeling that Callahan writes about, it will be difficult to quench one's thirst for it with less. -Timothy S. Bennett, writer, artist and filmmaker An owner's manual for Sane Human Being! Pretty soon you'll reclaim who you have always been, who you came here to be: deep and authentic feeling, conscious life, and a chance to play a part in the healing of our collective nightmare. -Malidoma Patrice Somé, PhD, author, healer, African Shaman For modern seekers, responding to the call for initiation into relationship, here is an open invitation. As with all true rites of passage, there is no promise of safety along the way, and, the potential for transformation is boundless. -Sally Erickson, artist, psychotherapist, community organizer, and film producer. This book is about feelings, and the ways that we, as individuals and as a culture, have numbed ourselves against them. It is about unleashing the possibility of using your conscious feelings to re-shape your life around what really matters to you. Conscious Feelings introduces readers to the concept of the personal numbness bar -- a measure set high by modern culture as a way of keeping everything cool, under control, and consequently out of touch. This book provides the insight and the means for lowering that numbness bar. You can feel more wisely and effectively, the author asserts. You can regain the intelligence and energy of your feelings, so long denied and dressed up to appear acceptable. Being cool, Callahan states, allows you to look the other way about schooling, prescription drugs, corporate wrongdoing, corruption, pollution, injustice, your life purpose, your love life, and your job, and to accept the generic malaise that characterizes so many ordinary relationships. The central framework of the book is built with the Ten Distinctions for Consciously Feeling, including: Learning the potent difference between thoughts and feelings. Sorting out feelings (based in the present) from emotions (based in the past, on cultural or religious beliefs). Experiencing how feelings are absolutely-neutral energy and information, neither good nor bad, neither positive nor negative, yet extremely useful in your adult life. Each chapter is enriched with THOUGHTMAPS—clear diagrams of ways you presently think and ways you could possibly think—supported by an abundance of practical experiments t

Homework Assignments and Handouts for LGBTQ+ Clients Joy S. Whitman, Cyndy J. Boyd, 2021-02-01 Featuring over seventy affirming interventions in the form of homework assignments, handouts, and activities, this comprehensive volume helps novice and experienced counselors support LGBTQ+ community members and their allies. Each chapter includes an objective, indications and contraindications, a case study, suggestions for follow-up, professional resources, and references. The book's social justice perspective encourages counselors to hone their skills in creating change in their communities while helping their clients learn effective coping strategies in the face of stress, bullying, microaggressions, and other life challenges. The volume also contains a large section on training groups of allies and promoting greater cohesion within LGBTQ+ communities. Counseling and mental health services for LGBTQ+ clients require between-session activities that are clinically focused, evidence-based, and specifically designed for one or more LGBTQ+ sub-populations. This handbook gathers together the best of such LGBTQ+ clinically focused material. As such, the book appeals both to students learning affirmative LGBTQ+ psychotherapy/counseling and to experienced

practitioners. The Handbook features homework assignments, handouts, and activities that: -Emphasize working with clients from different backgrounds. -Stress the importance of ethical guidelines and culturally competent care. -Demonstrate how to engage clients in conversations about coming out across the lifespan. -Help clients manage oppression and build resilience through self-care, advocacy, and validation. -Identify the facets of relationships that are unique to LGBTQ+ individuals. -Offer interventions to enhance familial support and work through family dynamics. -Assist clients to more deeply appreciate their genders and sexual identities. -Aid therapists in their work with clients who have substance use and abuse issues. -Address concerns about career choices, employment options, and college pursuits. -Create safety in a range of social and clinical spaces, including college campuses. Offering practical tools used by clinicians worldwide, the volume is particularly useful for courses in clinical and community counseling, social work, and psychology. Those new to working with LGBTQ+ clients will appreciate the book's accessible foundation to guide interventions.

The Nystrom Method in Electromagnetics Mei Song Tong, Weng Cho Chew, 2020-07-06 A comprehensive, step-by-step reference to the Nyström Method for solving Electromagnetic problems using integral equations Computational electromagnetics studies the numerical methods or techniques that solve electromagnetic problems by computer programming. Currently, there are mainly three numerical methods for electromagnetic problems: the finite-difference time-domain (FDTD), finite element method (FEM), and integral equation methods (IEMs). In the IEMs, the method of moments (MoM) is the most widely used method, but much attention is being paid to the Nyström method as another IEM, because it possesses some unique merits which the MoM lacks. This book focuses on that method—providing information on everything that students and professionals working in the field need to know. Written by the top researchers in electromagnetics, this complete reference book is a consolidation of advances made in the use of the Nyström method for solving electromagnetic integral equations. It begins by introducing the fundamentals of the electromagnetic theory and computational electromagnetics, before proceeding to illustrate the advantages unique to the Nyström method through rigorous worked out examples and equations. Key topics include quadrature rules, singularity treatment techniques, applications to conducting and penetrable media, multiphysics electromagnetic problems, time-domain integral equations, inverse scattering problems and incorporation with multilevel fast multiple algorithm. Systematically introduces the fundamental principles, equations, and advantages of the Nyström method for solving electromagnetic problems Features the unique benefits of using the Nyström method through numerical comparisons with other numerical and analytical methods Covers a broad range of application examples that will point the way for future research The Nystrom Method in Electromagnetics is ideal for graduate students, senior undergraduates, and researchers studying engineering electromagnetics, computational methods, and applied mathematics. Practicing engineers and other industry professionals working in engineering electromagnetics and engineering mathematics will also find it to be incredibly helpful.

The Matrix in Theory, 2016-08-01 The Matrix trilogy continues to split opinions widely, polarising the downright dismissive and the wildly enthusiastic. Nevertheless, it has been fully embraced as a rich source of theoretical and cultural references. The contributions in this volume probe the effects the Matrix trilogy continues to provoke and evaluate how or to what extent they coincide with certain developments within critical and cultural theory. Is the enthusiastic philosophising and theorising spurred by the Matrix a sign of the desperate state theory is in, in the sense of “see how low theory (or ‘post-theory’) has sunk”? Or could the Matrix be one of the “master texts” for something like a renewal for theory as now being mainly concerned with new and changing relations between science, technology, posthumanist culture, art, politics, ethics and the media? The present volume is unashamedly but not dogmatically theoretical even though there is not much agreement about what kind of theory is best suited to confront “post-theoretical” times. But it is probably fair to say that there is agreement about one thing, namely that if theory appears to be “like” the Matrix today it does so because the culture around it and which “made” it itself seems to be captured in some kind of Matrix. The only way out of this is through more and renewed, refreshed theorising, not less.

Transcending the Matrix Mike Franco, 2020-02-11 This book has two parts. Part I exposes seven false Secret Society New World Order constructs. Part II exposes the true nature of reality and what we need to do to Transcend this carbon matrix when we die. The chapters in part one are: The Sumerian Swindle. Reveals the Anunnaki, genetically engineers of the Nordic race. Explains how and why the money handlers ripped-off the Sumerian text to create the Old Testament. The Problem with Scientism. Exposes how the Secret Societies hide the hand of God in Creation via their false theories. The Creation of Islam. Quotes the work of the whistleblower and former Jesuit Alberto Rivera who reveals the Catholic Church's hand in the creation of Islam. Antarctica: Beginning of the End. Nazi alien bases. The formation of the UN, NASA, CIA and a New World Order, and the advent of Deep Underground Military Bases. The New World Order. 9/11. JFK. Fluoride. Chemtrails. UFO's. Zionism. And the technology explosion, transhuman agenda that seeks to turn us all into the IoT and replace humans with an Ai-brain interface hybrid by 2030. Flat Earth. Explains why this will never be revealed, how, why, where, and proof our electromagnetic simulation requires a flat, motionless Earth. The Climate Change Hoax. Explains how weather warfare, geoengineering, Chemtrails, and HAARP cause climate change. Why this hoax is being promoted, and how it fits into the NOW plans for 2030. The chapters in part two are: Our Electric, Holographic Reality. We live in an electromagnetic simulation. This chapter provides proof. Gods Divine Algorithm. Our creator is not an old man sitting in the clouds, our creator is a code that adjudicates everything according to laws based on positive and negative energy, in due time. Eternity is a long time. Simulations without end await, until we get it right. Belief System Lifehacks. Concepts that help make life easier. Mandela Effect. How, why. One of the proofs we live in an editable simulation. Phillip K Dick's warning for mankind. PKD's books were not science fiction. They were written by an entity that hijacked his consciousness, and entity with access to alt realities, the past, and the future. Her warnings of an evil Empire hijacking our Republic and creating a global Ai run police state are about to come to fruition by 2030. True Principles. Do this positive thing, that that positive result. Easy! Transcending the Matrix. Explains how doing x, y, and z can free your soul from getting stuck in this simulation for life after life, and instead, level up to higher consciousness. Part II deals with the true nature of what we call abject reality. I provide evidence, as evidence not belief or theories equates to truth. The main reason I am writing this book is because I experienced lucid dreams where entities beyond the veil exposed profound sacred truths I feel I must share.

A Quest for Hope - Searching for Ways out of Postmodernism into New Reality Jan Chr. Vaessen, 2009

Celebrities and Movie Stars Death Bible Code, Vol. 2 - Their Fatal Cancers Steve Canada, 2014-04-29 Celebrities and movie stars, like everyone else, die from a variety of causes, including diseases (Vol.1 of this book) and cancers (Vol.2 of this book). When we ask if such causes of death are found encoded in the Torah along with the encoded names of who died from them, we find them all close together in one Torah Matrix (from Gen. 1:1 to 1 Samuel 10:17). For those uninitiated into the Bible Code mystery this might sound outlandish and impossible, but viewing the many Torah Matrices in this book, labeled clearly in black and white as secretly encoded facts staring us in the face might give pause to even the biggest skeptic. Volume 3 of this book will show the Torah-Bible Code Matrices of celebrities and movie stars deaths by accidents, murders, overdoses, and suicides their names found encoded in the Five Books of Moses, some with the year and location of their death; as another e-book through Author House, later in 2014. Thousands of similar results have been found by the author, covering many sorts of historical events ranging from the names of victims of natural disasters (e.g., Fukushima), ships sinking (e.g., Titanic), planes and trains and cars crashing (e.g. James Dean), assassinations worldwide over 4000 years (e.g., an Egyptian pharaoh, JFK, and John Lennon), Nazi Holocaust, mass shootings (Aurora, Columbine, Tucson, etc.), terror attacks (Benghazi, Boston Marathon, Fort Hood, 9/11), and war casualties (e.g., Vietnam, Gulf War, Iraq, Afghanistan). Even though there are only about 50 or fewer personalities identified by name in each of these three volumes, and shown encoded with how and where they died, each Volume could be expanded to hold many thousands of names and pages, one name per page of Matrix revealing those Torah-held secrets hidden for about 3400 years, and revealed here to the world for the first time in recorded history.

Playing the Matrix Mike Dooley, 2019-07-23 From the New York Times bestselling author of Infinite Possibilities and Life on Earth Playing the Matrix is a master class for creating the life you want to live. Tried and true, delivered and perfected over a decade while being shared live with tens

of thousands of students in 132 cities, in 34 countries, upon 6 continents. This is Mike Dooley’s advanced course on living deliberately and creating consciously. The concepts he shares were born of material he’s delivered to live audiences the world over, culminating in his most impactful, most transformational program ever. Now, for the first time in 17 years of touring, these ideas are to be shared in book form. At the heart of the Matrix lies a simple yet highly unexpected concept for creating major life change that’s unlike anything shared by other teachers, past and present. It clearly reveals why “manifesting” sometimes works with incredible ease, why it sometimes doesn’t work at all, and why, on occasion, it works, and yet in hindsight we wish it hadn’t. Readers will not only learn about the “Bermuda Triangle of Manifesting” that too often leads to heartbreak and loss, they’ll learn how to navigate around it, under full sail, with their own new “a-ha” moments that will teach them: • How to achieve clarity in purpose and desire and thereby avoid contradictions and self-sabotage • How to fuel their dreams with passion while not attaching to unimportant details and outcomes • How to plan and take action on their dreams without “messing with the cursed how’s”! And so much more...

Real-Time Simulation Technologies: Principles, Methodologies, and Applications Katalin Popovici,Pieter J. Mosterman,2017-12-19 Real-Time Simulation Technologies: Principles, Methodologies, and Applications is an edited compilation of work that explores fundamental concepts and basic techniques of real-time simulation for complex and diverse systems across a broad spectrum. Useful for both new entrants and experienced experts in the field, this book integrates coverage of detailed theory, acclaimed methodological approaches, entrenched technologies, and high-value applications of real-time simulation—all from the unique perspectives of renowned international contributors. Because it offers an accurate and otherwise unattainable assessment of how a system will behave over a particular time frame, real-time simulation is increasingly critical to the optimization of dynamic processes and adaptive systems in a variety of enterprises. These range in scope from the maintenance of the national power grid, to space exploration, to the development of virtual reality programs and cyber-physical systems. This book outlines how, for these and other undertakings, engineers must assimilate real-time data with computational tools for rapid decision making under uncertainty. Clarifying the central concepts behind real-time simulation tools and techniques, this one-of-a-kind resource: Discusses the state of the art, important challenges, and high-impact developments in simulation technologies Provides a basis for the study of real-time simulation as a fundamental and foundational technology Helps readers develop and refine principles that are applicable across a wide variety of application domains As science moves toward more advanced technologies, unconventional design approaches, and unproven regions of the design space, simulation tools are increasingly critical to successful design and operation of technical systems in a growing number of application domains. This must-have resource presents detailed coverage of real-time simulation for system design, parallel and distributed simulations, industry tools, and a large set of applications.
