Dragonfly Falling Adrian Tchaikovsky,2009-03-06 Dragonfly Falling is the second book in the critically acclaimed epic fantasy series Shadows of the Apt by Adrian Tchaikovsky, author of the Arthur C. Clarke Award-winning Children of Time. Every hero must be tested . . . The Wasp Empire's armies are on the move – and the city of Tark will be first to feel their might. Salma and Totho prepare for battle, alongside their Ant-kinde brethren. And within Tark's walls, they'll face a force greater than any Lowlander has ever seen. Stenwold Maker predicted this threat, and the Empire's secret service now deems him too dangerous to live. So he's to be eliminated, and his beloved city of Collegium destroyed. For if this centre of learning is lost, it will crush Lowland resistance. As the Empire's troops continue their relentless advance, their young Emperor pursues another, even darker goal. And his success would trigger a reign of blood lasting a thousand years. Dragonfly Falling is followed by the third book in the Shadows of the Apt series, Blood of the Mantis.

Vimana Aircraft of Ancient India & Atlantis David Hatcher Childress,1991 Did the ancients have the technology of flight? In this incredible volume on ancient India, authentic Indian texts such as the Ramayana and the Mahabharata, are used to prove that ancient aircraft were in use more than four thousand years ago. Included in this book is the entire Fourth Century BC manuscript Vimaanika Shastra by the ancient author Maharishi Bharadwaaja, translated into English by the Mysore Sanskrit professor G.R. Josyer. Also included are chapters on Atlantean technology, the incredible Rama Empire of India and the devastating wars that destroyed it. Also an entire chapter on mercury vortex propulsion and mercury gyros, the power source described in the ancient Indian texts. Not to be missed by those interested in ancient civilizations or the UFO enigma. Tons of illustrations!

Obelisks: Towers of Power David Childress,2019-05-18 David Childress, popular author and star of the History Channel's show Ancient Aliens, brings us a stunning tale of archeological investigation on a megalithic scale. Childress looks into the enigma of obelisks and their purpose. Egyptologists tell us that obelisks are granite towers that symbolize a ray of the sun—a megalithic symbol of the Sun God Ra, later to be called Aton. Some obelisks weigh over 500 tons and are massive blocks of polished granite that would be extremely difficult to quarry and erect even with modern

equipment. Why did ancient civilizations in Egypt, Ethiopia and elsewhere undertake the massive enterprise it would have been to erect a single obelisk, much less dozens of them? Were obelisks more than simple monuments? Were they energy towers that could receive or transmit energy? Childress takes us on an amazing journey through the history of the obelisk and its probable purpose as an energy tower. With discussions on Tesla's wireless power, and the use of obelisks as gigantic acupuncture needles for earth, Childress shows us what the ancients were trying to achieve with their mysterious obelisks. Chapters include: Megaliths Around the World and their Purpose; Mysteries of the Unfinished Obelisk; The Crystal Towers of Egypt; The Obelisks of Ethiopia; Obelisks in Europe and Asia; Mysterious Obelisks in the Americas; The Terrible Crystal Towers of Atlantis; Tesla's Wireless Power Distribution System; Obelisks on the Moon; more. 8-page color section.
