Trends in Telecommunication Reform 2016 International Telecommunication Union, 2017-07-11

The annual Trends in Telecommunication Reform publications are a key part of the dialogue with the world's information and communications technology (ICT) policy-makers and regulators in an increasingly converged digital environment. Under the overarching theme Regulatory incentives to achieve digital opportunities, the 16th edition of Trends explores topical issues regulators need to address to ensure that citizens can benefit from the social and economic opportunities brought about by the digital economy. For digital opportunities to fully materialize, an adaptive, consultative and innovative approach to ICT policy and regulation is more than ever necessary. The thematic chapters, drawing up from discussion papers presented at the 2015 ITU Global Symposium for Regulators, examine investment strategies to foster the deployment of broadband and access to the digital economy, network sharing and co-investment regulation, regulation and the Internet of Things (IoT), interoperability in the digital ecosystem and smart regulation to facilitate m-services and applications uptake and diffusion.

Computer-Aided Design of User Interfaces IV Robert J.K. Jacob, Quentin Limbourg, Jean Vanderdonckt, 2006-03-07 Computer-Aided Design of User Interfaces IV gathers the latest research of experts, research teams and leading organisations involved in computer-aided design of user interactive applications supported by software, with specific attention for platform-independent user interfaces and context-sensitive or aware applications. This includes: innovative model-based and agent-based approaches, code-generators, model editors, task animators, translators, checkers, advice-giving systems and systems for graphical and multimodal user interfaces. It also addresses User Interface Description Languages. This book attempts to emphasize the software tool support for designing user interfaces and their underlying languages and methods, beyond traditional development environments offered by the market. Telecommedia a banda larga. Cronaca breve della disconnessione politica italiana Fiorina Capozzi, 2020-07-23 Banda larga, una storia triste. Sono trascorsi cinque anni da quando il governo di Matteo Renzi ha annunciato la nascita di una strategia nazionale per la banda ultra larga. Ma gli

obiettivi non sono stati ancora raggiunti: i ritardi si sono accumulati e moltiplicati. Così il Paese è rimasto fanalino di coda nel Vecchio continente, pagando un caro prezzo nel momento in cui è scoppiata l'epidemia da coronavirus. Nei giorni di autoisolamento, tutti hanno dovuto combattere con una connessione "ballerina" che rendeva faticoso l'uso di internet per la scuola, per il lavoro, per lo svago. E, proprio in quei giorni, sono stati in molti a chiedersi come mai lo Stato non sia ancora riuscito a far decollare una nuova ed efficiente rete di telecomunicazioni. Questo libro è la cronaca di sei anni sprecati nel raggiungere questo obiettivo. L'autrice, che segue per "il Fatto Quotidiano" il mondo delle telecomunicazioni, analizza i protagonisti industriali, le criticità finanziarie e i tentennamenti di una classe politica che, per ragioni diverse, non ha saputo o non ha voluto accelerare la creazione di una rete a banda larga degna di questo nome. E invece ci vuole un cambio di passo affinché il Paese possa essere all'altezza delle sfide dell'economia 5.0.

Broadband Services Imrich Chlamtac, Ashwin Gumaste, Csaba Szabo, 2005-06-14 Access to the Internet is an increasing problem in many areas of the world. As the popularity and usefulness of the Internet increases on a daily basis, lack of access to the technology is putting many groups at a disadvantage in terms of better education, better jobs and even in terms of higher levels of civic participation. However, creating a network infrastructure to serve outlying communities and sectors of the population is not straight-forward. This book brings together all the aspects of the problem - technical, regulatory and economic - into one volume to provide a comprehensive resource. It describes the latest technological advances that allow cost-effective network infrastructures to be built, and places them in the context of the applications and services that the infrastructure will deliver. A section on business models and case studies from North American and Europe demonstrate that the solutions are economically and practically viable. This book is essential for anyone looking to gain an understanding of the issues and technology surrounding the access debate. It will be of particular relevance to network engineers/designers/planners at the incumbent operator companies charged with delivering broadband access to as yet unconnected regions. Governments and

regulatory bodies will also find this a useful guide to the problems that they may face.
