Available now for the first time in printed form, this set includes the System.Web namespace, which is useful for developers who develop with Microsoft ASP.NET. The System.Web namespace supplies classes and interfaces that enable browser/server communication. This namespace includes the HttpRequest class, which provides extensive information about the current HTTP request, the HttpResponse class, which manages HTTP output to the client, and the HttpServerUtility class, which provides access to server-side utilities and processes. System.Web also includes classes for cookie manipulation, file transfer, exception information, and output cache control. This Microsoft Press title includes a poster-ideal for quickly looking up System.Web details.
