The Truth About Firearms and Concealed Carry Daniel R. Engel,2014-04 Due to so much misinformation throughout America regarding firearms, I got tired of seeing innocent people die each and every day at the hands of criminals. I've come to take this poor information and loss of innocent lives in this great country very personally, and I decided to put together a book that very thoroughly explains the way firearms and ammunition work and why they do what they do. With extensive information, I hope to further your knowledge and teach you many things to help save your life one day. This book is intended for those with absolutely no experience in firearms and also for those professionals who carry a gun every day for a living. It covers certain specific information to help every household in America to become familiar with firearms, including the most commonly owned firearms, so that nobody will be left owning a gun they cannot or should not use, and prevent as many injuries as possible. Also, it assures that you will learn considerable information and be much more prepared to maintain your life in addition to maintaining FREE America.

The goal of this unique book is to increase officers' awareness that training in low-light and no-light conditions is necessary in order for them to prevail in such situations, to help facilitate correct decision making under these conditions, and to help them understand the use of a myriad of illumination tools available for professional use today. Major topics include: (1) dim-light and no-light doctrine, including navigation techniques, threat location, threat acquisition, and threat identification; (2) flashlight doctrine, including many examples of engaging a threat using a flashlight; (3) low-light weapon sighting systems; (4) techniques used for signalling during dim-light and no-light conditions; and (5) illumination technologies supporting tactical and emergency operations, including infrared systems, thermal imagers, night vision systems, strobe lights, and lasers.
