Moonshots en la educación Ester Wojcicki,Lance T. Izumi,2016-07-15 Un brillante libro enfocado en la creación de una nueva teoría educativa que involucre a la tecnología en beneficio de los alumnos. Moonshots en la educación es un libro imprescindible sobre la necesaria renovación de los modelos educativos y cómo ayudar a los alumnos a convertirse en ciudadanos digitales responsables e inteligentes. Con introducción de James Franco y colaboraciones de Alicia Chang, Alex Silverman y Elliott Parisi. En 1961, en un mensaje al congreso estadounidense, John F. Kennedy declaró: esta nación debe comprometerse a lograr la meta, antes del fin de esta década, de poner un hombre en la Luna. Ocho años después, el 20 de julio de 1969, Neil Armstrong daría los primeros pasos sobre la superficie lunar. Desde entonces, el término moonshot (disparo a la Luna) se

utiliza para hablar de metas difíciles de alcanzar, de un tipo de pensamiento audaz que puede conducir a nuevos descubrimientos. Hoy en día, la educación necesita su propio moonshot. La cultura del salón de clases sigue el mismo modelo desde hace siglos: el maestro da la lección, el alumno escucha y después pone a prueba su memoria a través de exámenes. Este rígido esquema vertical era válido para un mundo que ya no existe, genera desmotivación y estrés en los alumnos y, sobre todo, no les proporciona las habilidades que requieren para enfrentar los retos del siglo XXI. Esther Wojcicki y los coautores de este libro proponen un modelo de aprendizaje participativo y colaborativo, basado en herramientas digitales y contenidos en línea, que permita a los alumnos tomar las riendas de su propia educación. Por su parte, el papel del maestro en el aula cambia: de una autoridad instructora a un guía que enseña a los estudiantes a construir el conocimiento. Moonshots en la educación brinda diversos ejemplos de escuelas en Estados Unidos y otros países que ya están implementando modelos de enseñanza enfocados al aprendizaje digital en el salón de clases. También propone una discusión filosófica sobre diversas corrientes educativas y cómo cada una empodera a estudiantes y profesores.

I Regret Nothing Jen Lancaster,2015-05-05 THE NEW YORK TIMES BESTSELLER New York Times bestselling author Jen Lancaster has lived a life based on re-invention and self-improvement. From Bitter Is the New Black to The Tao of Martha, she's managed to document her (and her generation's) attempts to shape up, grow up, and have it all—sometimes with disastrous results… Sure Jen has made mistakes. She spent all her money from a high-paying job on shoes, clothes, and spa treatments. She then carried a Prada bag to the unemployment office. She wrote a whole memoir about dieting…but didn't lose weight. She embarked on a quest for cultural enlightenment that only cemented her love for John Hughes movies and Kraft American Singles. She tried to embrace everything Martha Stewart, while living with a menagerie of rescue cats and dogs. (Glitter…everywhere.) Mistakes are one thing; regrets are another. After a girls'

weekend in Savannah makes her realize that she is—yikes!—middle-aged (binge watching is so the new binge drinking), Jen decides to make a bucket list and seize the day, even if that means having her tattoo removed at one hundred times the cost of putting it on. From attempting a juice cleanse to studying Italian, from learning to ride a bike to starting a new business, and from sampling pasta in Rome to training for a 5K, Jen is turning a mid-life crisis into a mid-life opportunity, sharing her sometimes bumpy—but always hilarious—attempts to better her life…again.

Interface Design for Learning Dorian Peters,2014 In offices, colleges, and living rooms across the globe, learners of all ages are logging into virtual laboratories, online classrooms, and 3D worlds. Kids from kindergarten to high school are honing math and literacy skills on their phones and iPads. If that weren't enough, people worldwide are aggregating internet services (from social networks to media content) to learn from each other in "Personal Learning Environments." Strange as it sounds, the future of education is now as much in the hands of digital designers and programmers as it is in the hands of teachers. And yet, as interface designers, how much do we really know about how people learn? How does interface design actually impact learning? And how do we design environments that support both the cognitive and emotional sides of learning experiences? The answers have been hidden away in the research on education, psychology, and human computer interaction, until now. Packed with over 100 evidence-based strategies, in this book you'll learn how to: Design educational games, apps, and multimedia interfaces in ways that enhance learning Support creativity, problem-solving, and collaboration through interface design Design effective visual layouts, navigation, and multimedia for online and mobile learning Improve educational outcomes through interface design.
