Minecraft Creator Markus "Notch" Persson Kari Cornell,2018-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! Do you play computer games? If you do, you've probably played Minecraft. When Minecraft creator Markus Persson was young, he wasn't very interested in the games themselves. He was more interested in the programming instructions in the computer's manual. By the time Persson was eight years old, he was writing code for his own computer games. When he was eighteen, Persson landed his dream job as a video game programmer. In 2009, he designed Minecraft in a single weekend. In the game, players use blocks to build whatever they choose. Persson wanted to let players use their imaginations, and the idea paid off. Today, Minecraft is one of the most popular computer games in the world. Although Persson doubts he will ever top this success, he continues to develop games, while fans wait for what's next.

The Case of the iPad Cathy Burnett, Guy Merchant, Alyson Simpson, Maureen Walsh, 2017-07-06 This book brings together an international group of literacy studies scholars who have investigated mobile literacies in a variety of educational settings. Approaching mobility from diverse theoretical perspectives, the book makes a significant contribution to how mobile literacies, and tablets in particular, are being conceptualised in literacy research. The book focuses on tablets, and particularly the iPad, as a prime example of mobile literacies, setting this within the broader context of literacy and mobility. The book provides inspiration and direction for future research in mobile literacies, based upon 16 chapters that investigate the relationship between tablets and literacy in diverse ways. Together they address the complex and multiple forces associated with the distribution of the technologies themselves and the texts they mediate, and consider how apps, adults and children work together as iPads enter the mesh of practices and material arrangements that constitute the institutional setting.

Reimagining Boredom in Classrooms through Digital Game Spaces Noreen Dunnett, 2024-03-05 This book challenges common understandings of boredom and disengagement in classrooms, taking a relational approach to boredom which looks beyond the usual distinctions between in-school and out-of-school practices. The book explores how a sociomaterial perspective can provide an alternative analysis of boredom as performative, and as a phenomenon assembled in space and time rather than as a psychological attribute of the individual student. This perspective explores the affective experience of learning and how it is created in the classroom through assemblages of people, technology, objects and environment and the differing relations within them. Drawing on empirical data from a case study which compares formal learning and digital gaming practices in a group of

secondary schools in England, the book suggests that by altering the affordances and constraints available in learning situations we can prevent boredom and disengagement emerging in the classroom. This innovative book proposes that the mobility and dynamism of game spaces offer us new ways to re-imagine engagement in learning and will be of relevance to scholars, researchers and postgraduate students in the fields of teaching and learning, digital gaming, educational philosophy and educational technology.
