The Ballad of Pentra Dennis Knotts,2017-01-30 Every world has a forerunner ...Not just a voice crying in the wilderness. But one who serves as a picture of what is to come. Such was Pentra for the Lands of the Adoni. Pentra dreamed of the Knights of Es-Soh-En. He knew that he could never be all that they were. His weak eyes and weak arms disqualified him from military service. And so he dreamed. He wrote. And he collected the stories of his heroes. But then one day ...

Resistance in the Desert Ross E. Dunn,2018-05-01 This work, first published in 1977, is a study of African responses to European conquest in the late nineteenth and early twentieth centuries. It centers on the Muslim pastoral tribes and oasis communities which inhabited southeastern Morocco, a semi-arid region on the northern fringe of the Sahara Desert. Between 1881 and 1912 the French army, advancing from Algeria, invaded and occupied this region. This book examines the decades of French conquest as an episode in African, rather than European, colonial or military history.

Engineering the Revolution Ken Alder,2010-04-15 Engineering the Revolution documents the forging of a new relationship between technology and politics in Revolutionary France, and the inauguration of a distinctively modern form of the “technological life.” Here, Ken Alder rewrites the history of the eighteenth century as the total history of one particular artifact—the gun—by offering a novel and historical account of how material artifacts emerge as the outcome of political struggle. By expanding the “political” to include conflict over material objects, this volume rethinks the nature of engineering rationality, the origins of mass production, the rise of meritocracy, and our interpretation of the Enlightenment and the French Revolution.

Schmidt's Jahrbuecher ,1857

The First Mexican Navy, 1821-1830 Robert Leland Bidwell,1960

California Conquered Neal Harlow,1989-04-14 This book began as a venture to collect official and unofficial documents relating to the interval of American military rule. There proved to be thousands, the writings of Presidents, executive officers, and congressmen, naval and military personnel, governors, settlers, and citizens-routine, familiar, wheedling, seductive, blustering, commanding. As the quantity grew, they seemed eager to be heard. But the documents exhibit the traits of their makers. Containing neither the whole truth nor nothing but the truth, they offer many-sided versions of what people believed or wanted others to accept; they must be taken with a grain of salt. Long, sometimes garbled, and always incomplete, the record requires assessment, a referee to appraise the evidence and form his own imperfect conclusions. And any curious or dissenting reader may, by consulting the numerous cited sources, make his own interpretations. References, whenever possible, have been made to materials in some printed form, leading an inquirer to a vast array of historical evidence. Everything herein happened, or so the record tells, and if an assumption has been made, it is that men, issues, and events can be interesting in their own right, without exaggeration. To exaggerate, a knowing urban child recently observed, means you put in something to make it more exciting (Los Angeles Times, Dec. 10, 1978).

The Rwala Bedouin Today William Lancaster,1981-09-03 Considered by many scholars to be one of the best modern ethnographies on Middle Eastern ethnic groups, the highly regarded, unromanticized account of Bedouin life offers a clear explanation of the kinship system in nomadic societies.

The Making of Jordan Yoav Alon,2007-03-30 At the beginning of the 20th Century Jordan, like much of the Middle East, was a loose collection of tribes. By the time of its independence in 1946 it had the most firmly embedded state structures in the Arab world. Drawing on previously untapped sources, Yoav Alon examines how the disparate clan networks of Jordan were integrated into the Hashemite monarchy, with the help of the British colonial administrators. Taking a grassroot perspective, Alon looks at how the weak state institutions introduced by the Ottomans developed in British-administered Jordan. He shows how these institutions co-opted the structures of tribal society, and produced a distinctive hybrid between modern statehood and tribal confederacy which still characterises Jordan to this day. Key figures emerge in the story of Jordan's transformation, such as John Glubb, the charismatic Arab Legion commander who perceived the power of the nomadic tribes and sought to harness it to imperial Britain's statebuilding agenda. Alon's innovative approach to the origins of modern Jordan provides fresh insights not only into Jordan itself but into colonialism, modernity and the development of the state in the Middle East.

Nationalism and the Genealogical Imagination Andrew Shryock,2023-07-28 This book explores the transition from oral to written history now taking place in tribal Jordan, a transition that reveals the many ways in which modernity, literate historicity, and national identity are developing in the contemporary Middle East. As traditional Bedouin storytellers and literate historians lead him through a world of hidden documents, contested photographs, and meticulously reconstructed pedigrees, Andrew Shryock describes how he becomes enmeshed in historical debates, ranging from the local to the national level. The world the Bedouin inhabit is rich in oral tradition and historical argument, in subtle reflections on the nature of truth and its relationship to poetics, textuality, and power. Skillfully blending anthropology and history, Shryock discusses the substance of tribal history through the eyes of its creators—those who sustain an older tradition of authoritative oral history and those who have experimented with the first written accounts. His focus throughout is on the development of a genealogical nationalism as well as on the

tensions that arise between tribe and state. Rich in both personal revelation and cultural implications, this book poses a provocative challenge to traditional assumptions about the way history is written.

The Correspondence of John Flamsteed, The First Astronomer Royal Eric Gray Forbes,Lesley Murdin,Frances Wilmoth,1997-01-01 The Correspondence of John Flamsteed: The First Astronomer Royal, Volume Two contains the letters Flamsteed wrote and received from June 1682 to the spring of 1703. A leading figure in the final phases of the seventeenth-century scientific revolution, his extensive correspondence with 129 British and foreign scholars touches on many of the scientific discussions of the day. Some of these exchanges involved established correspondents, chiefly Newton and Wallis, but members of a younger generation, such as Stephen Gray, William Derham, and Abraham Sharp, appear with increasing frequency, especially after 1700.
