The SAGE Handbook of Educational Leadership Fenwick W. English,Gary L. Anderson,2005 The SAGE Handbook of Educational Leadership is a landmark work with contributions from 37 internationally renowned scholars covering an extensive range of issues confronting the field of educational leadership and administration. The Handbook reviews how leadership was redefined by management and organizational theory in its quest to become scientific, then looks forward to promising theories, concepts, and practices that show potential for development and application. This Handbook represents the establishment of a new tradition in educational leadership. It thoroughly covers a broad range of issues pertaining to curriculum leadership, supervision, teacher evaluation, budgeting, planning, school design, and issues facing the principalship and the superintendency in the United States.

Disaster Response and Homeland Security James F. Miskel,2008 Hurricane Katrina is the latest in a series of major disasters that were not well managed, but it is not likely to be the last. Category 4 and category 5 hurricanes will, according to most predictions, become both more frequent and more intense in the future due to global warming and/or natural weather cycles. In addition, it is often said that another terrorist attack on the United States is inevitable; that it is a question of when, not whether. Add to that the scare over a possible avian flu pandemic. As a result, the United States should expect that disaster response—to natural and other types of disasters—will continue to be of vital concern to the American public and the policymakers and officials who deal with disaster response and relief, including the military. The U.S. disaster relief program reflects a basic division of responsibility between federal, state, and local governments that has generally stood the test of time. At the federal level, a single agency, FEMA—now under the Department of Homeland Security—has been charged with the responsibility for coordinating the activities of the various federal agencies that have a role in disaster relief. A successful disaster response requires three things: timely and effective coordination between state and federal governments; effective coordination among the federal agencies; and effective coordination between and among state and local government agencies. Miskel examines the effects that operational failures after Hurricanes Agnes, Hugo, Andrew, and Katrina have had on the organizational design and operating principles of the disaster response system program. He also discusses the impact of 9/11 and the evolving role of the military, and he identifies reforms that should be implemented to improve the nation's ability to respond in the future.

Educational Administration Judith Chapman,2020-08-04 Both the theory and practice of educational administration have undergone major changes in recent years. There is now more theoretical diversity in the field than at any other time, with influences from traditional and post-positivist science, subjectivism, ethics, critical theory and cultural studies. Similarly, social, political and economic factors have brought about new approaches to practice. Schools administration in particular is increasingly being dominated by decentralization and pressures for accountability on curriculum and educational outcomes. Educational Administration is the first Australian text to offer a comprehensive survey of theory, context and practice. It includes chapters from leading Australian scholars such as Richard Bates, Hedley Beare, Brian Caldwell, Gabriele Lakomski and Fazal Rizvi.

EDUCATIONAL ADMINISTRATION Theory and Practice Edgar Leroy Morphet,1959

Way of the Grandmaster Grandmaster Don Miskel,2018-11-13 Grandmaster Miskel shares his wit and insight into the deeper meaning of martial arts. Essays like, A Scientific Breakdown of the Strike discuss the difference between a crushing strike, a compression strike, a jarring strike, a stunning strike, and a shocking strike that will render an opponent unconscious. Grandmaster Miskel explains the foundations and origins of many of the systems developed today. He speaks fondly of the early days and battles and with pride at the direction our brotherhood is going in the future. He talks about martial arts snobbery and petty jealousy that divide us and

about the need for unity and tolerance. He reminisces about the old days in Chicago, he speaks of the philosophical principles that form our code of conduct and chivalry, and explains the concept of coming full circle, so that, in the end, the techniques of the Grandmaster are as simple as those of a beginner, only devastatingly more effective.

Studies in Leading and Organizing Schools Cecil Miskel,Wayne K. Hoy,2003-04-01 This volume provides a mix of beginning and established scholars and a range of theoretical perspectives. Eight separate but related analyses were selected for publication this year. The book begins with a chapter by Sims and Miskel, which examines national reading policy as part of a broader federal government agenda on children's literacy. Using a model of punctuated equilibrium, they trace the peaks of congressional and media attention to literacy. Their findings reveal that the broad level of literacy has remained a rather active and durable policy issue for more than three decades. When, however, the analysis shifts to different targets, that is, from elementary and secondary school students to adults and youth to LEP individuals, there are distinct patterns of punctuation and equilibrium. The researchers conclude that the specific issue of children's literacy in the 1990s is the latest version or episode of literacy policy produced by shifting images and venues.
