Educational Administration: Theory, Research, and Practice Wayne Hoy,Cecil Miskel,2004-08-11 A leading text in its field, Educational Administration presents the most comprehensive synthesis available of theory and research in organizational behavior as it applies to the practice of Educational Administration. Each theoretical perspective presented concludes with an authentic case study that challenges students to apply their knowledge to an actual contemporary school problem.

Disaster Response and Homeland Security James Miskel,2006-08-30 Hurricane Katrina is the latest in a series of major disasters that were not well managed, but it is not likely to be the last. Category 4 and category 5 hurricanes will, according to most predictions, become both more frequent and more intense in the future due to global warming and/or natural weather cycles. In addition, it is often said that another terrorist attack on the United States is inevitable; that it is a question of when, not whether. Add to that the scare over a possible avian flu pandemic. As a result, the United States should expect that disaster response—to natural and other types of disasters—will continue to be of vital concern to the American public and the policymakers and officials who deal with disaster response and relief, including the military. The U.S. disaster relief program reflects a basic division of responsibility between federal, state, and local governments that has generally stood the test of time. At the federal level, a single agency, FEMA—now under the Department of Homeland Security—has been charged with the responsibility for coordinating the activities of the various federal agencies that have a role in disaster relief. A successful disaster response requires three things: timely and effective coordination between state and federal governments; effective coordination among the federal agencies; and effective coordination between and among state and local government agencies. Miskel, a former Deputy Assistant Associate Director of FEMA, examines the effects that operational failures after Hurricanes Agnes, Hugo, Andrew, and Katrina have had on the organizational design and operating principles of the disaster response system program. He also discusses the impact of 9/11 and the evolving role of the military, and he identifies reforms that should be implemented to improve the nation's ability to respond in the future.

Way of the Grandmaster Grandmaster Don Miskel,2018-11-13 Grandmaster Miskel shares his wit and insight into the deeper meaning of martial arts. Essays like, A Scientific Breakdown of the Strike discuss the difference between a crushing strike, a compression strike, a jarring strike, a stunning strike, and a shocking strike that will render an opponent unconscious. Grandmaster Miskel explains the foundations and origins of many of the systems developed today. He speaks fondly of the early days and battles and with pride at the direction our brotherhood is going in the future. He talks about martial arts snobbery and petty jealousy that divide us and about the need for unity and tolerance. He reminisces about the old days in Chicago, he speaks of the philosophical principles that form our code of conduct and chivalry, and explains the concept of coming full circle, so that, in the end, the techniques of the Grandmaster are as simple as those of a beginner, only devastatingly more effective.

Educational Administration Wayne K. Hoy,Cecil G. Miskel,2007 Abstract:

Studies in Leading and Organizing Schools Cecil Miskel,Wayne K. Hoy,2003-04-01 This volume provides a mix of beginning and established scholars and a range of theoretical perspectives. Eight separate but related analyses were selected for publication this year. The book begins with a chapter by Sims and Miskel, which examines national reading policy as part of a broader federal government agenda on children's literacy. Using a model of punctuated equilibrium, they trace the peaks of congressional and media attention to literacy. Their findings reveal that the broad level of literacy has remained a rather active and durable policy issue for more than three decades. When, however, the analysis shifts to different targets, that is, from elementary and secondary school students to adults and youth to LEP individuals, there are distinct patterns of punctuation and equilibrium. The researchers conclude that the specific issue of children's literacy in the 1990s is the latest version or episode of literacy policy produced by shifting images and venues.

The Real Population Bomb P. H. Liotta,James F. Miskel,2012-02-01 Discusses the anticipated effects of increasing population densities on the world's future megacities, focusing on international, environmental, and human security aspects, and reviews approaches being taken to address the issues.

Contemporary Issues in Educational Policy and School Outcomes Wayne K. Hoy,Cecil Miskel,2006-03-01 This book is the fifth in a series on research and theory dedicated to advancing our understanding of schools through empirical study and theoretical analysis. Scholars, both young and established, are invited to publish original analyses, but we especially encourage young scholars to contribute to this series. The current volume is similar to its predecessors in that it provides a mix of beginning and established scholars and a broad range of theoretical perspectives; in all 14 authors contributed to 9 separate but related analyses, which were selected for publication this year.

Educational Leadership and Reform Wayne K. Hoy,Cecil G. Miskel,2005 Hoy (educational administration, Ohio State University) and Miskel (University of Michigan) present work by new and established scholars representing a variety of theoretical perspectives on leadership and reform in K-12 schools. They draw on a mix of methodologies, including surveys, case studies, and structural equation modeling, to examine issue

Theory and Research in Educational Administration Vol. 1 Cecil Miskel,Wayne K. Hoy,2002-03-01 This series is dedicated to advancing our understanding of schools through empirical study and theoretical analysis. Scholars, both young and established, are invited to publish original analyses, but we especially encourage young scholars to contribute to Theory and Research in Educational Administration. This first issue provides a mix of beginning and established scholars and a range of theoretical perspectives. Eight separate but related studies were selected for this first issue. Three of the research pieces deal with the intended and unintended consequences of policy and political initiatives in schools. Do high-stakes accountability environments threaten the potential of learning organizations? Marks and Printy grapple with that question. Not surprisingly, they anticipate the latent dysfunctional consequences of high-stakes accountability as they provide a careful analysis of urban school district responses to state policies. Well-intended initiatives produced

unintended consequences that threatened the capacity for organizational learning in these schools. In a similar fashion, Jones and Malen’s findings suggest that political strategies that use insider dynamics can foster successful enactment of reforms but often at a cost of undermining efforts to implement the policy. Song and Miskel focus their analysis on national reading policy. An examination of national interests groups and policymakers suggests that an assessment of various groups’ influence is necessary if policy actors are to make sensible judgments in choosing allies and building coalitions for effective actions. Two of the papers are informed by contingency theory. Ogawa and Studer are concerned with the relationship between the school and its community. They propose that both buffering and bridging strategies enable schools to deal with parents effectively. Because schools depend on parents for resources, they bridge to parents in cooperative fashion, but because parents often pose uncertainty, schools also buffer parent influence by limiting their access. Yet, there is divergence from contingency theory because schools depend primarily on parents to provide socio-cultural rather than material resources; hence, schools often use strategies that shape rather than diminish dependence on parents. Rowan, also draws ideas from contingency theory to examine the extent to which the nature of teachers’ instructional work affects patterns of instructional management in schools. His data support the explanation that teachers who face increased task variety actively work to construct organic patterns of instructional management to reduce task uncertainty and to increase workplace motivation and commitment. Three papers examine teachers in schools. Rowan is intrigued by the variation in the nature of teachers’ work both in terms of task variety and task uncertainty. He finds that teachers do not see their work as many organizational theorists do, that is, as a non-routine form of work; in fact, teachers view teaching as either as a routine task or expert task. In spite of the fact that many teachers endorsed a constructivist view of teaching, few concluded it was a non-routine task. Moreover, teachers in different disciplines have different views about both the nature of academic knowledge and desirable teaching practices. Both Goddard and Hoy and his colleagues use social cognitive theory to develop an argument of the importance of collective efficacy in positively influencing student achievement. Hoy, Smith, and Sweetland build on their earlier work to demonstrate that collective efficacy of schools is pivotal in explaining student achievement in a sample of rural schools. Goddard shows that that collective efficacy is also an important predictor of the practice of involving teachers in important school decisions. He concludes that the more we learn how school practices are related to collective efficacy, the more we will know about what school leaders

Buying Trouble? James F. Miskel,1993 Recent economic trends have created strong incentives for foreign industry to serve as reliable suppliers of military-related products during crises. The formation of free trade zones and economic blocs also make anti-American trade embargoes virtually impossible to administer. In this book, the author advocates the positive effects of military research on science and explains how the defense acquisition process could be more efficient. He seeks to address whether the national security is jeopardized when the Pentagon and American defense industries rely upon imports of defense-related products and technologies. Contents: Defense Industries in the 1980s; Objectives and Definitions; Gulf War Lessons; Technological Superiority; Sustainability, Sea Lift and Air Lift; Other Sustainability Programs; Pacific Rim Imports; Investments, Trading Blocs, Other Factors; Conclusions; Bibliography; Index

Educational Administration, Policy, and Reform Wayne K. Hoy,Cecil Miskel,2004-05-01 This book series on Theory and Research in Educational Administration is about understanding schools. We welcome articles and analyses that explain school organizations and administration. We are interested in the why questions about schools. To that end, case analyses, surveys, large data base analyses, experimental studies, and theoretical analyses are all welcome. We provide the space for authors to do comprehensive analyses where that is appropriate and useful. We believe that the Theory and Research in Educational Administration Series has the potential to make an important contribution to our field, but we will be successful only if our colleagues continue to join us in this mission.

The SAGE Handbook of Educational Leadership Fenwick W. English,Gary L. Anderson,2005 The SAGE Handbook of Educational Leadership is a landmark work with contributions from 37 internationally renowned scholars covering an extensive range of issues confronting the field of educational leadership and administration. This Handbook represents the establishment of a new tradition in educational leadership. It thoroughly covers a broad range of issues pertaining to curriculum leadership, supervision, teacher evaluation, budgeting, planning, school design, and issues facing the principalship and the superintendency in the United States.

Distribution of the Radioactivity from a Nuclear Cratering Experiment John A. Miskel,Norman A. Bonner,1964 Radiochemical analyses were performed on fallout and particulate cloud samples. A few tenths of a percent of the non-volatile fission products and 10-20% of the more volatile species were vented. A large fraction of the non-volatile products fell out within 10 miles, whereas the major portion of the volatile products did not. (Author).
